

## International Polar Year Awards

The "International Polar Year" (IPY), extending from March 2007 through March 2009, will be an intense scientific campaign to explore new frontiers in polar science, improve our understanding of the critical role of the polar regions in global processes, and educate the public about the polar regions. Projects, which are expected to be interdisciplinary, will involve a pulse of activity during the IPY period; leave a legacy of infrastructure and data; expand international cooperation; engage the public in polar discovery; and help attract the next generation of scientists and engineers to polar research.

This page, which will be updated regularly, provides a list of the awards made by the NSF in support of IPY.
