Subject: Criteria Revision

Ms. Zachery, -

In the Energy Star cover letter dated August 6, 2008, bullet 6: -

(6) Products must meet a new insulating glass unit (IGU) certification requirement relying on the anticipated National Fenestration Rating Council's IGU certification requirement.

NFRC has decided to give the industry 2 years to implement the IGU certification requirements. I recommend that this requirement be a part of the Phase 2 requirements.
