

Graduate Students and Postdoctorates in Science and Engineering: Fall 2006

Detailed Statistical Tables | NSF 08-306 | April 2008

Julia D. Oliver,
Project Officer
Human Resources Statistics Program
(703) 292-7809

General Notes

Data presented here are derived from the fall 2006 National Science Foundation-National Institutes of Health Survey of Graduate Students and Postdoctorates in Science and Engineering. Unless otherwise specified, the published data represent estimates of total enrollment in science, engineering, and health-related programs in 12,320 graduate departments at 586 institutions in the United States and outlying areas.

Collection of graduate enrollment and postdoctoral employment data began in 1966. Given the need to remain relevant to the needs of those who use the resulting data, the survey has been modified since its inception. These modifications include changes in coverage of institutions and fields, in definitions, and in the kinds of demographic data collected. (See appendix A, "Technical Notes," for further information.) Because survey modifications occur and institutions may revise their data for earlier years, only the latest trend data published in this report should be used in historical analyses.

Data Tables

Table	Graduate enrollment in all institutions
	Trends: 1975–2006
	by level of enrollment, broad field, and location
1	total: 1975–2006 (selected years)
	by field

na = not applicable; school did not exist under this name. NA = not available; data were not collected from this institution in this year. ne = not eligible; institution did not meet the criteria for inclusion.

^aTulane and the two LSU New Orleans campuses were closed in fall 2005 due to Hurricane Katrina and did not report data.

^bInstitution did not respond to the 2006 survey; all 2006 data are imputed.

NOTE: Tied institutions are ranked alphabetically.

Appendix A. Technical Notes

Survey Universe

The data collected in the 2006 Survey of Graduate Students and Postdoctorates in Science and Engineering represent national estimates of graduate enrollment and postdoctoral employment as of fall 2006 in all U.S. academic institutions that granted master's degrees or research doctorates in any science, engineering, or selected health field.[1] The survey collects data for all branch campuses, affiliated research centers, and separately organized components, such as graduate or medical schools. The survey universe consisted of 707 reporting units at 586 graduate institutions: 495 reporting units at 374 doctorate-granting institutions and 212 reporting units at 212 master's-granting institutions.[2]

Data on graduate science and engineering (S&E) enrollment and postdoctoral appointees have been collected annually since 1966. However, data from 1966 to 1974 are not directly comparable with data from 1975 to 2006 due to changes in both the S&E fields and the types of institutions covered in the survey. From fall 1966 through fall 1971, the National Science Foundation (NSF) Graduate Traineeship Program collected data from a limited number of doctorate-granting institutions and requested data only on S&E fields supported by NSF. The NSF Universities and Nonprofit Institutions Studies Group began collecting these data with the fall 1972 survey. Between 1972 and 1974, eligibility definitions were changed to include selected health fields and to increase the number of S&E fields surveyed; the survey was also broadened to include all institutions known to have programs leading to a doctorate or master's degree in science and engineering.

Table A-1 shows the number of institutions, reporting units, and departments by degree level covered by the GSS, as well as the estimated total enrollment for each year between 1966 and 2006.

- Data for 1966–71 reflect totals for the NSF Graduate Traineeship program only and are not comparable with data from 1972 through 2006.
- Data for 1972–74 reflect changes in eligibility definitions, which affected both S&E fields and types of institutions surveyed. These data are not comparable to data collected before 1972 or after 1974.
- Data for 1984–87 from master's-granting institutions were collected on a sample basis. Enrollment data for this period have been adjusted to account for the sampling and reflect estimated universe totals.
- Data for 1975–2006 are intended to represent consistent coverage of science, engineering, and selected health fields. In 1989 NSF revised the coverage of S&E fields in the survey. This resulted in the exclusion of some fields, and the data for 1975–88 subsequently were revised to reflect this change. Since 1988 the survey has attempted to cover all institutions with master's or doctoral programs in science, engineering, or selected health fields and has excluded institutions that do not have any such graduate programs.

Tables A-2 and A-3 present data on departmental coverage by S&E and health-related fields for doctorate- and master's-granting institutions for the years 1999–2006.

Survey Instruments

The GSS survey instruments (paper and Web versions) consist of NSF Form 811 and NSF Form 812. Form 811 is a list of departments, programs, research centers, or health-care facilities specific to each institution in the survey. Form 812 is a series of questions that obtains counts of students and data on key characteristics of interest, such as race/ethnicity, sex, citizenship, and source of funding.

There were no significant changes to the content of the 2006 survey from previous survey years. However, a number of changes were made to the format of the survey instruments. These changes include the following:

- Reformatting the paper questionnaire so that instructions were close to the questionnaire items
- Including a detailed glossary of terms used in the GSS for both the paper and the Web-based versions of the survey
- Modifying the Web survey to make it easier to submit data via the file upload function
- Reformatting the school coordinator materials into a single package

The GSS forms are sent to the school coordinator. In that package are two sets of materials: one for the school coordinator's completion and another that may be completed by the school coordinator or delegated to departmental respondents for completion.

The school coordinator package consists of a booklet that incorporates the following:

- A cover letter to the school coordinator
- The ID and password for the school coordinator to use in responding to the survey through the Web-based data collection system
- Instructions to the school coordinator on how to update the school's prior year's list of departments, programs, research centers and health-care facilities (Form 811) and administer the survey (Form 812)
- A question on how the data provided by the institution were derived (e.g., from a computerized central records system, automated systems relying on departmental input, a hand-tabulation at the institutional level, a hand-tabulation at the departmental level, or a combination of the above sources)

In addition, the school-coordinator package contains a crosswalk showing representative National Center for Education Statistics Classification of Instructional Program (CIP) codes corresponding to each science, engineering, and selected health field as defined by NSF.

The departmental respondent package consists of a booklet that incorporates the following:

- A cover letter to the departmental respondents
- The questionnaire, which includes instructions
- A glossary of terms used in the survey

Survey Procedures

Each fall the GSS (both paper and the Web version) is sent to a school coordinator appointed by the educational institution. The survey packets were mailed by 11 November 2006 with a requested due date of 31 January 2007. The Web survey was opened on 26 October 2006. The survey procedures used in the 2006 GSS were the same as those used in previous cycles.

School coordinators are requested to review the departmental listing provided in the survey packet on NSF Form 811 and indicate any changes in their school structure, such as departments newly formed, phased out, split, or merged, and to check off any departments that had neither graduate students nor postdoctorates (for which survey forms would therefore not be submitted). School coordinators submit revised Form 811s via the Web survey or by mail to the survey contractor for use as a checklist in tracking departmental responses.

Form 812 is completed by either the school coordinator or departmental respondents and returned to the survey contractor for data entry, editing, and tabulation. The survey contractor refers arithmetic errors, inconsistencies between items, and sharp year-to-year fluctuations to the school coordinators for correction or clarification.

The majority of coordinators indicate they use a combination of sources to provide the data they report on the GSS. Over the years, the use of computerized systems has shown a small but gradual increase.

School coordinators and departmental respondents have had the option of providing data using the Web-based data collection system since the 1998 survey. In 2006, 644 of the 707 reporting units used the online option.

Response Rates

The 2004, 2005, and 2006 response rates are not directly comparable with response rates reported for prior years. Response rates from 1975 through 2003 were calculated for reporting units (schools) and departments but not for institutions. For schools, the response rate was calculated as the total number of responding schools divided by the total number of eligible schools. A school was considered responding if one or more of its eligible departments responded. The departmental response rate was calculated as the number of departments not requiring full imputation divided by the total number of eligible departments. A department was considered responding if it reported at least one data item.

In 2004 the response-rate calculations were changed for schools and departments, and a response-rate calculation was developed for institutions. These new response-rate calculations adhere to the American Association for Public Opinion Research's (AAPOR) standards for computing response rates.[3]

Criteria for distinguishing categories of response (complete, partial, nonresponse) for 2004 forward are as follows:

Department. A department is considered a complete respondent if it reports complete row and column totals in Items 5, 6, 7, and 8 of the survey. A department is considered a partial respondent if it reports only grand totals for Items 5, 6, 7, and 8. A department is classified as a nonrespondent if it does not meet the criteria for complete or partial respondents.

Reporting Unit. A reporting unit is considered a complete respondent if 90% or more of its

departments provide data (are not nonrespondents, as defined above for departments). Response is considered partial if more than 50% but less than 90% of its departments provide data. A reporting unit is considered a nonrespondent if less than 50% of its departments provide data. The same criteria are used to categorize institutional response.

In 2006, 10,814 (87.8%) of the total 12,320 eligible departments were considered complete respondents. An additional 1,177 (9.6%) were considered partial respondents, reporting only grand totals to items 5, 6, 7 and 8. A total of 329 departments (2.7%) were considered nonrespondents.

Of the 707 reporting units surveyed in 2006, 665 (94.0%) provided complete responses, 14 (2.0%) provided partial responses, and 28 (4.0%) were nonrespondents.

Of the 586 institutions surveyed in 2006, 547 (96.3%) were complete respondents, 12 (2.0%) were partial respondents, and 27 (4.6%) were nonrespondents.

Table A-4 shows departmental response rates for 1975–2006. For comparison purposes, two sets of response rates are shown for 2004–06. The first set follows the response-rate calculation used from 1975–2003. The second set follows the response-rate calculation introduced in 2004, which adheres to AAPOR standards. For example, in 2006, 329 departments were considered nonrespondents under the new response-rate calculations, whereas only 302 would have been considered nonrespondents under the older method.

Imputation techniques were used to fill in missing data for departments in 2006. Tables A-5 and A-6 show the total number of departments in doctorate- and master's-granting institutions, the imputed number of full- and part-time graduate students enrolled, the imputed number of postdoctoral appointees, and imputation rates for 2004, 2005, and 2006. Tables A-7 through A-12 provide imputation rates and imputed data by specific data items for 2006.

Changes in Data Items

Over time, changes have been made to the content of the survey to keep it relevant to the needs of data users. Such changes prevent precise maintenance of trend data; therefore, some data items are not available for all institutions in all years. Major changes in the data collected (with the year changes became effective) include the following:

Data Collection

- | | |
|---------|---|
| 1975 | Graduate institutions that granted only master's degrees were asked to provide estimates for the number of full- and part-time students and the number of postdoctorates and/or research associates. |
| 1976–77 | Data for master's-granting institutions were collected on an abbreviated form of the survey (short form), which did not collect data on citizenship of graduate students. |
| 1978 | Doctorate-granting institutions received a short form of the survey collecting selected data items; master's-granting institutions were not surveyed. The 1978 figures shown in the tables for total enrollment and |

full-time enrollment for master's-granting institutions represent estimates based on 1977 and 1979 data.

- 1979 All graduate institutions were surveyed using the same form; the full-scale survey was resumed.
- 1984–87 The survey design was changed to a stratified random sample with a certainty stratum that included all doctorate-granting institutions, all master's-granting historically black colleges and universities, and all land-grant institutions. The remaining master's-granting institutions were divided into two sample strata based on enrollment size. Enrollment data for 1984–87 have been adjusted to reflect universe totals.
- 1988 Surveying the entire eligible survey population was resumed for the first time since 1983–84.
- 2005 Due to Hurricane Katrina, data for Tulane University and Loyola University were not included, and Louisiana State University data are for the Graduate School (Baton Rouge) and Health Sciences Center (Shreveport) only; the two New Orleans campuses were closed. Data from these schools were not available and were not imputed.

Sex

- 1976–77 Master's-granting institutions were requested to provide data on all graduate students by sex.
- 1978 Doctorate-granting institutions received a short form of the survey collecting selected data items, which did not request any information on sex; 1978 figures in the tables represent estimates based on 1977 and 1979 data. Master's-granting institutions were not surveyed.
- 1979 Data on sex were requested for all graduate students at all institutions.
- 1993 The survey began collecting race/ethnicity data by sex.

Race/Ethnicity

- 1979 The survey began collecting race/ethnicity data as an optional data item; collection of this information became an official part of the survey in 1980.
- 1993 The survey began collecting race/ethnicity data by sex.
- 1999 The survey presented respondents with new race/ethnicity categories. The Asian/Pacific Islander category used in previous years' surveys became two categories: Asian and Native Hawaiian/Pacific Islander. In addition, the survey included two new categories: More Than One Race Hispanic/Latino and More Than One Race Non-Hispanic/Latino. The 1999 survey excluded the Other category included in previous years' surveys.

In each of the 7 years of collecting these data, only about 8% of the departments have reported data in any of the new categories. For this year's table production, as in the previous 6 years, the data reported in

the new categories are combined into previous survey categories. The data are combined for the tables as follows: the Asian and Native Hawaiian/Pacific Islander categories form the Asian/Pacific Islander category; the One Race Only Hispanic/Latino and More Than One Race Hispanic/Latino categories form the Hispanic category; and the More Than One Race Non-Hispanic/Latino and Unknown or Did Not State categories form the Other or Unknown category.

Citizenship

- 1972–77 The survey collected citizenship data for graduate students enrolled full time in doctorate-granting institutions.
- 1975–77 Citizenship data were not collected from master's-degree-only institutions for either full- or part-time students.
- 1978 Doctorate-granting institutions received a short form of the survey, which did not collect any citizenship data; 1978 figures in the tables represent estimates based on 1977 and 1979 data. Master's-granting institutions were not surveyed.
- 1979 The survey began collecting citizenship data for all full-time graduate students.
- 1983 The survey began collecting citizenship data for graduate students enrolled part time.

First-Time Enrollment

- 1999 The survey began collecting data on first-time enrollment by race/ethnicity, but data collected by the 2000 survey were the first of these data released.

Graduate Student Support

- 1978 The survey did not collect data on mechanisms of support but did collect sources of support for full-time students. Because actual mechanisms of support were unknown, data were reported only as Other. Master's-granting institutions were not surveyed.
- 1979 The survey began collecting separate data on mechanisms of support for fellowships and traineeships (prior years combined these mechanisms). It also started to collect information on "other nonfaculty research staff with doctorates" along with the information collected on postdoctoral appointees.
- 1985 The survey began collecting separate data on students receiving their primary support from the U.S. Department of Agriculture.
- 1996 The survey began collecting separate data on students receiving their primary support from the National Aeronautics and Space Administration.
- 1999 The survey began collecting separate data on students receiving their primary support from the U.S. Department of Energy.

Data Revisions

During the fall 1988 survey cycle, a review of the survey universe and of the S&E

definition resulted in the exclusion of departments that were not primarily oriented toward granting research degrees. A number of departments—mostly those in the field of "Social sciences, not elsewhere classified"—were found to be primarily engaged in training teachers, practitioners, administrators, or managers rather than researchers; thus, they were no longer eligible for the survey. During the 1989–2006 survey cycles, this process continued, and all ineligible departments identified were removed to ensure trend consistency for the entire 1975–2006 period. These changes resulted in a reduction in total enrollments and social science enrollments for all years. Table A-13 shows the net effect on enrollment data of these adjustments over the years.

Each survey cycle since fall 1992, the classification of an institution's previous-year enrollment data has been changed to reflect the institution's degree-granting status (master's or doctorate) in the current survey cycle. Over the years, a number of master's-granting institutions have become doctorate-granting institutions, and their enrollment data were reclassified from master's- to doctoral-degree status. This shifted numerous institutions (and students) from master's-granting to doctorate-granting categories for years before 1992. Shifting enrollment to doctorate-granting institutions partially offsets decreases in enrollment that occur when ineligible departments are removed in the survey universe review process; thus reductions in enrollment have been smaller at doctorate-granting institutions than at master's-granting institutions.

Since the 1992 survey cycle, the definition of medical schools has included only those institutional components with membership in the Association of American Medical Colleges. Data collected before 1992 are not comparable with data collected for the fall 1992 and subsequent surveys.

Notes

[1] The research doctorate is a research degree that (1) requires an original contribution of knowledge to a science, engineering, or health-related field (typically, but not always, in the form of a written dissertation) and (2) is not primarily intended for the practice of a profession. For additional survey information and available data related to graduate student enrollment and postdoctoral appointees in science and engineering, see <http://www.nsf.gov/statistics/srvygradpostdoc/>.

[2] In this report, the term "reporting unit" is essentially equivalent to a school (such as a graduate school, medical or dental school, nursing school, or school of public health), an affiliated research center, a branch campus, or any other organizational component within an academic institution that grants a science, engineering, or selected health degree.

[3] See response rate 3 calculation, p. 29. American Association for Public Opinion Research. 2004. *Standard Definitions: Final Dispositions of Case Codes and Outcome Rates for Surveys*. 3rd ed. Lenexa, Kansas: AAPOR.

na = not applicable.

^a The 1972 survey also collected selected data for 1971.

^b The 1976 survey also collected 1975 data from master's-granting institutions.

^c Master's-granting institutions were not surveyed in 1978; totals represent estimates based on 1977 and 1979 data.

NOTE: Data from 1966 to 1974 are not directly comparable with data from 1975 forward due to changes both in the science and engineering fields and in the types of institutions covered in the survey.

2006 ^d	12,320	10,814	87.8	1,177	9.6	329	2.7

NA = not available.

^a The 1976 survey also collected 1975 data from master's-granting institutions.

^b Master's-granting institutions were not surveyed in 1978; totals represent estimates based on 1977 and 1979 data.

^c Calculated using the response-rate formula used through 2003. Schools closed in 2005 because of Hurricane Katrina were counted as nonrespondents.

^d Calculated using the response-rate formula implemented in 2004. Schools closed in 2005 because of Hurricane Katrina were counted as nonrespondents.

NOTES: Includes medical schools. Departments providing partial responses are included in the complete response column prior to 1981 and reported separately beginning in 1981. Response rates for 2006 are as of 18 September 2007.

TABLE A-13. Graduate enrollment data as originally published and as modified through the fall 2006 graduate student survey cycle: 1975–2006

Year	All institutions			Doctorate-granting institutions			Master's-granting institutions		
	Original	Revised	% change	Original	Revised	% change	Original	Revised	% change
2004	172,173	171,890	-0.2	139,952	140,657	0.5	32,221	31,233	-3.1
2005	176,573	175,606	-0.5	146,595	145,850	-0.5	29,978	29,756	-0.7
2006	178,628	na	-	148,935	na	-	29,693	na	-

* = less than 0.05%; na = not applicable.

^a The 1976 survey also collected 1975 data from master's-granting institutions.

^b Master's-granting institutions were not surveyed in 1978; totals represent estimates based on 1977 and 1979 data.

NOTES: The % change column measures retroactive changes in survey definitions. Three survey changes in the late 1980s and early 1990s had a retroactive effect on figures reported for earlier years. (1) Before 1992, doctorate or master's degree-granting status was determined by an institution's status each year. Beginning in 1992, degree-granting status was determined by the status reported in the latest survey year. This change shifted numerous institutions (and students) from master's-granting to doctorate-granting categories for years before 1992. (2) In 1988, guidelines to determine science and engineering departments were tightened; thus, departments in fields such as educational psychology, social work, and cultural studies were retroactively dropped from the survey population. (3) Improved estimates were generated for 1984–87, in which enrollments at master's-granting institutions were sampled.

Appendix B. Survey Materials

- 2006 Graduate Student Survey
- 2006 Crosswalk

NATIONAL SCIENCE FOUNDATION
ARLINGTON, VA 22230

Dear Departmental Respondent:

The National Science Foundation (NSF) and National Institutes of Health (NIH) request your participation in their annual Survey of Graduate Students and Postdoctorates in Science and Engineering (graduate student survey). Your timely response will ensure that your department is accurately represented in data used by Federal and State decisionmakers. In addition, we hope you will find the data useful for comparisons with other institutions in your State or region. Also, since industrial firms use these data in preparing for employment recruiting visits, your participation in the survey provides valuable benefits to your graduates.

Your survey data must be returned to NSF on or before January 31, 2007. Because the graduate student survey is changing data collection contractors in mid-2007, all survey operations must be completed by that time. As a result, we have decided that institutions that do not submit their data by this deadline may not be included in the 2006 report.

If you do not use the Web system, please return your completed data sheet to your survey coordinator before January 31, 2007, so that it can be transmitted to NSF in time to meet the survey deadline.

Thank you for your efforts in providing timely and meaningful statistics to NSF and NIH.

Sincerely,

Lynda T. Carlson, Ph.D.
Division Director
Division of Science Resources Statistics
National Science Foundation

Sincerely,

Jennifer Sutton
NIH Research Training Officer
Research Training Office
Office of the Director
National Institutes of Health

NSF-NIH SURVEY OF GRADUATE STUDENTS AND POSTDOCTORATES IN SCIENCE AND ENGINEERING, FALL 2006

GENERAL INFORMATION AND INSTRUCTIONS FOR ITEMS 1–4

PURPOSE OF THE SURVEY

The survey provides a comprehensive picture of the training of future scientists and engineers in the Nation's graduate schools. Data are used by Congress and the executive branch during budget preparation and by State government agencies and other analysts to assess the future supply of science and engineering (S&E) personnel.

This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. All information provided will be used for statistical purposes only. Response is entirely voluntary, and failure to provide some or all of the information will in no way adversely affect your institution.

Survey results are made available in a variety of formats. A four-page *InfoBrief* and selected summary tables are published. All tables and reports are made available in various electronic formats on the Web (<http://www.nsf.gov/statistics/>). These results are also entered into the Web-Based Computer-Aided Science Policy Analysis and Research (WebCASPAR) database system. The URL for WebCASPAR is <http://caspar.nsf.gov/webcaspar>.

GENERAL INFORMATION

The data requested for the fall 2006 survey are essentially the same as those for the fall 2005 survey. When you return the survey Form 812 to your institution's survey coordinator, please keep a copy for your files. If you are returning your survey individually, please mail it to: NSF-NIH Graduate Student Survey, c/o ORC Macro, 7315 Wisconsin Avenue, Suite 400W, Bethesda, MD 20814-3202.

Please provide separate data sheets for (1) clinical psychology and (2) all other psychology departments or degree programs, due to special interest in the clinical area. Similarly, please submit separate data for degree programs in engineering, such as electrical engineering or mechanical engineering, and, likewise, separate data for degree programs in computer science and in mathematics.

If the data for 2006 vary significantly from those provided last year, please note the reasons for this change in the "Comments" sections that follow Items 5, 6 and 7, and 8.

Use only **whole** numbers, not decimals or fractions. When reporting data for Items 5, 6, 7, and 8, use headcounts, **not** full-time equivalents (FTEs).

Survey forms requiring mathematical corrections and/or verification for possible data inconsistencies are returned to departments for revision before they can be considered final. To avoid common mistakes found on the survey forms, please follow the survey instructions.

If you have any questions, please contact Jason Bauer of ORC Macro by telephone at (301) 657-3077, ext. 322. You may also contact him toll free at (866) 695-6275 or by e-mail at gss@bethesda.orcmacro.com.

Students Included in This Survey

- Count as graduate students degree-seeking persons enrolled in any S&E or health-related master's or Ph.D. program in fall 2006.
- Report M.D., D.D.S., D.O., D.P.T., D.V.M., Ed.D., or other professional degree candidates, interns, and residents in Items 5 through 7 **only** if they are concurrently working toward an S&E or health-related master's or Ph.D. degree or are enrolled in a joint medical/Ph.D. program.
- Individuals who already hold graduate or medical degrees and are working on another master's or Ph.D. degree are considered graduate students (Items 5 through 7), not postdoctorates (Item 8).
- Include S&E students performing thesis or dissertation research away from the campus (for example, at Government- and contractor-owned facilities) but in the United States, as long as they are enrolled for credit in an advanced-degree program.

Students Excluded From This Survey

Exclude students enrolled in a foreign country (at a branch or extension center) and non-matriculated students.

Students Enrolled in Multiple Departments/Institutions

A student should be reported in only **one** department. Students enrolled in interdisciplinary/interinstitutional programs should be counted only once, by their "home" department and institution.

Incomplete Data

Please write "unavailable" or "unknown" in data cells as applicable. On this form, "N/A" means "not applicable." Data cells left blank are presumed to be zeroes.

SUBMITTING YOUR DATA THROUGH THE WEB

The NSF-NIH Survey of Graduate Students and Postdoctorates in Science and Engineering continues to offer online reporting for departments. The online system allows you to upload your data via Microsoft Excel or enter your data manually online, computes totals for you, reports errors instantly, and gives you access to your previous year's data.

To access the Web survey, go to <http://www.gss2006.org>.

- Enter your departmental ID and password information (available from your school coordinator or ORC Macro).
- At the First Time User Information screen, you will be prompted to enter your name, phone number, and e-mail address.
- You will also be asked to change your assigned password to one that you choose.
- After providing this information, click on Continue to move to the Department Menu screen.

At the Department Menu screen you will notice that the questionnaire Items have been divided into four sections: Department Information, Race/Ethnicity and Gender (Items 6 and 7 on the paper survey), Mechanisms of Support (Item 5 on the paper survey), and Postdoctorates (Item 8 on the paper survey). To begin entering data, click on a submission icon.

For additional instructions on accessing the Web survey, please consult the online help documentation at <http://www.gss2006.org/gssweb/help/> or contact ORC Macro.

ITEMS 1–3: IDENTIFYING INFORMATION

Please provide the institution name, department or program name, and contact information for the person preparing this form.

ITEM 4: HIGHEST DEGREE GRANTED

Please provide the highest degree granted for the department or program.

ITEMS 1-4

NSF Form 812 Oct. 2006

NATIONAL SCIENCE FOUNDATION and NATIONAL INSTITUTES OF HEALTH
Survey of Graduate Students and Postdoctorates in Science and Engineering, Fall 2006

Form approved
OMB No. 3145-0062
Appr. Exp. 7/31/2008

Due date: January 31, 2007

DEPARTMENT OR PROGRAM DATA SHEET

IDENTIFYING INFORMATION (ITEMS 1-3)

ITEM 1. Institution name:

ITEM 2. Name of S&E department or program:

If changed since last year, please indicate previous name and whether this represents a merged, split, or expanded program:

ITEM 3. Person in department or program preparing this form:

Name: _____

Title: _____

Phone: (_____) _____

E-mail Address: _____

**Institution and
department code**

(LEAVE BLANK)

ITEM 4.

HIGHEST DEGREE GRANTED

For the purposes of this survey, departments of programs that do not offer graduate degrees (Ph.D. or master's) are considered "No Ph.D. or master's degree offered" programs, regardless of first professional or other degrees granted. "No Ph.D. or master's degree offered" programs should not report students, postdoctoral appointees, or any other individuals in Items 5, 6, and 7. Count individuals in a "No Ph.D. or master's degree offered" program only in Item 8 (see page 9) and only if they qualify as postdoctoral appointees or other non-faculty staff according to the definitions on pages 10 and 11.

Report the highest degree granted, even if there are no graduate students currently enrolled at that level. Include Ph.D. equivalents such as Sc.D. and D.Eng., but not Ed.D., M.D., or other professional degrees. Check "No Ph.D. or master's degree offered" only if your department or program does not offer a Ph.D. or master's degree and does have qualified postdoctoral appointees. Do not report persons seeking certificates or professional degrees.

What is the highest degree granted for this department or program? (CHECK ONE)

(1) Ph.D. (2) Master's (3) No Ph.D. or master's degree offered **If no Ph.D. or master's offered, do not report data in Items 5, 6, and 7. Instead, skip to Item 8 on page 9.**

If you prefer to enter your data on the Web, go to <http://www.gss2006.org>.

INSTRUCTIONS FOR ITEM 5

ITEM 5: FULL-TIME MECHANISMS OF SUPPORT

In Item 5, count only full-time degree-seeking persons enrolled in any S&E or health-related master's or Ph.D. program in fall 2006; this may include any combination of study, teaching, and research, depending on your institution's policy and definition of full-time status. For example, many institutions base full-time status on the number of credit hours taken; others calculate full-time status according to the amount of fees paid by the student.

Do not report any part-time students in Item 5. Count all part-time students in Item 6 only (see page 6).

Students receiving equal support from multiple sources or through multiple mechanisms should be reported only once. When determining the largest source of support, consider all graduate school academic expenses, including tuition, tuition remission, and stipends.

Report the total number of full-time degree-seeking persons enrolled in any S&E or health-related master's or Ph.D. program in fall 2006 on line (6), column (M). For lines (1) through (6), count each full-time student **only once** by **largest** source of support so that all columns and rows in Item 5 sum to the full-time total on line (6), column (M). The full-time total on Item 5, line (6), column (M) must equal the full-time total reported on Item 7, line (6), column (K).

Do not forget full-time, self-supported students, who should be reported in column (L). Self-supported students are supported primarily through loans, personal savings, and/or family contributions.

Mechanisms of Support—Lines (1) Through (5)

- A **fellowship**, line (1), is any competitive award (often from a national competition) made to a student that requires no work of the recipient.
- A **traineeship**, line (2), is an educational award given to a student selected by the institution.
- An **assistantship** should be classified as **research**, line (3), or **teaching**, line (4), depending on assigned duties; e.g., a student devoting most of his or her time to teaching should be reported on line (4).
- All other full-time students, including members of the Armed Forces whose tuition is paid by the Department of Defense and self-supported students, should be reported on line (5).

Federal Sources of Support—Columns (A) Through (H)

- **Department of Defense (DOD)—Column (A):** Sources include the Departments of the Army, Navy, or Air Force, as well as programs within the Office of the Secretary of Defense. Students receiving their main support from the Veterans Administration under the G.I. Bill should be reported under

column (H), "Other Federal sources."

- **Department of Health and Human Services (HHS)—Columns (B) and (C):** Report students with support from the institutes or divisions of the National Institutes of Health (NIH) under column (B); report support from all other components of HHS under column (C). Refer to the NIH organizational roster and list of other HHS administrative units, provided in the shaded box on this page.
- **National Science Foundation (NSF)—Column (D):** Report students receiving NSF graduate fellowships, as well as those supported under NSF research grants.
- **U.S. Department of Agriculture (USDA)—Column (E):** Include research assistants working on projects financed out of Hatch, McIntyre-Stennis, or Smith-Lever formula funds, competitive research grants, and institution fellowship/training grants.
- **National Aeronautics and Space Administration (NASA)—Column (F):** Report students with support from this agency.
- **Department of Energy (DOE)—Column (G):** Report students receiving support under DOE research grants, including those supported by grants at national laboratories.
- **Other Federal sources—Column (H):** Report students receiving support from Federal agencies other than those listed in columns (A) through (G), such as the Fulbright program, the G.I. Bill, and Department of Education programs. Students primarily supported by Federal loans should be reported in column (L), "Self-supported students."

Non-Federal Sources of Support—Columns (I) Through (L)

- **Institutional support—Column (I):** Report students supported by YOUR institution, including those receiving tuition waivers. State and local government support should also be reported in this column. Students primarily supported with funds from the Federal Government (e.g., training grants), however, should be reported under the appropriate Federal agency.
- **Foreign sources—Column (J):** Report students supported by any non-U.S. source, such as foreign governments, industrial firms, or specialized agencies of the United Nations.
- **Other U.S. sources—Column (K):** Report students supported by nonprofit institutions, private industry, and all other non-Federal U.S. sources not included in columns (I) or (J).
- **Self-supported students—Column (L):** Report both foreign and U.S. citizen students whose largest source of support comes from ANY loans (including Federal loans) or from personal or family financial contributions. **These students must be included in the full-time total, line (6), column (M).**

Full-Time Women—Line (7)

Report all full-time female students by source of primary support. The total number of full-time women should be reported on line (7), column (M). In each column, data on line (7) should not exceed the total on line (6).

The total number of full-time women on Item 5, line (7), column (M) must match the total number of full-time women on Item 7, line (5), column (K).

DEFINITION OF TERMS USED IN ITEM 5

NIH ORGANIZATIONAL ROSTER—Item 5, column (B)

Fogarty International Center
 National Cancer Institute
 National Center for Human Genome Research
 National Center for Nursing Research
 National Center for Research Resources
 National Eye Institute
 National Heart, Lung, and Blood Institute
 National Institute of Allergy and Infectious Diseases
 National Institute of Arthritis and Musculoskeletal and Skin Diseases
 National Institute of Child Health and Human Development
 National Institute of Dental Research
 National Institute of Diabetes and Digestive and Kidney Diseases
 National Institute of Environmental Health Sciences
 National Institute of General Medical Sciences
 National Institute of Mental Health
 National Institute of Neurological Disorders and Stroke
 National Institute on Aging
 National Institute on Alcohol Abuse and Alcoholism
 National Institute on Deafness and Other Communication Disorders
 National Institute on Drug Abuse
 National Library of Medicine

OTHER HHS ADMINISTRATIVE UNITS—Item 5, column (C)

Centers for Disease Control and Prevention
 National Institute for Occupational Safety and Health
 Food and Drug Administration
 Health Resources and Services Administration
 Substance Abuse and Mental Health Services Administration
 (Please note that the former Alcohol, Drug Abuse, and Mental Health Administration institutes are now part of NIH.)

ITEM 5

NOTE: Report all data on a headcount basis (use whole numbers, *not* fractions, decimals, FTEs, etc.). If your department does not enroll graduate students, please go to Item 8 on page 9.

ITEM 5. MECHANISMS OF SUPPORT		FULL-TIME GRADUATE STUDENTS RECEIVING FINANCIAL ASSISTANCE											SELF-SUPPORTED STUDENTS (including loans and family sources) (L)	TOTAL FULL-TIME GRADUATE ENROLLMENT (Sum of (A) through (L)) (M)
		FEDERAL SOURCES (excluding loans)								NON-FEDERAL SOURCES				
		Department of Defense (A)	HHS		National Science Foundation (D)	Department of Agriculture (E)	NASA (F)	Department of Energy (G)	Other Federal sources (H)	Institutional support (including State and local government) (I)	Foreign sources (J)	Other U.S. sources (K)		
			National Institutes of Health (B)	Other HHS (C)										
Line														
(1)	Graduate Fellowships													
(2)	Graduate Traineeships													
(3)	Graduate Research Assistantships													
(4)	Graduate Teaching Assistantships													
(5)	Other Types of Support													
(6)	FULL-TIME TOTAL¹													
(7)	Of the students on line (6), how many in each data cell are WOMEN? ²													

¹ The total from line (6) should be inserted on Item 7, line (6), column (K) on page 7.

² The total from line (7) should be inserted on Item 7, line (5), column (K) on page 7.

List other Federal sources (agencies) from Item 5, column (H) and the number of full-time students supported by each:

Please explain variances from the previous year's data for Item 5 or include other comments below:

INSTRUCTIONS FOR ITEMS 6 AND 7

ITEMS 6 AND 7: CITIZENSHIP AND RACIAL/ETHNIC BACKGROUND OF U.S. CITIZENS AND PERMANENT RESIDENTS

Report all U.S. citizens and permanent residents in columns (A) through (I), and count each student only once according to his or her racial/ethnic category as defined by the Office of Management and Budget (OMB). (OMB racial/ethnic categories are provided in the shaded box on this page.) In Items 6 and 7, column (C), count only U.S. citizens and permanent residents. Do not count Asian foreign nationals.

Count foreign students, i.e., students who are in this country on temporary visas, only **once** in column (J), regardless of race/ethnicity. **Students who are native residents of a U.S. possession or are permanent residents holding green cards should be included under U.S. citizens and permanent residents.**

Please record under the One Race Only: Non-Hispanic/Latino header, columns (A) through (E), those U.S. citizen or permanent resident students who have reported themselves in only one of the following categories: non-Hispanic Black/African American, non-Hispanic American Indian or Alaska Native, non-Hispanic Asian, non-Hispanic Native Hawaiian/Other Pacific Islander, or non-Hispanic White.

Under the header One Race Only: Hispanic/Latino, column (F), please record those U.S. citizens and permanent residents who have reported themselves as Hispanic/Latino and reported either no race or only one race (Black/African American, American Indian or Alaska Native, Asian, Native Hawaiian/Other Pacific Islander, or White).

If you allow students to report multiple races and they are U.S. citizens or permanent residents, please record them in columns (G) and (H). If students have reported themselves as Hispanic/Latino and in two or more of the racial categories, please

record them in column (G), More Than One Race Reported, Hispanic/Latino. Students who are non-Hispanic/Latino but reported in two or more racial categories should be recorded in column (H), More Than One Race Reported, non-Hispanic/Latino.

Record students who are U.S. citizens or permanent residents but have an unknown race or ethnicity in column (I).

Finally, record all students who are on temporary visas in column (J), regardless of their race or ethnicity.

ITEM 6: PART-TIME STUDENTS

Part-Time Men, Women, and Total—Lines (1) Through (3)

For Item 6, report ALL part-time students, regardless of their source of support. Part-time students are pursuing an S&E or health-related graduate degree but NOT on a full-time schedule. Consider students part time according to your institution's definition of part-time status.

ITEM 7: FULL-TIME STUDENTS

Full-Time Total—Line (6)

Total full-time enrollment reported on Item 7, line (6) should match that reported on Item 5, line (6).

First-Time Full-Time Students—Line (7)

A first-time student is one who has enrolled for credit at the INSTITUTION at which he or she is pursuing a degree for the first time at the beginning of the fall 2006 term. All other students should be considered to be beyond their first time of enrollment. The total number of first-time, full-time students on Item 7, line (7), column (K) should not be greater than the full-time total reported on Item 7, line (6), column (K).

First-Time Full-Time Women—Line (8)

The total number of first-time, full-time women reported on Item 7, line (8) should not be greater than the total for full-time women reported on Item 7, line (5), column (K).

DEFINITION OF TERMS USED IN ITEMS 6 AND 7

RACIAL/ETHNIC CATEGORIES FOR U.S. CITIZENS AND PERMANENT RESIDENTS, AS DEFINED BY OMB—Items 6 and 7

Black or African American: A person having origins in any of the black racial groups of Africa

American Indian or Alaska Native: A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment

Asian: A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent; for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Samoa, Thailand, and Vietnam

Native Hawaiian or Other Pacific Islander: A person having origins in any of the original peoples of Hawaii, Guam, or other Pacific islands

White: A person having origins in any of the original peoples of Europe, the Middle East, or North Africa

Hispanic or Latino: A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race

More Than One Race Reported: Students reporting two or more of the race/ethnicity categories listed above

ITEMS 6 AND 7

NOTE: Report all data on a headcount basis (use whole numbers, *not* fractions, decimals, FTEs, etc.). If your department does not enroll graduate students, please go to Item 8 on page 9.

ITEM 6. RACE/ ETHNICITY of PART- TIME graduate students in fall 2006, by sex	How many students belong to the following RACIAL/ETHNIC categories? In each line, count each student only once.		U.S. CITIZENS AND PERMANENT RESIDENTS									FOREIGN	TOTAL (Sum of (A) through (J)) (K)
			ONE RACE ONLY: Non-Hispanic/Latino					ONE RACE ONLY	MORE THAN ONE RACE		Unknown or did not state	Temporary visa holders	
			Black/ African American (A)	American Indian or Alaska Native (B)	Asian (C)	Native Hawaiian/ Pacific Islander (D)	White (E)	Hispanic/ Latino (F)	Hispanic/ Latino (G)	Non- Hispanic/ Latino (H)			
MEN ENROLLED PART TIME	(1)												
WOMEN ENROLLED PART TIME	(2)												
PART TIME, TOTAL	(3)												

ITEM 7.	MEN ENROLLED FULL TIME	(4)											
RACE/ ETHNICITY of FULL- TIME (Item 5) graduate students in fall 2006, by sex	WOMEN ENROLLED FULL TIME (Column (K) should equal Item 5, line (7), column (M) on page 5.)	(5)											
	FULL TIME, TOTAL (Column (K) should equal Item 5, line (6), column (M) on page 5.)	(6)											
	Of the full-time students on line (6), how many are FIRST TIME?	(7)											
	Of the first-time students on line (7), how many are WOMEN?	(8)											

Please explain variances from the previous year's data for Items 6 and 7 or include other comments below:

INSTRUCTIONS FOR ITEMS 8 and 9

ITEM 8. POSTDOCTORATES AND NON-FACULTY RESEARCH STAFF WITH DOCTORATES

Postdoctorates—Columns (A) Through (F)

Include all postdoctorates in S&E and health-related fields receiving research training through the department or program.

Use the following criteria to determine postdoctorate status:

- The appointee holds a Ph.D. or equivalent doctorate (e.g., Sc.D., M.D., D.D.S., D.O., D.V.M., or foreign degrees equivalent to U.S. doctorates).
- The doctorate was awarded recently, generally within the last 5 years.
- The appointment is for a limited term, the limit generally being 5–7 years.
- The appointment is primarily for the purpose of training in research or scholarship.
- The appointee works under the supervision of a senior scholar in a department or research unit affiliated with the university.

These postdoctorates may have different titles—do not include clinical fellows and those with appointments in residency training programs in medical and health professions unless research training under the supervision of a senior mentor is the primary purpose of the appointment.

Report postdoctorates by source of support in columns (A) through (D), with the total number of postdoctorates reported in column (E). Of this total, report the number who are foreign in column (F).

Foreign Postdoctorates—Column (F)

Include all postdoctorates who are in this country on temporary visas. Postdoctorates who are native residents of a U.S. possession or are permanent residents holding green cards should be included under U.S. citizens and permanent residents.

If you included postdoctorates who are part of your department or program but work in interdisciplinary research centers or other organized research units outside of the department or program,

please provide the names of those research centers or units in the space provided.

Other Non-Faculty Research Staff With Doctorates—Column (G)

Include all doctoral scientists and engineers who are involved principally in research activities but are not considered either postdoctoral appointees or members of the regular faculty. On line (2), report the number of women in each category. On line (3), report those postdoctorates and non-faculty research staff who hold first professional degrees in medical and related fields (M.D., D.D.S., D.O., or D.V.M.). Please note that in each column, data on lines (2) and (3) should not exceed the total on line (1).

ITEM 9: RESPONSE BURDEN

Please provide the number of person-hours required to complete this form. The average time required for questionnaire completion is 2 hours. Response burden comments should be directed to Suzanne Plimpton of NSF at (703) 292-7556.

ITEMS 8 AND 9

NOTE: Report all data on a headcount basis (use whole numbers, *not* fractions, decimals, FTEs, etc.).

ITEM 8. NUMBER OF POSTDOCTORATES AND NON-FACULTY RESEARCH STAFF WITH DOCTORATES IN S&E AND HEALTH-RELATED FIELDS in fall 2006		POSTDOCTORATES						Other non-faculty research staff with doctorates	
		SOURCE OF SUPPORT				TOTAL for all sources (A) through (D)	Of the total in (E), how many are FOREIGN?		(G)
		FEDERAL			NON-FEDERAL				
		Fellowships (A)	Traineeships (B)	Research grants (C)		(D)			
TOTAL	(1)								
Of the total in each cell of line (1), how many are WOMEN?	(2)								
Of the total in each cell of line (1), how many hold an M.D., D.O., D.D.S., or D.V.M. degree?	(3)								

If you included postdoctorates who are part of your department or program but work in interdisciplinary research centers or other organized research units outside of the department or program, please provide the names of those research centers or units below:

Please explain variances from the previous year's data for Item 8 or include other comments below:

ITEM 9. RESPONSE BURDEN: Approximately how many person-hours were required to complete this form?	
--	--

**UPON COMPLETING THIS FORM, PLEASE RETURN IT TO YOUR SURVEY
COORDINATOR FOR TRANSMITTAL BY
JANUARY 31, 2007.**

GLOSSARY OF TERMS

Assistantship, Research (Item 5)—A research assistantship is a financial award given to a graduate student who is assigned primarily to research assistant activities.

Assistantship, Teaching (Item 5)—A teaching assistantship is a financial award given to a graduate student who is assigned primarily to teaching assistant activities.

Degree Level (Item 4)—Degree level refers to the type of graduate degree granted by each department or program. Survey respondents may select: “Ph.D.,” “Master’s,” or “No Ph.D. or master’s degree offered” (i.e., a non-degree program). Ph.D. equivalent degrees such as Sc.D. and D.Eng. are also included, but Ed.D., M.D., and other professional degrees are not.

Federal Sources of Support (Item 5)—Federal sources of support consist of all agencies, offices, and departments of the U.S. Federal Government, including the Department of Defense, the Department of Energy, the National Institutes of Health, the Department of Health and Human Services, NSF, the U.S. Department of Agriculture, and the National Aeronautics and Space Administration, as well as all other Federal entities.

Students whose primary source of support comes from federally guaranteed student loans are not considered to be federally supported, but are instead counted as self-supported in the graduate student survey.

Fellowship (Item 5)—A fellowship is any competitive award (often from a national competition) given to a student that requires no work of the recipient. See **Traineeship** for more information.

First-Time Full-Time Graduate Student (Item 7)—First-time full-time graduate students are those students who are enrolled for credit at the institution at which they are pursuing a degree for the first time at the beginning of the fall term. All other students should be considered to be beyond their first time of enrollment.

Foreign Sources of Support (Item 5)—Foreign sources of support are any non-U.S. funding sources, such as foreign governments, industrial firms, or specialized agencies of the United Nations.

Foreign Students and U.S. Citizens (Items 6 and 7)—For the purposes of the graduate student survey, a student holding a temporary visa is counted as “foreign,” regardless of his or her race/ethnicity. U.S. citizens and permanent residents are reported according to their racial/ethnic category as defined by the U.S. Census Bureau. The definition of U.S. citizens and permanent residents includes native residents of a U.S. possession and applicants for U.S. citizenship holding green cards. See **Race/Ethnicity** for more information.

Full-Time Graduate Student (Items 5 and 7)—A graduate student is classified as full time according to each individual institution’s policy on and definition of full-time status and may include any combination of study, teaching, and research. For example, many institutions base full-time status on the number of credit hours taken; others calculate full-time status according to the amount of fees paid by the student.

Highest Degree Granted (Item 4)—Highest degree granted refers to the highest degree granted in the surveyed department or program. Survey respondents may select: “Ph.D.,” “Master’s,” or “No Ph.D. or master’s degree offered.” See **Non-Degree Program** for more information.

Institutional Support (Item 5)—Students with institutional support receive their largest source of financial support through institutional funds. This category includes students receiving tuition waivers. State and local government support is also reported as institutional support.

Non-Degree Program (Item 4)—For the purposes of the graduate student survey, departments or programs that do not offer graduate degrees (i.e., master’s or Ph.D.) are considered non-degree programs, even if they grant a first professional doctorate. Non-degree programs should report only postdoctoral appointees and non-faculty research staff with doctorates.

Other Non-Faculty Research Staff With Doctorates (Item 8)—This category includes all doctorate-holding scientists and engineers who are involved principally in science and engineering or health-related research activities, but who are not considered either postdoctoral appointees or members of the regular faculty.

Other U.S. Sources of Support (Item 5)—This category includes support by industrial firms, nonprofit institutions (e.g., independent research institutes, professional societies, philanthropic foundations), and all other sources of support originating within the United States. It does not, however, include loans, family money, personal savings used by students supporting themselves, or Federal or institutional sources of support. Students supported primarily by foreign industrial firms, as well as by foreign governments, are reported under foreign sources of support.

Part-Time Graduate Student (Item 6)—Part-time graduate students pursue a science and engineering or health-related graduate degree, but not on a full-time schedule, as defined by the institution. They are reported as part time based on each individual institution’s definition of part-time status.

Postdoctorate (Item 8)—Postdoctorates are individuals who have science and engineering or health-related Ph.D.’s, M.D.’s, D.O.’s, D.D.S.’s, or D.V.M.’s (including foreign degrees equivalent to U.S. doctorates) and devote their primary effort to their own research training through research activities or study in the department, under temporary appointments carrying no academic rank. These individuals may contribute to the academic program through seminars or lectures or by working with graduate students. They are not graduate students.

Primary Source of Support (Item 5)—Students are reported only once by their largest or primary source of support for the fall semester. If a student is supported by multiple sources, he or she is not counted separately for each source but is instead counted only once by the largest source of support.

Race/Ethnicity (Items 6 and 7)—The Office of Management and Budget definitions of race/ethnicity used in the graduate student survey are as follows:

- Black or African American—A person having origins in any of the black racial groups of Africa
- American Indian or Alaska Native—A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment
- Asian—A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Samoa, Thailand, and Vietnam
- Native Hawaiian or Other Pacific Islander—A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands
- White—A person having origins in any of the original peoples of Europe, the Middle East, or North Africa
- Hispanic—A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race
- More Than One Race Reported—Students reporting two or more of the race/ethnicity categories listed above

See **Foreign Students and U.S. Citizens** for more information.

Self-Supported Student (Item 5)—Self-supported students are those whose largest source of support comes from loans (including Federal loans) or from personal or family financial contributions.

Traineeship (Item 5)—A traineeship is an educational award given to a student selected by the institution. See **Fellowship** for more information.

THANK YOU

Please return completed questionnaires by January 31, 2007, to:

NSF-NIH Graduate Student Survey
c/o ORC Macro
7315 Wisconsin Avenue, Suite 400W
Bethesda, MD 20814-3202

Or submit them via the graduate student survey Web system at:

Survey of Graduate Students and Postdoctorates in Science and Engineering
2006 CROSSWALK BETWEEN NSF DISCIPLINE CODES AND
THE 1990 NCES CLASSIFICATION OF INSTRUCTIONAL PROGRAMS

The following set of discipline codes categorizes the science and engineering departments or programs in the Survey of Graduate Students and Postdoctorates in Science and Engineering. Representative department names are shown under each of the discipline codes.

ENGINEERING

- 101 AEROSPACE ENGINEERING**
14.02 AEROSPACE, AERONAUTICAL, AND ASTRONAUTICAL ENGR.
- 102 AGRICULTURAL ENGINEERING**
14.03 AGRICULTURAL ENGINEERING
- 103 BIOMEDICAL ENGINEERING**
14.05 BIOENGINEERING AND BIOMEDICAL ENGINEERING
- 104 CHEMICAL ENGINEERING**
03.0509 WOOD SCIENCE
14.07 CHEMICAL ENGINEERING
14.32 POLYMER/PLASTICS ENGINEERING
- 105 CIVIL ENGINEERING**
04.02 ARCHITECTURE
14.04 ARCHITECTURAL ENGINEERING
14.08 CIVIL ENGINEERING
14.0803 STRUCTURAL ENGINEERING
14.0805 WATER RESOURCES ENGINEERING
14.14 ENVIRONMENTAL/ENVIRONMENTAL HEALTH ENGINEERING
- 106 ELECTRICAL ENGINEERING**
14.09 COMPUTER ENGINEERING
14.10 ELECTRICAL, ELECTRONICS, AND COMMUNICATIONS ENGR.
- 107 ENGINEERING SCIENCE AND ENGINEERING PHYSICS**
14.12 ENGINEERING PHYSICS
14.13 ENGINEERING SCIENCE
- 108 INDUSTRIAL/MANUFACTURING ENGINEERING**
14.17 INDUSTRIAL/MANUFACTURING ENGINEERING
14.27 SYSTEMS ENGINEERING
14.30 ENGINEERING/INDUSTRIAL MANAGEMENT
30.06 SYSTEMS SCIENCE
- 109 MECHANICAL ENGINEERING**
14.11 ENGINEERING MECHANICS
14.19 MECHANICAL ENGINEERING
- 110 METALLURGICAL AND MATERIALS ENGINEERING**
14.06 CERAMIC SCIENCES AND ENGINEERING
14.18 MATERIALS ENGINEERING
14.20 METALLURGICAL ENGINEERING
14.28 TEXTILE SCIENCES AND ENGINEERING
14.31 MATERIALS SCIENCE
40.0701 METALLURGY
- 111 MINING ENGINEERING**
14.15 GEOLOGICAL ENGINEERING
14.16 GEOPHYSICAL ENGINEERING
14.21 MINING AND MINERAL ENGINEERING
- 112 NUCLEAR ENGINEERING**
14.23 NUCLEAR ENGINEERING
- 113 PETROLEUM ENGINEERING**
14.25 PETROLEUM ENGINEERING
- 114 ENGINEERING, N.E.C.**
14.01 ENGINEERING, GENERAL
14.22 NAVAL ARCHITECTURE AND MARINE ENGINEERING
14.24 OCEAN ENGINEERING
