

## **CHAPTER 7**

# **Library Resources and Technology**

This chapter contains statistics on libraries and on the use of information technologies. These data show the extent of America's access to information technologies outside of formal classroom activities. The data also provide a capsule description of the magnitude and availability of library resources. Access to information has been widely cited as the key to success in a growing number of endeavors. Thus, how information is made available and to whom are matters of concern.

The first section of the chapter (tables 421 to 423 and 426 to 429) deals with public libraries, public and private school libraries, and college and university libraries. It contains data on collections, population served, staff, and expenditures. Two tables provide institutional-level information for the largest public libraries and the largest college libraries in the country.

The second half of the chapter (tables 425, 426, and 430 to 434) provides information on the availability and use of technology. For example, the proportion of children using computers at school is shown over time. Also included are data on the use of home computers by adults and school children, with comparisons among various demographic groups.

Related data may be found in various sections of this report. For example, statistics on the number of degrees conferred in computer and information sciences and library sciences are in chapter 3. Further information on survey methodologies is in the "Guide to Sources" in the Appendix and in the publications cited in the source notes.

### **Resources**

In 1993–94, there were 83 school library visits each week per 100 public school students. Elementary school students were more likely to visit their school libraries (89 visits per 100 students each week) than secondary school students (69 per 100). Private school students were slightly less likely to visit their libraries (77 per 100). The average number of library staff per school was 1.8 at public schools, and 1.2 at private schools. Public school libraries generally had smaller numbers of books on a per student basis than private school libraries. In 1993–94, public school libraries held an average of 2,585 books per 100 students compared to an average of

3,716 per 100 students at private schools. Although public elementary school libraries had slightly smaller holdings than public secondary schools on a per student basis, the elementary school students checked out twice as many books on a per student basis (1.5 per week compared to .7 per week) (table 421).

The increase in college library resources kept pace with increases in enrollment between 1984–85 and 1994–95. The library staff to student ratio decreased slightly from 153 students per staff member to 150 students per staff member. The library operating expenditure per student average rose 9 percent in constant dollars from 1984–85 to \$417 in 1994–95. However, other college expenditures rose faster than library expenditures and the proportion of college education budgets spent on libraries fell from 3.4 percent in 1984–85 to 2.9 percent in 1994–95 (table 426).

In 1996, there were 8,946 public libraries in the United States with 711 million books and serial volumes. The annual attendance per capita was 4.0 and the reference transactions per capita was 1.1 (table 428).

### **Technology**

There has been widespread introduction of computers into the schools in recent years. In 1997, the average public school contained 75 computers. One important technological advance that has come to schools following the introduction of computers has been connections to the Internet. The proportion of schools with Internet access has increased rapidly from 35 percent in 1994 to 89 percent in 1998. About 51 percent of instructional rooms had access to the Internet in 1998 (table 425).

The total computer usage rate of students at school increased from 59 percent in 1993 to 69 percent in 1997. The rate for grades 1 to 8 increased from 69 percent in 1993 to 79 percent in 1997. The school computer usage rate in 1997 was 70 percent for students in high school and 65 percent for undergraduate students in college. At that time, sizable percentages of students used computers at home, though fewer actually used them for schoolwork. About 43 percent of elementary school children used computers at home and about 24 percent used them for schoolwork. Students at the high school and undergraduate levels were more likely than elementary

school children to use home computers for schoolwork. In general, students in higher income families were much more likely to use computers at home and use them for schoolwork than students from lower income families. About 13 percent of the high school students in the \$15,000 to \$19,999 household income group used computers at home for school work compared to 66 percent in the \$75,000 and over income group (table 434).

The use of computers has become widespread in the workplace. In 1997, 50 percent of all workers used computers on the job. More frequent use of computers was associated with higher levels of education and higher incomes. Thirty-six percent of high school graduates and 12 percent of high school

dropouts used computers at work compared to 79 percent of those with master's degrees. Among those who did use computers, the master's degree recipients were the most likely to use the computers for a wide variety of applications. Among the most common applications for all employees using computers on the job were: bookkeeping/invoicing (66 percent), word processing (57 percent), communications (47 percent), analysis/spreadsheets (41 percent), and calendar/schedule (38 percent). Workers in the 25- to 59-year-old age range were more likely to use computers than younger or older workers. Elementary and secondary teachers were less likely to use computers than persons employed in other managerial or professional fields (table 430).

**Figure 33.- Percent of all public schools and instructional rooms having Internet access: Fall 1994 to fall 1998**

<sup>1</sup> During the most recent full week of school.

<sup>2</sup> Standard error less than .5.

<sup>3</sup> Locally budgeted expenditures exclude federal gifts and grants.

—Data not available.

NOTE.—Percentages are based on schools that have library/media centers. In school year 1990–91, 96 percent of public schools had library/media centers. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey, 1993–94, unpublished data. (This table was prepared August 1997.)

**Table 423.—Selected statistics on public school library/media centers, by state: 1993–94**

State or other area	Percent of centers offering selected services/equipment						Books held per 100 students	Total students using library per 100 students each week <sup>1</sup>	Total expenditures for materials per student	Expenditure for micro-computers for library per student	Expenditure for audio-visual materials for library per student
	Computer with modem	Automated catalog	Database searching with CD-ROM	On-line database searching	Compact disc for indices, etc.	Connection to the Internet

<sup>1</sup> During the most recent full week of school.

—Data not available.

NOTE.—Percentages are based on schools that have library/media centers. In school year 1990–91, 96 percent of public schools had library/media centers. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey, 1993–94, unpublished data. (This table was prepared August 1997.)

**Table 424.—Percent of public and private schools having access to selected telecommunication capabilities, by location of access site and control of school: 1995**

Telecommunications capabilities	Percent of schools having access	Percent of schools with telecommunications access, by location <sup>1</sup>				
		Administrative offices	Teacher workrooms	Classrooms	Computer labs	Library/media centers
1	2	3	4	5	6	7
All public schools						
Computer with any telecommunication capabilities via local area network .....	77	73	20	45	71	64
Computer with any telecommunication capabilities via modem .....	76	61	10	30	41	64
Computer with any telecommunication capabilities via wide area network .....	61	58	14	35	41	68
Broadcast television .....	71	35	28	82	47	88
Cable television .....	76	33	25	72	42	91
Closed circuit television .....	28	50	32	91	60	89
Two-way video with two-way audio .....	13	24	17	57	37	69
One-way video with two-way audio or computer link .....	7	26	15	63	41	54
All private schools						
Computer with any telecommunication capabilities via local area network .....	43	71	18	33	58	35
Computer with any telecommunication capabilities via modem .....	48	70	14	24	38	33
Computer with any telecommunication capabilities via wide area network .....	29	59	15	26	41	40
Broadcast television .....	52	24	23	81	27	59
Cable television .....	37	21	21	75	29	60
Closed circuit television .....	5	32	29	99	51	71
Two-way video with two-way audio .....	5	9	13	50	54	44
One-way video with two-way audio or computer link .....	2	32	21	66	39	46

<sup>1</sup>Location estimates are based on those schools having access to each type of telecommunication capability. Percents of schools reporting telecommunication locations do not sum to 100 because many schools have access in more than one location.

NOTE.—Data are derived from a sample survey and are subject to sampling error.
