Subject: ENERGY STAR Imaging Equipment Guidance Document
Attachments: FA and ELabeling Guidance 4-19-06.pdf

This message is being sent to you on behalf of EPA and DOE's ENERGY STAR® program.

Dear ENERGY STAR Imaging Equipment Stakeholder:

In response to requests from stakeholders for additional clarification regarding the ENERGY STAR Draft 3 Imaging Equipment Specification (Version 1.0), EPA has prepared a guidance document to further clarify the Functional Adder approach and the electronic labeling option presented in this draft. The attached guidance document includes the following:

- A list of key changes to the functional-adder approach that will be reflected in the Final Draft specification;
- Additional guidance on how to apply the functional-adder approach; and
- Minimum guidelines for electronic labeling.

EPA will include much of the clarification provided in this document in the Final Draft specification, which is scheduled for distribution on April 21, 2006, and in the Final Operational Mode (OM) test procedure. Stakeholders are asked to submit any outstanding comments on the Functional Adder approach and/or the electronic labeling proposal **by April 28, 2006**. EPA will distribute the Final Version 1.0 Imaging Specification on May 3, 2006.

Feedback may be directed to Katharine Kaplan Osdoba, EPA, at osdoba.katharine@epa.gov or Erin Trager, ICF Consulting, at etrager@icfconsulting.com.

Thank you again for your important contributions to this specification revision process.
