# Terms & Conditions

## Terms of Sale

All prices listed are FOB Destination unless otherwise requested and noted.

Billing is Net 30 days on all products. All other services rendered are subject to payment at completion of each phase, when signed off by the customer. All prices are subject to annual review for adjustments. All custom and non-standard products are subject to a customer letter of intent too purchase in good faith, in lieu of a deposit.

Glossary of Terms used within this price list are as follows:

**COM** - Customer's own material, customer purchased and supplied to UNICOR/FPI.

**COL** - Customer's own leather, customer purchased and supplied to UNICOR/FPI.

**Due Date** - Date required for product to be at customer site, installation to begin.

**Order Acknowledgment** - Written confirmation of acceptance of order, containing the following information: work order number/purchase order number, project manager name and invoicing information.

**Receipt of Order** - Date UNICOR/FPI receives the order.

**Ship Date** - Date product ships from UNICOR/FPI factory.

## Sales Policy

Products sold through this catalog are intended for federal government customers and their designer, and must be procured with federal funds.

## Order Acknowledgment

UNICOR/FPI accepts orders, manufactures products, provides installation services and invoices based on the customer's request. The written order confirmation is verification and confirmation that requirements have been correctly translated to a sales order. An acknowledgment will be provided in writing, by fax or e-mail. If there is any information discrepancy in your order acknowledgment, please advise us immediately to avoid any mis-communication or problems. Communications should be directed to the assigned project manager listed on your order acknowledgment. Your order will be invoiced based on your request. Standard process is for product to be billed when it ships and the services are billed after confirmation of acceptance from the customer. Requests for billing, other than through the standard method, must be identified on the customer purchase order.

Your order acknowledgment indicates a date when your product is scheduled to arrive. In the event your order is manufactured earlier than scheduled, we will contact you with the option of providing an early shipment authorization. This will be coordinated through the project manager.

## Order Modifications

Modification to your purchase order will be accepted up to two weeks prior to the due date indicated on your order acknowledgment.

However, any modification made after production has begun, which changes the due date, product requested, or quantity requested will be subject to additional charges. For example, a delay in the delivery date could result in storage charges, a change in the quantity may result in a new ship date, or cancellation after the order is in production is subject to restocking fees. All purchase order modifications will be acknowledged in writing, including the annotation of any adjusted delivery dates and/or charges. UNICOR will assist the customer in obtaining storage for their product if delays in receipt are necessary. Product will not be stored at the UNICOR locations beyond 15 days, all storage will be arranged by our installation vendors or at the customer location.

## Standard Lead Time

Typical lead time for products with this price list is 45 days ARO (after receipt of order). Orders which include custom items, e.g., COM, COL or special fabrics may require a longer manufacturing cycle. The extended date will be reflected on your order acknowledgment. The project manager, listed on your order acknowledgment, will gladly discuss your options with you.

## Product Delivery and Pricing

All pricing listed in this publication is FOB Destination, CONUS (Continental United States) only, unless otherwise noted. Freight charges are included in the product price as listed in the FOB Destination column. FOB Origin pricing is available upon written request through, the UNICOR/FPI Customer Service Center.

On FOB Destination orders, the ownership responsibility passes to the customer at the time the product is accepted at the designated off-load point. Responsibility for inside delivery passes to the customer at final placement, or as specified in writing by the project manager.

On FOB Origin orders, UNICOR/FPI can arrange a coordinated delivery with the carrier of your choice. If no carrier is specified at time of order, it will be shipped common carrier, using our contract carrier at your expense. Freight charges will be added to your invoice.

Services, such as space planning, storage, inside delivery and installation are available at competitive prices. UNICOR/FPI offers both fee for service and negotiated pricing tailored to each project. Contact your sales representative or project manager to discuss these services.

**Special Note:** On shipments "Out of CONUS", FOB Destination orders, shipments are prepaid to the designated point of debarkation. Freight and handling charges beyond the point of debarkation are the responsibility of the local purchasing/ governing agency, unless other arrangements are made with the project manager. The freight charges for deliveries out of CONUS, including Alaska and Hawaii, will be negotiated and quoted at competitive freight rates, at time of shipment.

## Packaging of Product

UNICOR/FPI products are packaged to comply with carrier requirements to insure that products arrive in excellent condition. UNICOR/FPI can accommodate special packaging requests, special identification markings and special delivery instructions. Normally, this a fee-for-service option. Contact your project manager to discuss options.

## Direct Shipment Claims

UNICOR/FPI products are inspected and packaged to comply with shipping carrier requirements prior to leaving the manufacturing site. All shipments need to be inspected by the consignee, before acceptance. At the time of acceptance, any visible damage or shortage of items must be recorded with the freight carrier and reported to the UNICOR/FPI project manager immediately. Claims for visual shipping damage and/or shortage must be filed within 12 days of receipt of product. This applies to both FOB Destination and Origin shipments.

UNICOR/FPI reserves the right to use contracted carriers or commercial carriers for "best method" shipments. Any other shipping requirements must be negotiated with the project manager prior to shipping.

## Concealed Damage Claims

By utilizing improved packaging and handling, UNICOR/FPI takes great care to avoid concealed damages. UNICOR/FPI recommends inspection of all products within 12 days of delivery for both FOB Destination and Origin shipments, in order to insure prompt shipment of a replacement, and determination of liability.

## Product Storage

UNICOR/FPI will provide free storage for up to 15 calendar days from original ship date. However, if additional time is needed, UNICOR/FPI can arrange for storage at current rates. Discuss the options with your project manager.

## Customer Delayed Deliveries

UNICOR/FPI will accommodate requests to delay your order if we are notified two weeks before the product is scheduled to ship. The request for delay must be made as soon as possible. Contact your project manager to discuss date changes. If product is already in production at the time of delay notification, storage arrangements must be coordinated through your project manager. If product is en route, in most cases the product can be diverted to a storage location designated by the customer, or UNICOR/FPI can arrange storage at an additional cost. Costs usually include loading and unloading of product, plus any warehousing/storage cost. Order modifications are required when additional costs are incurred and are invoiced to you on your order.

## Product Returns

Any product returns must be negotiated with the project manager. The terms and conditions will be evaluated on a case by case basis through negotiation with the project manager. UNICOR/FPI reserves the right to inspect the returned product and evaluate the resale value of the product when considering a credit or exchange.

## Product Order Status

Order status can be verified by:

- (1) Contacting your project manager (name and phone number are listed on your order acknowledgment).
- (2) Making an inquiry at [www.unicor.gov/customer/index.htm](http://www.unicor.gov/customer/index.htm) - Enter your work order/purchase order number, for a shipping status report for your order. Credit card order delivery status can be verified by logging the last name of the card holder in the purchase order number box.

Shipped orders will be identified by a tracking number in response to your inquiry. If a tracking number is not reported, contact the project manager for a current status report.

**Invoice Payments**

All general billing questions should be directed to UNICOR/FPI Customer Service Center, in writing to the following address:

FPI - LEX  
Accounts Receivable  
P.O. Box 11670  
Lexington, KY 40583-3640 or  
email: \_\_\_\_\_  
Phone: \_\_\_\_\_

Send Payments from government agencies to the following address:

FPI - FPI  
P.O. Box 371736  
Pittsburgh, PA 15252-7736

Send Payments from sources other than government agencies to the following address:

FPI - LEX  
Accounts Receivable  
P.O. Box 11670  
Lexington, KY 40583-3640

**Product Warranty**

UNICOR/FPI guarantees all product to meet or exceed the standard commercial life expectancy of the product. UNICOR/FPI will repair or replace any defective product promptly, during the life expectancy of that product. UNICOR/FPI does warranty all product to be free of defects in material and workmanship. This does not apply to any C.O.M. or C.O.L. fabrics supplied by sources other than UNICOR/FPI.

**C.O.M. Fabric Requirements**

All fabric or upholsteries must be approved prior to acceptance of an order. Upon approval, a memo sample swatch must accompany the order. UNICOR/FPI assumes no responsibility for wear or defects of performance of any C.O.M. or C.O.L. supplied by sources other than FPI.

Use of C.O.M. as panel fabrics require UL approval and must be tested for approval prior to acceptance of an order. UNICOR/FPI will require three yards of the actual panel fabric to be tested prior to quoting.

All C.O.M. fabric or upholstery must be received in continuous linear yards. UNICOR/FPI requires a 5 to 10% overage clause to insure appropriate amount of coverage.

**C.O.M. Material Acceptance**

UNICOR/FPI reserves the right to reject C.O.M. fabrics or upholstery that are not suitable for the intended application. Customer selecting any C.O.M. or C.O.L. takes responsibility of performance of the supplied product.

**Standard Product Overview**

Bravo is a freestanding desk system. Several combinations of shapes and sizes are offered to allow for an almost infinite amount of layouts. Shapes range from rectangles to piano shapes to various conference ends. Since the system is freestanding it allows for easy changes to meet the users needs.

Bravo was designed with power and data needs in mind. Power and data can be hidden above or below the desk to maintain the clean look of the end user's office. All desks have grommets. Wire troughs and cord dumps keep cables organized and out of the way. Stanchions that can support overhead units also house electrical and data receptacles. An optional wire trough system can be installed on the back face of the desks when situations warrant it.

Bravo easily integrates with other UNICOR/FPI systems. Classic XXI or Crescendo brackets can be added to the desks to allow them to support those panel systems. Power from either of these panel systems and Bravo can be easily connected when the systems are integrated. This makes future changes and additions easier to manage.

Bravo offers several options on almost every desk. All desks offer a standard modesty panel but an optional panel can be added that gives the desk a full modesty configuration. Privacy screens are available for sit-down privacy or stand-up privacy. A stackable privacy panel is also offered for environments that change occasionally. Screens can be ordered in a variety of materials to include fabrics and translucent plastic. Tool rails provide for paper and accessory management. Workstation end panels can be ordered in shorter lengths to allow for increased leg clearance.

Bravo is offered in numerous painted colors, with a wide array of laminate selections available.

# Technical Specifications

## ANSI/BIFMA

Bravo meets or exceeds the required ANSI/BIFMA X5.5-1998 desk systems test.

## Quality

All Bravo desking components shall originate from ISO 9000, ISO 9001, or ISO 9002 registered facilities.

## UL Listed

Bravo desks are listed to applicable UL standards and requirements by Underwriters Laboratories Inc. Two of the standards used to evaluate Bravo desks are UL 1286 Office Furnishing and UL 723 Standard Test for Surface Burning Characteristics of Building Materials.

## Basic Worksurfaces

Worksurfaces shall define the shape of the workstation and provide support for overhead storage, hanging pedestals, electrical componentry, and privacy screens. Worksurfaces shall be designed to integrate function and ergonomics to provide solutions that meet ANSI/HFS-100-1998 and ADA user requirements.

## Rectangular Worksurfaces

Worksurface tops shall be 1 1/8" high density particleboard with .03 or .04 high pressure laminate surface and .02 to .04 phenolic backing sheet, available in a choice of over 30 colors. Top shall be available with a flat PVC edge in a choice of 5 edge colors. Worksurfaces shall be available in 24", 30", 36", 42", 48", 54", 60" and 72" widths and 24" and 30" depths. They shall be available in a 29" height.

Basic Rectangular worksurfaces shall include 2 triangular worksurface grommets, located in the back corners of each worksurface. 60" and 72" worksurfaces shall have 3 triangular wireway grommets, two in the corners and one located near the back center of the desk. Grommets shall be color matched to the worksurface edge color. The legs shall have (4) 3.27" x 2.27" wire management ports located in the top and bottom outside edge of each back corner. Worksurface and leg grommets will be molded from polycarbonate.

Leg Assembly - Each leg assembly consists of welded and assembled components which come together to form the full leg assembly. The leg assembly is attached to the underside of the worksurfaces from above. A metal leg cover can be removed from the front of the leg to gain entry to the interior of the leg. Within the leg, there is a metal structural support that can be used to separate power and data running within the leg. A glide is attached to the bottom of the leg for up to 1 1/8" of adjustability. The desk leg - Formed of 18-gage steel, overall dimensions are 6.00 x 6.00 x 27.25.

Modesty Panel Beam - Formed of 18-gage steel, overall dimensions are 3.00 x 9.00 x length determined by size of worksurface. The modesty panel beam is attached to the underside of the worksurface and the leg assembly. The modesty panel beam allows basic cabling to be run along the width of the desk. Plastic worksurface spacers that provide a slight stand off distance between the worksurface and modesty panel beam shall snap into place to aid installation.

Data Modesty Panel Bracket - A steel bracket shall be available that will attach to the underside of the modesty panel beam near the worksurface. It will have a 1.38" x 2.70" opening to accept several different manufacturers' power and data faceplates.

Lower Modesty Panel - Optional. Formed of 18-gage steel, overall dimensions are 1.00 x 18.00 x length determined by size of worksurface. The lower modesty panel is attached to the leg assembly and will complete the full enclosure of the back of the desk.

Finish for all metal parts shall be made available in over 12 standard enamel colors unless specified.

End Panel Assembly - Each end panel consists of welded and assembled components which come together to form the full end panel assembly. The end panel is formed of 18-gage steel and has a honeycomb core for strength and noise reduction. Overall dimensions are 1.25 x 27.00 x depth determined by worksurface size or configuration. The depth is available in three sizes based on the depth of the worksurface (24" or 30") and whether or not a transitional or full end panel configuration is desired. The end panel assembly is attached to the underside of the worksurface and the leg assembly. A glide is attached to the bottom of the end panel for up to 1 1/8" adjustability.

## Rectangular Reduction Worksurface

Rectangular reduction worksurfaces shall have the same basic construction as the rectangular worksurfaces. These worksurfaces shall have a depth of 24" on one end and 30" on the opposite end. The reduction shall be accomplished with two gently curving (12" radius) arcs that change direction halfway into the width of the worksurface. Widths of 24" to 72" in 6" increments will be available.

## Executive Worksurface

Executive worksurfaces shall have the same basic construction as the rectangular worksurfaces. These worksurfaces shall have a depth of 24" or 30" with a radius edge on the back of the worksurface. The radius edge shall extend a maximum of 6" beyond the normal depth. A right and left back corner grommet will be standard. Widths available will be 60", 66", and 72".

## Corner Worksurface

Corner worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional leg assembly, modesty panel beam, and optional lower modesty panel. In freestanding applications, standard end panels must be used. If attached to another worksurface, transitional end panels may be ordered to replace standard end panels for the sides of the attachment on both worksurfaces. Transitional legs shall be available that allow additional clearance. The front working edge will have a 16" or 22" radius depending on the size of the worksurface. Depths of 24" and 30" and widths of 48" to 72" will be standard (54" width is not available). Two different widths may be used to create what is known as a square shoe desk. One side is always 48". Fifteen different combinations of sizes will be available. Three grommets, one per corner, are standard. Whenever a width is 60" or 72", a grommet will be added approximately midway of that width.

## P-Shaped and Piano Shaped Worksurfaces

P-shaped and piano shaped worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional 4" support leg and standard modesty panel. The support leg shall be attached towards the rounded front end of the worksurface. The tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1 1/8" adjustable steel glide. In freestanding applications, standard end panels must be used. If attached to another worksurface, transitional end panels may be ordered to replace standard end panels for the sides of the attachment on both worksurfaces. The front working edge will have a 16" or 22" radius depending on the size of the worksurface. Depths of 60" and 72" and widths of 48" will be standard. Fifteen different combinations of sizes will be available. Two grommets, one per corner, are standard.

## D-Shaped Worksurface

D-shaped worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional 4" support leg and standard modesty panel. The support leg shall be attached towards the rounded front end of the worksurface. The tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1 1/8" adjustable steel glide. The width of the top shall be 24", 30", or 36". The depth shall be available in a range from 48" to 72".

## Round Add-On Worksurface

Round add-on worksurfaces shall be available with the same edge treatments as the rectangular

worksurfaces. They shall be available in a diameter of 36" and 42". The 36" diameter round add-on will have a flat edge of 24" and the 42" round add-on will have a flat edge of 30". The single tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1 1/8" adjustable steel glide. A pair of steel splice plates will be included to attach the round add-on to a pair of worksurfaces.

## 1/2 Round Add-On Worksurface

1/2 round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They shall be available in a diameter of 48" and 60". The 48" diameter 1/2 round add-on will have one flat edge of 48" and the 60" round add-on will have one flat edge of 60". A single tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1 1/8" adjustable steel glide. The 1/2 round add-on will be able to attach to a pair of 24" or 30" worksurface ends. A pair of steel splice plates will be included to attach the 1/2 round add-on to a pair of worksurfaces.

## 1/4 Round Add-On Worksurface

1/4 round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They shall be available in a diameter of 36" and 42". The 36" diameter 1/4 round add-on will have two flat perpendicular edges of 24" and the 42" round add-on will have two flat perpendicular edges of 30". A single tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1 1/8" adjustable steel glide. The 1/4 round add-on will be able to bridge a pair of identical depth (24" or 30") 90° worksurface ends. It will also be able to be attached to an appropriate matching (24" or 30") edge of a single worksurface edge. A pair of steel splice plates will be included to attach the 1/4 round add-on to a pair of worksurfaces.

## Relocatable Power Tap (RPT)

The RPT shall have a pair of outlets and be mountable in the overhead stanchions or transaction countertop stanchion. Two RPTs may be mountable per stanchion. Cord lengths available for RPTs shall be available with a cord length of 36" or 96". RPTs will provide above worksurface height power via an installed 10-wire electrical system or through the use of building wall outlets.

## Backpack Wire Trough Kit

The backpack kit shall consist of 3 steel wire troughs, a pair of trough mounting brackets, a backpack cover, and any applicable end trim. The backpack cover shall be made of 18-gage steel and be removable without the use of any tools. The wire troughs shall be made of 20-gage steel and provide 1.25" by .92" of room for lay in cabling per trough. Various trim pieces shall be made available to conceal any gaps in corner, straight, or end of run conditions.

## 10-Wire Electrical Distribution System

The 10-wire system is available in two configurations (6-2-2 and 4-4-2). The UL label is green for 6-2-2 and blue for 4-4-2 applications. These numbers refer to the quantity of hot - neutral - ground wires configured in each system. Both the 6-2-2 and 4-4-2 systems may be brought into the system from the ceiling, the wall or floor, through the use of top feeds and base feeds. Bravo 10-wire electrical will be able to integrate with existing UNICOR panel systems (Classic XXI, Crescendo) with the addition of the appropriate connectors.

The 10-wire electrical distribution system will consist of a 10-wire harness, table to table connectors, and a 10-wire infeed kit. The 2.16" wide double sided, rigid 10-wire harness shall mount to the underside of the modesty panel beam and shall be available in widths to span the worksurface. The 30" to 66" wide worksurface harness kit shall accommodate (2) 15 amp duplex receptacles and the 72" wide worksurface harness kit shall accommodate up to (4) 15 amp duplex receptacles.

Receptacles shall be available to access the up to 6 circuits within the harness and must be ordered separately.

Both 10-wire systems are rated at 120 vAC @ 20 amps. All receptacles are rated at 15 amps. The specifics of each wiring configuration are detailed below.

**Note: The two ten wire systems (4-4-2 and 6-2-2) cannot be mixed together. The wiring systems must be separate.**

There are different receptacles for each system, and different connectors specific to each system. Mixed connectors will not allow the 2 systems to be keyed.

## 6-2-2 Configuration

The 6-2-2 configuration of the 10-wire system will have three "convenience" circuits (1, 2, & 3) which will each have their own hot wire, will share an oversized neutral wire, and will share the building ground wire. Circuits 4, 5, & 6 are "isolated ground" circuits that will each have their own hot wire, will share an oversized neutral wire, and will share an isolated ground wire.

The advantage of this system is that it will be able to have 6 circuits coming in via one top feed or base feed. This will cut down on the number of feed points on an installation. The number 4, 5, & 6 receptacles will be colored orange to designate that they are on the isolated ground, while the number 1, 2, & 3 receptacles come in the standard trim colors.

## 4-4-2 Configuration

The 4-4-2 configuration of the 10-wire system will have two "convenience" circuits (1 & 2) which will each have their own hot wire, their own neutral wire, and will share the building ground wire. Circuits 3 & 4 are "isolated ground" which will each have their own hot wire, their own neutral wire, and will share an isolated ground wire.

The advantage of this system is that all of the circuits will have their own neutral wires, and has two circuits (3 & 4) that use an isolated ground. The number 3 & 4 receptacles will be colored orange to designate that they are on the isolated ground, while the number 1 & 2 receptacles come in the standard trim colors.

## 10-Wire Power Infeed Kit

The 10-wire power infeed kit shall provide power from fixed, floor, or wall sources to the 10-wire harness. It shall include 6' of plastic covered flexible conduit. To connect the "hard wire" end of a 10-wire topfeed or basefeed to your building, use a 3/4" Romex connector on the conduit.

## 10-Wire Power Table to Table Connector

10-wire table to table connector shall consist of a fiberglass sleeved flexible harness, which provides power connections from adjoining desks. The jumper shall have a length of 27".

## Power Pole

The power pole body shall be made of extruded aluminum, 16-gage, overall dimensions are 1.73 x 3.43. It will have two cavities for physical power and data separation. Length of top feed harness is 12". The power pole cover will be made of extruded aluminum, 16-gage; overall dimensions are 1.73 x 3.43 x height determined by ceiling. A plastic trim piece will cover the area where the pole intersects the ceiling.

## Pedestal Storage

Pedestal storage for Bravo shall be provided by Opus Pedestals. 3 styles shall be available to meet personal storage requirements. Freestanding, mobile, and hanging pedestals.

Pedestals shall be available in 3 depths, 17 5/8" that may be used with any depth worksurface, 21 1/8" for maximum storage under a 30" worksurface, and 27 1/8". Multiple drawer combinations shall be available.

The 12" file and 15" EDP drawer sizes shall have a full extensions slide arm suspensions for full access to storage space. The 3" pencil drawers and 6" box drawers shall have 3/4" extension, steel ball-bearing suspension.

Locks shall be included in each pedestal and shall be randomly keyed. Specific keying combinations shall be available.

**Freestanding Pedestals**

Freestanding pedestals shall have a finished top and 4 adjustable glides. They shall be placed under a worksurface or anywhere else in the office. A counterbalance weight shall be included with each unit.

**Mobile Pedestals**

Mobile pedestals shall have a finished top and 4 twin wheel hooded casters. Front casters shall be locking and back casters shall be non-locking. A counterbalance weight shall be included with each unit.

**Hanging Pedestals**

Hanging pedestals shall have keyhole slots for attachment under basic worksurfaces. No more than one hanging pedestal should be specified on any one worksurface.

**Center Drawer**

Center drawers shall be of a formed plastic construction with a front compartment tray integral to the molding. Locks shall be included and shall be randomly keyed. Specific keying combinations shall be available. They shall attach under Bravo worksurfaces and shall be available in the 4 trim colors.

**CPU Sling**

The CPU sling shall attach to the underside of worksurfaces and accommodate a range of CPUs up to 65" in circumference and a maximum of 75 lbs. It shall provide 5 1/2" of front to back travel and 359° swivel for ease of accessibility. The CPU sling shall be available in black only.

**CPU Holder**

The CPU holder shall accommodate a range of CPUs from 2" to 10 1/2" thick and 11" to 21" tall. An optional security kit will be available that prevents tampering or removal of the CPU. The CPU holder shall be available in black only.

**Privacy Screens**

Privacy screens shall be available to provide sit down or stand up privacy within the Bravo workstation. Screens shall be 3/4" thick, 18 1/4" or 38" high, and available in widths to fit all worksurfaces. They shall be mountable to either the overhead support (BVSBS), to the underside of the worksurface (BVSBW), to the top of the worksurface (BVSOW), or with a combination of attaching to an overhead support and a worksurface top (BVSSO). A stackable 18 1/4" high section (BVSSS) shall also be available.

Stackable privacy screens will be able to be mounted to the BVSBW or BVSOW privacy screens. The BVSSS privacy screen mounting will not require any tools.

Privacy screens shall be designed for straight-line applications. They shall include mounting brackets for attachment to the worksurface. Screens shall be available for straight applications in 24", 30", 36", 42", 48", 54", 60", 66", and 72" widths. The 66" and 72" widths shall consist of a pair of screens (1) 30" plus (1) 36" screen for 66" applications and (2) 36" screens with splice extrusions for 72" applications.

Screens may be used to serve 2 worksurfaces placed back to back. Privacy screens shall be useable on worksurfaces with overhead storage units to close the opening between the worksurface and the bottom of the shelf. Corner screens shall include a corner light block channel. The light block channel will also serve to align and hold the back corner together. Screens shall be available in configurations to match the worksurface application, basic worksurface, or corner worksurface.

Privacy screens will consist of two different aluminum extrusion profiles, each assembled with die-cast corner connectors to create a rectangular frame. The frames will be either upholstered or painted, depending on option. Between the two assembled frames, different core materials can be inserted. The screen material shall be made of 1/8" or 3/4" thick tackable iron core light or a 10mm thick non-tackable translucent plastic. The frame shall be made of extruded aluminum that is .060 in. thick. Overall dimensions of the frame shall be 1.40" x length and height dependent on desk size and screen height. The bracket extrusion shall be made of extruded aluminum. Overall dimensions of the bracket extrusions shall be .75" x 3.12" x length determined by screen height. Overall dimensions are dependent on screen option and height and desk size. The mounting brackets shall be formed of 7-gage steel with overall dimensions of 2.00" x 2.25" x 10.00".

**Overstorage Mounted Privacy Screen**

Same construction as above with the exception of mounting bracket and elimination of bracket extrusion and bracket insert. The mounting brackets shall be formed of 16-gage steel with overall dimensions of 54" x .92" x 12.38".

**Transaction Worksurface**

Transaction worksurfaces shall be available in rectangular and corner configurations. The construction of the worksurface will be similar to a standard worksurface except for shape and overall dimensions.

The transaction panel shall be formed of 18-gage steel and attach to the underside of the transaction worksurface. Depths for rectangular and corner shapes shall be 16". Overall rectangular widths available shall be from 24" to 72" in 6" increments. Overall corner transaction sizes available shall be 42" x 42", 48" x 60", 48" x 66", 48" x 72", 48" x 48", 60" x 48", 66" x 48", and 72" x 48".

Transaction Worksurface Support - Formed of 16-gage steel. Overall dimensions are 6.00" x 6.00" x height determined by height of transaction worksurface. Support Cover - R/C (QMFZ2), rated 94HB minimum or formed of 20-gage steel. Overall dimensions are 6.62" x 11.38".

**Overhead Support Stanchion**

The overhead support stanchions shall be formed of 16-gage steel, overall dimensions will be 6.00" x 6.00" x 19.50". A reinforcement plate (16-gage steel) inside the support shall have 4 cutouts that can accommodate either commercially available data plates or Removable Power Taps (RPT).

Overhead support stanchion covers shall be standard. The covers shall be made of extruded plastic and available in 5 standard trim colors. They will be hinged to allow access to the inside of the overhead support stanchions. A flexible rubber trim piece shall allow power or data cables to be run from the worksurface into the overhead support stanchions.

**Overhead Storage**

Bravo shall offer 2 styles of overhead storage units for use with any worksurface. The two styles are the Universal overhead and the Venus overhead. Overheads for basic rectangular worksurfaces shall attach through the grommets in the top of the worksurface. They shall have vertical wire channels that conceal the attachment and wires from the top of the shelf to the worksurface.

Shelf dividers made of powder coated steel shall be offered in 5 standard trim colors. The installation or removal of them shall be accomplished without the use of tools or fasteners.

All overheads (Universal or Venus) shall be able to be used on Classic XXI, Panel Mounted or Off Module, or Bravo. All 72" overheads will consist of a pair of 36" overheads. All 66" overheads will consist of a 30" and 36" overhead combination.

**Universal Overhead**

Overhead cabinets shall be 34" high and shall have 18 1/2" clearance between the worksurface and the bottom of shelf. The universal overhead shall be offered in widths of 30", 36", 42", 48", 54", 60", 66", and 72". The flipper door opening shall be 13" high. They shall be available with doors of painted steel, fabric, laminate, or veneer. Locks shall be randomly assigned or keyed per customer requests.

**Universal Overhead Regular Shelf**

Product Offering - The product shall be offered in widths of 30", 36", 42", 48", 54", 60", 66", and 72". The overall dimensions of the end panels shall be 16 1/2" x 15". The shelf depth shall be 15".

Construction - The end panels shall be constructed of 14-gage steel, with a powder coat finish. The end panels shall have self-locking mounting tabs formed into the back edge. The shelf shall be an 18-gage steel weldment with a powder coat finish. The front edge of the shelf shall be a PVC extrusion that also provides space for a concealed flush mount task light.

**Universal Overhead Low Shelf**

Product Offering - The product shall be offered in widths of 30", 36", 42", 48", 54", 60", 66", and 72". The overall dimensions of the end panels shall be 9 1/4" x 15". The shelf depth shall be 15".

Construction - Same as a Universal overhead regular shelf unit.

**Venus Overhead**

The cabinet sides shall be constructed of 14-gage sheet steel, while the top, back, and shelf will be constructed out of 18-gage sheet steel. Venus overheads will be offered in widths of 30", 36", 42", 48", 54", 60", 66", and 72". The top, sides, back, and shelf will be resistance welded so there are no visible weld marks on the class A surfaces (outside visible surfaces). The cabinet shall be painted one of the 5 standard trim colors. Other colors shall be available if requested. The upper door shall be comprised of extruded rigid PVC. The extruded rigid PVC will be available in the 5 standard trim colors along with translucent. The lower door shall be comprised of extruded aluminum, which shall be available in the 5 standard trim colors and many optional colors. A 10-gage hot rolled steel link arm connects the upper door and lower door.

Spring tension shall be used to assist in the opening and closing of the door. Applying pressure to the lower door opens both doors. Less than 5 pounds of force shall be needed to open both doors. The overhead door shall be able to be opened with a closed fist as well. The force and ease of opening shall make this overhead ADA compliant.

The shelf and back shall be slotted every two inches to allow for the use of shelf dividers. The underside of the shelf is also slotted with 1.5" by 1.5" slots to allow for electrical cords to run through the back.

**Various Ballast Task Lights**

Task lights shall be offered in one standard level of efficiency and cost. The standard light shall have a magnetic high power ballast with rapid start, cool white T-8 fluorescent lamp. Task lights shall attach to the underside of the shelf on overhead cabinets. Power cord length will be 9' long. Lights shall be UL listed and available in the 4 trim colors. They shall be available for all widths of Universal or Venus overheads.

**Paper Management System**

The paper management system shall address the storage and movement of files, binders, and documents. Components shall be available with integrated hooks for attachment to the work bar. The system shall be available in the 5 trim colors.

The paper management system shall include the following components: Tool Rail, Paper Tray, Diagonal Storage Unit, Vertical Storage Unit, Hanging File Folder Holder, Telephone Caddy, CD Holder, Accessory Tray, and a Pencil Cup.

The tool rail shall be fabricated from a powder coated aluminum extrusion with injection molded plastic end caps. The tool rail shall be attached to the workstation in one of two options. Option one is to attach the tool rail to the overhead storage supports through the use of self-locking steel brackets. Option two is to attach the tool rail to desk mounted brackets. Desk mounted brackets shall be 15.75" high, non handed, and constructed of 16-gage steel. The tool rail shall be 4 1/2" high and 1/2" deep, with the length corresponding to the worksurface width minus the width of the overhead supports. Multiple combinations of paper management units shall hang on the bar in any of 4 vertical locations. All components shall be of injection molded ABS plastic.

The paper tray shall be 2" x 9 1/2" x 14". It shall be used freestanding or suspended from the tool rail.

The diagonal storage unit shall be 2 1/2" x 7" x 12 1/2". ABS dividers shall be able to be used in either left or right positions. It shall be used freestanding or suspended from the tool rail.

The vertical storage unit shall measure 5" x 10 1/2". It shall be used freestanding or suspended from the tool rail.

Hanging folder holders shall measure 2" x 1" x 8 1/2". They will be shipped one pair per set.

The telephone caddy shall measure 2" x 8 1/2" x 9 1/2". It will have a retractable tab to adjust to various size phones.

The CD holder shall measure 2" x 5 1/2" x 7". It shall store 10 CDs vertically.

The accessory tray shall measure 2" x 9 1/2" x 10". It will have compartments for the storage of common items such as: stamps, small note pads, tape, pencils, and paper clips.

The pencil cup shall measure 4" x 4" x 3 1/2".

## Rectangular Worksurfaces

\*Standard Transition End Panels shown.

### MODEL

#### Rectangular Freestanding Worksurface with Full Modesty Panels

- Consists of top, two legs, modesty panel, optional filler panel (full modesty panel), two end panels (optional transitional size), ganging plates, and all required assembly hardware
- Each leg has four cable access grommet locations
- Top has two cable access grommets above the legs (66" and 72" have a third middle grommet)
- Top grommets allow for attachment of overhead storage units (see pages 48-53)
- Modesty panel allows for optional 10-wire electrical system (see pages 59 & 60)
- Edging for all tops is a 3mm PVC edge banding

### HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model Number, including options. See "How to Build a Model Number".
- Any special service required.

Note:  indicates that a choice is required.  
 indicates that no choice is required.  
 Alpha-numeric characters in place of  indicate that no other options are available.

### HOW TO BUILD A MODEL NUMBER

- A** Select size of worksurface (left to right).  
**B** Select transition end panel.  
**S** = Standard  
**L** = Left transition only  
**R** = Right transition only  
**B** = Both end panels transition

- C** Select trim color (edge and grommets).\*
- B** = Black = 27  
**G** = Grey = 29  
**L** = Light Tone = 32  
**S** = Sand = 28  
**W** = Warm Grey = 33
- \*Trim color matches paint color.

- D** Select paint color.
- 27** = Black  
**29** = Grey  
**33** = Warm Grey  
**28** = Sand  
**32** = Light Tone  
**59** = Juniper  
**25** = Medium Bronze  
**26** = Hunter Green  
**31** = Eggshell White  
**50** = Beige  
**51** = Baltic  
**52** = Bordeaux  
**SP** = COM

- E** Select laminate surface.
- AA** = Cream  
**AB** = Champagne  
**AC** = Barcelona  
**AF** = Aruba Tan  
**AG** = Black  
**AH** = Dark Gray  
**AI** = Dawn Gray (Greige)

## Reduction Rectangular Worksurfaces

\*Standard Transition End Panels shown.

### MODEL

#### Freestanding Reduction Rectangular Worksurface with Full Modesty Panel

- Desk reduces size from 24" on one end to 30" on opposite end
- Consists of top, two legs, modesty panel, optional filler panel (full modesty panel), two end panels (optional transitional size), ganging plates, and all required assembly hardware
- Each leg has four cable access grommet locations
- Top has two cable access grommets above the legs (66" and 72" have a third middle grommet)
- Top grommets allow for attachment of overhead storage units (see pages 48-53)
- Modesty panel allows for optional 10-wire electrical system (see pages 59 & 60)
- Edging for all tops is a 3mm PVC edge banding

## Reduction Rectangular Worksurfaces

\*Standard Transition End Panels shown.

### MODEL

#### Freestanding Reduction Rectangular Worksurface with Partial Modesty Panel

- Desk reduces size from 24" on one end to 30" on opposite end
- Consists of top, two legs, modesty panel, optional filler panel (partial modesty panel), two end panels (optional transitional size), ganging plates, and all required assembly hardware
- Each leg has four cable access grommet locations
- Top has two cable access grommets above the legs (66" and 72" have a third middle grommet)
- Top grommets allow for attachment of overhead storage units (see pages 48-53)
- Modesty panel allows for optional 10-wire electrical system (see pages 59 & 60)
- Edging for all tops is a 3mm PVC edge banding

### HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model Number, including options. See "How to Build a Model Number".
- Any special service required.

Note:

- The  indicates that a choice is required.
- The absence of the  indicates that no choice is required.
- Alpha-numeric characters in place of  indicate that no other options are available.

### HOW TO BUILD A MODEL NUMBER

- A** Select privacy screen size.
- B** Select frame options.
- UF = Upholstered frame  
EF = Exposed frame  
TF = Translucent
- C** Select paint color.
- 27 = Black  
29 = Grey  
33 = Warm Grey  
28 = Sand  
32 = Light Tone  
59 = Juniper  
25 = Medium Bronze  
26 = Hunter Green  
31 = Eggshell White  
50 = Beige  
51 = Baltic  
52 = Bordeaux  
SP = COM

- D** Select screen fabric.
- Group A:
- Pattern Name FR701**
- 1511 = Blue Neutral  
1506 = Green Neutral  
1518 = Wedgewood  
1510 = Silver Papier  
1546 = Cherry Neutral  
1515 = Quartz  
1531 = Gray Mix
- Pattern Name Eclipse**
- 4595 = Meteor  
1690 = Tourmaline  
4604 = Chicory  
4605 = Amber Grain  
4593 = Serengeti  
4594 = Coco Palm  
1691 = Iron Ore

### Pattern Name Carrara

- 9447 = Beeswax  
9454 = Verdigris  
9456 = Tinctoria  
9455 = Green Earth  
9448 = Teak Oil  
9445 = Gesso  
9444 = Casein

### Pattern Name Galaxy

- 4526 = Desert Sand Gravel  
4538 = Bermuda Seamist  
4544 = Blueberry Sky  
4542 = Sundew Sandrift  
4525 = Fog Stardust

### On-Worksurface Mounted Corner Screen

- Mounts along the back edge of a corner work surface and is supported by an end mount bracket, and a bracket that attaches it to a BVSBW screen
- Available in:
  - completely upholstered (upholstered frame)
  - exposed frame (core upholstered, frame painted)
  - translucent (core is translucent, frame painted)
- Includes screen and all required mounting hardware
- "W" size refers to the desk size screen is mounted on
- Available in two heights:
  - 19" matches the height of a stanchion mounted screen
  - 37" matches the height of an overhead storage unit
- 66" and 72" BSOWC screens are made up of two smaller screens
- 19" height is capable of having a stackable screen (BSTK) attached to it.
- Direction determined by the end mount bracket used

### Stackable Mounted Screen

- Mounts on top of 20" BVSBW or BSBWC screens and 19" BVSOW or BSOWC screens
- Available in:
  - completely upholstered (upholstered frame)
  - exposed frame (core upholstered, frame painted)
  - translucent (core is translucent, frame painted)
- Includes screen and all required mounting hardware
- "W" size refers to the desk size screen is mounted on
- 66" and 72" BSTK screens are made up of two smaller screens

## HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model Number, including options. See "How to Build a Model Number".
- Any special service required.

Note: • The  indicates that a choice is required.  
 • The absence of the  indicates that no choice is required.  
 • Alpha-numeric characters in place of  indicate that no other options are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select privacy screen size.

**B** Select bracket direction.

**L** = Left  
**R** = Right

**C** Select frame options.

**UF** = Upholstered frame  
**EF** = Exposed frame  
**TF** = Translucent

**D** Select paint color.

**27** = Black  
**29** = Grey  
**33** = Warm Grey  
**28** = Sand  
**32** = Light Tone  
**59** = Juniper  
**25** = Medium Bronze  
**26** = Hunter Green  
**31** = Eggshell White  
**50** = Beige  
**51** = Baltic

**52** = Bordeaux

**SP** = COM

**E** Select screen fabric.

Group A:

**Pattern Name FR701**

**1511** = Blue Neutral

**1506** = Green Neutral

## HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select key option (if required).  
**KA** = Keyed alike

## INFORMATION

### Locks and Keying

All units include a lock. Keying is random unless otherwise specified at time of order entry. For this option use "KS".

The keyed alike option is specified by entering the two-letter designation "KA". This option specifies that the core is removed from the product. Lock and keys must be ordered as separate line items and shipped in bulk. Contact Customer Service.

Master keys are available.
