¹ Nondefense R&D data are estimates. Foreign nondefense R&D/GDP ratios are obtained directly from OECD reports or are estimated by NSF from OECD data for:

Japan for 1995 and later years; Germany for 1990 and earlier years; United Kingdom for 1988 and earlier years (except 1985); Italy for 1986 and earlier years; and Canada for 1990 and later years.

² Due to changes in methodology, data on Japanese R&D in 1996 and later years may not be consistent with data in earlier years.

³ Germany's data for 1981-90 are for West Germany.

⁴ Conversions of foreign currencies to U.S. dollars are calculated with OECD purchasing power parity exchange rates. Constant 1996 dollars are based on OECD implicit GDP price indices.

KEY: GDP = gross domestic product; NA = not available

SOURCES: Organisation for Economic Co-operation and Development, Main Science and Technology Indicators data base (Paris, May 2002) and National Science Foundation/ Division of Science Resources Statistics.
