**Attachments:** October 14 Logistics.pdf; October Meeting Agenda.pdf

This message is being sent to you on behalf of EPA and DOE's ENERGY STAR® program.

Dear ENERGY STAR Imaging Equipment Stakeholder:

Attached, please find a tentative meeting agenda and accompanying logistics for the Imaging Equipment industry meeting scheduled for October 14, 2005 in Washington, DC.

EPA plans to incorporate a new format in this industry meeting by asking a few stakeholders to present their views on specific topics. In addition, a Web component will be made available to allow stakeholders to participate who are unable to travel to the meeting. In the coming weeks, EPA will provide additional information, including instructions for participating remotely and specific details on the topics that will be presented and discussed.

To reserve a space to attend the meeting in person or suggest additions to the agenda, stakeholders are asked to contact Erin Trager, ICF Consulting, at [etrager@icfconsulting.com](mailto:etrager@icfconsulting.com) **as soon as possible**.

Other Important Reminders:

Please be sure to submit any comments on the Draft 1 Imaging Equipment Specification by Friday, September 23. Secondly, EPA would like to thank stakeholders who have submitted data from TEC testing. It is hoped that all stakeholders will be able and willing to test a variety of products to make this data set as complete as possible by the November 1 deadline. If you have any questions about conducting tests to the TEC method, please contact Erin Trager.

Thank you!
