

## Visual Observation

### OLC Course Recommendations

#### **Competency Definition**

Notices details and pays attention to instructions, demonstrations, and other activities. Takes in and recall incoming visual sensory information and use it to make predictions, comparison, and/or evaluations. Recognizes difference or similarities, or sensing challenges in circumstances of events. Discerns between relevant visual cues or information and irrelevant or distracting information. Visually inspects persons, property, or equipment.

#### **OLC Component Titles**

At this time, no additional competency-related components have been identified on the OLC.
