

## §218.11

### §218.11 Timing of authorized hazardous fuel reduction project decision.

(a) The Responsible Official may not issue a Record of Decision (ROD) or Decision Notice (DN) concerning an authorized hazardous fuel reduction project subject to the provisions of this subpart until the Reviewing Officer has responded to all pending objections.

(b) When no objection is filed within the 30-day time period, the Reviewing Officer shall notify the Responsible Official, and approval of the authorized hazardous fuel reduction project in a Record of Decision or Decision Notice may occur on, but not before, the fifth business day following the end of the objection-filing period.

### §218.12 Secretary's authority.

(a) Nothing in this section shall restrict the Secretary of Agriculture from exercising any statutory authority regarding the protection, management, or administration of National Forest System lands.

(b) Authorized hazardous fuel reduction projects proposed by the Secretary of Agriculture or the Under Secretary, Natural Resources and Environment are not subject to the procedures set forth in this subpart. A decision by the Secretary or Under Secretary constitutes the final administrative determination of the Department of Agriculture.

### §218.13 Judicial proceedings.

The objection process set forth in this subpart fully implements Congress' design for a predecisional administrative review process for proposed hazardous fuel reduction projects authorized by the HFRA. These procedures present a full and fair opportunity for concerns to be raised and considered on a project-by-project basis. Individuals and groups must structure their participation so as to alert the local agency officials making particular land management decisions of their positions and contentions. Further, any filing for Federal judicial review of an authorized hazardous fuel reduction project is premature and inappropriate unless the plaintiff has submitted specific written comments relating to the proposed action during

## 36 CFR Ch. II (7-1-05 Edition)

scoping or other opportunity for public comment as prescribed by the HFRA, and the plaintiff has challenged the authorized hazardous fuel reduction project by exhausting the administrative review process set out in this subpart. Further, judicial review of hazardous fuel reduction projects that are subject to these procedures is strictly limited to those issues raised by the plaintiff's submission during the objection process, except in exceptional circumstances such as where significant new information bearing on a specific claim only becomes available after conclusion of the administrative review.

### §218.14 Information collection requirements.

The rules of this subpart specify the information that objectors must provide in an objection to a proposed authorized hazardous fuel reduction project as defined in the HFRA (§218.7). As such, these rules contain information collection requirements as defined in 5 CFR part 1320. These information requirements are assigned OMB Control Number 0596-0172.

### §218.15 Applicability and effective date.

The provisions of this subpart are effective as of January 9, 2004 and apply to all proposed authorized hazardous fuel reduction projects conducted under the provisions of the HFRA for which scoping begins on or after January 9, 2004.

## Subpart B [Reserved]

## PART 219—PLANNING

### Subpart A—National Forest System Land Management Planning

#### Sec.

- 219.1 Purpose and applicability.
- 219.2 Levels of planning and planning authority.
- 219.3 Nature of land management planning.
- 219.4 National Environmental Policy Act compliance.
- 219.5 Environmental management systems.
- 219.6 Evaluations and monitoring.
- 219.7 Developing, amending, or revising a plan.
- 219.8 Application of a new plan, plan amendment, or plan revision.

## Forest Service, USDA

- 219.9 Public participation, collaboration, and notification.
- 219.10 Sustainability.
- 219.11 Role of science in planning.
- 219.12 Suitable uses and provisions required by NFMA.
- 219.13 Objections to plans, plan amendments, or plan revisions.
- 219.14 Effective dates and transition.
- 219.15 Severability.
- 219.16 Definitions.

### Subpart B [Reserved]

## Subpart A—National Forest System Land and Resource Management Planning

AUTHORITY: 5 U.S.C. 301; 16 U.S.C. 1604, 1613.

SOURCE: 70 FR 1055, Jan. 5, 2005, unless otherwise noted.

### §219.1 Purpose and applicability.

(a) The rules of this subpart set forth a process for land management planning, including the process for developing, amending, and revising land management plans (also referred to as plans) for the National Forest System, as required by the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976 (16 U.S.C. 1600 *et seq.*), hereinafter referred to as NFMA. This subpart also describes the nature and scope of plans and sets forth the required components of a plan. This subpart is applicable to all units of the National Forest System as defined by 16 U.S.C. 1609 or subsequent statute.

(b) Consistent with the Multiple-Use Sustained-Yield Act of 1960 (16 U.S.C. 528–531), the overall goal of managing the National Forest System is to sustain the multiple uses of its renewable resources in perpetuity while maintaining the long-term productivity of the land. Resources are to be managed so they are utilized in the combination that will best meet the needs of the American people. Maintaining or restoring the health of the land enables the National Forest System to provide a sustainable flow of uses, benefits, products, services, and visitor opportunities.

(c) The Chief of the Forest Service shall establish planning procedures for this subpart for plan development, plan

## §219.2

amendment, or plan revision in the Forest Service Directive System.

### §219.2 Levels of planning and planning authority.

Planning occurs at multiple organizational levels and geographic areas.

(a) *National.* The Chief of the Forest Service is responsible for national planning, such as preparation of the Forest Service Strategic Plan required under the Government Performance and Results Act of 1993 (5 U.S.C. 306; 31 U.S.C. 1115–1119; 31 U.S.C. 9703–9704), which is integrated with the requirements of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the NFMA. The Strategic Plan establishes goals, objectives, performance measures, and strategies for management of the National Forest System, as well as the other Forest Service mission areas.

(b) *Forest, grassland, prairie, or other comparable administrative unit.* (1) Land management plans provide broad guidance and information for project and activity decisionmaking in a national forest, grassland, prairie, or other comparable administrative unit. The Supervisor of the National Forest, Grassland, Prairie, or other comparable administrative unit is the Responsible Official for development and approval of a plan, plan amendment, or plan revision for lands under the responsibility of the Supervisor, unless a Regional Forester, the Chief, or the Secretary chooses to act as the Responsible Official.

(2) When plans, plan amendments, or plan revisions are prepared for more than one administrative unit, a unit Supervisor identified by the Regional Forester, or the Regional Forester, the Chief, or the Secretary may be the Responsible Official. Two or more Responsible Officials may undertake joint planning over lands under their respective jurisdictions.

(3) The appropriate Station Director must concur with that part of a plan applicable to any experimental forest within the plan area.

(c) *Projects and activities.* The Supervisor or District Ranger is the Responsible Official for project and activity decisions, unless a higher-level official
