# nveils its new Web

"Redesigned with You in Mind."

## **More Dynamic Site**

Fresh content will appear on the BLS homepage every business day.

#### **Improved Navigation**

User-tested menus will enable fast and efficient browsing.

## **Improved Search Engine**

BLS will be upgrading to a new search engine which will be a major improvement over the existing one.

#### **Calendar of News Releases**

A more comprehensive calendar of BLS news releases will be available. The calendar will show all news releases scheduled for the current week, including annual news releases.

#### **Guide to Geographic Data**

A convenient Guide to Geographic Data will help data users to quickly determine what types of data are available from BLS at every level of geographic detail, from international to local areas.

## **Resources by Visitor Category**

Business leaders, consumers, investors, jobseekers, members of the media, policymakers, students, teachers, and survey respondents will have new resource pages tailored to their interests.

#### **Audio Files**

BLS will be introducing audio files to its website. The first one will accompany the Spotlight on Statistics feature that will be issued in July.

## **Tutorials**

Multimedia help, including video, audio, and text, will guide site users in their use of various data tools and other features.

#### **Web Addresses**

The vast majority of current BLS web addresses (URLs) will be unchanged. For example, links to bookmarks for news releases will still work.
