Subject: ENERGY STAR for Windows, Doors, and Skylights: Updated Program Requirements

Dear ENERGY STAR Partner:

The U.S. Department of Energy (DOE) would like to inform you that the official Program Requirements for manufacturer partners participating in ENERGY STAR for Windows, Doors, and Skylights have been updated to include and clarify all current program rules and guidelines. Specifically, the Program Requirements were updated to:

- Replace outdated program terminology and information
- Reference new program elements, i.e., the Equivalent Energy Performance Amendment and Display Unit Labeling Guidelines
- Clarify eligible products and organizations
- Increase consistency with Program Requirements for other ENERGY STAR product and service areas

The attached ENERGY STAR[®] Program Requirements for Residential Windows, Doors, and Skylights - Version 3.0 replace the previous Program Requirements and apply to all existing and new partners. Please review the document and keep a copy in your files for future reference.

Please contact Jenny Dakin, D&R International, at jdakin@drintl.com or (301) 588-9387, with any questions.
