
Appendix III

Core hole number, sample number (canister number), and major, minor, and trace element content for samples from three core holes 2, 17, and 18 in the Powder River Basin, Wyoming. Location of core holes shown in figure 1 of text.

Core hole 2. Major, minor, and trace element content for MichiWest Energy, Inc., Pilot 16-32 core hole. [All data is on a whole coal dry basis; —, not determined; <, less than value; ppm, parts per million]

Canister number	Average depth, in ft	Aluminum ² , in percent	Calcium ² , in percent	Chlorine ³ , in percent	Iron ² , in percent	Magnesium ² , in percent	Phosphorous ² , in percent	Potassium ² , in percent	Silicon ² , in percent	Sodium ⁴ , in percent	Titanium ² , in percent	Antimony ⁵ , in ppm	Arsenic ⁵ , in ppm	Barium ² , in ppm	Beryllium ⁴ , in ppm

¹ See Table 1 for core hole location.

² By inductive coupled plasma-atomic emission spectrometry on sintered coal ash, Bullock and others (2002).

³ By ion chromatographic determination, Bullock and others (2002).

⁴ By inductive coupled plasma-atomic emission spectrometry on acidified coal ash, Bullock and others (2002).

⁵ By inductive coupled plasma-mass spectrometry on acidified coal ash, Bullock and others (2002).

⁶ By cold vapor-atomic absorption spectrometry, Bullock and others (2002).

⁷ By atomic absorption spectrometry of acidified coal, Bullock and others (2002).
