

**Preprimary education  
enrollment**

January 1999

*Participating in early childhood programs such as Head Start, nursery school, prekindergarten, and kindergarten can better prepare a child to enter first grade. Many policymakers and educators believe that it is important to help all children start elementary school on an equal footing with other children. Involving students in preprimary programs beginning at earlier ages may provide these students with valuable experiences that will help them start elementary school better prepared to learn.*

- Preprimary enrollment rates for 3-, 4-, and 5-year-olds were higher in 1996 than in 1991. In 1996, 37 percent of 3-year-olds, 58 percent of 4-year-olds, and 90 percent of 5-year-olds were enrolled in preprimary education.
- In 1996, similar percentages of white and black 3- and 4-year-olds were enrolled in center-based programs, while their Hispanic peers were less likely to be enrolled.
- Three- and 4-year-olds from families with incomes of more than \$50,000 were more likely than 3- and 4-year-olds from families with incomes of \$50,000 or less to be enrolled in preprimary education.
- There was a positive relationship between parents' educational attainment and the enrollment rates of 3- and 4-year-olds: as parents' educational attainment increased, so did the preprimary enrollment rates of their children. However, enrollment rates of 5-year-olds were similar, regardless of their parents' educational attainment.

**Percentage of 3-, 4-, and 5-year-olds enrolled in center-based programs or kindergarten, by selected student characteristics: 1991, 1993, 1995, and 1996**

Selected student characteristics	3-year-olds				4-year-olds				5-year-olds			
	1991	1993	1995	1996	1991	1993	1995	1996	1991	1993	1995	1996

— Not available.

<sup>1</sup> The middle two income ranges in 1991 were \$20,001–30,000 and \$30,001–50,000, respectively.

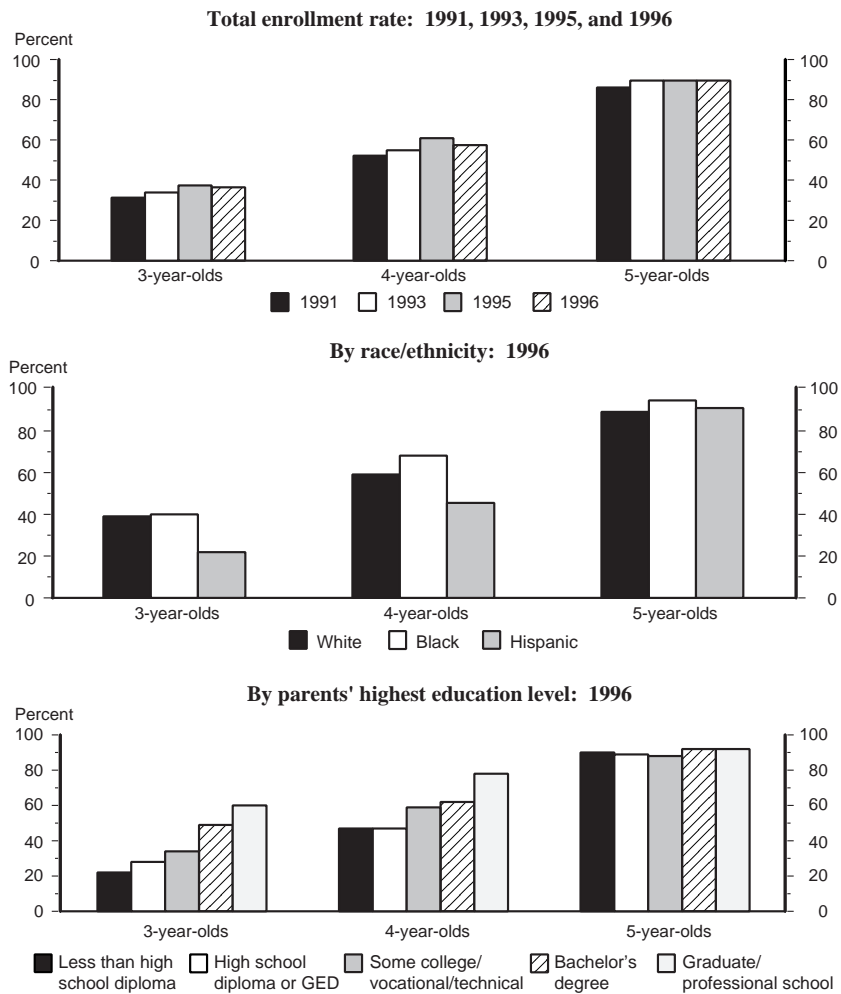

<sup>2</sup> Interpret with caution; standard errors are large due to small sample sizes.

NOTE: Included in the total but not shown separately are children from other racial/ethnic groups and other types of family structures. This analysis includes children

ages 3–5 who were not enrolled in first grade. Age is as of December 31 of the prior year.
