## Subpart K—Latex Foam Subcategory

SOURCE: 40 FR 2345, Jan. 10, 1975, unless otherwise noted.

# § 428.110 Applicability; description of the latex foam subcategory.

The provisions of this subpart are applicable to process waste water discharges resulting from the manufacture of latex foam except for those discharges from textile plants subject to the provisions of part 410 of this chapter.

## § 428.111 Specialized definitions.

For the purpose of this subpart:

- (a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in part 401 of this chapter shall apply to this subpart.
- (b) The term "raw material" shall mean all latex solids used in the manufacture of latex foam.

### § 428.112 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Except as provided in §§ 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT):

|                         | Effluent limitations                  |   |  |
|-------------------------|---------------------------------------|---|--|
| Effluent characteristic | Maximum<br>for any 1<br>day           | Average of daily<br>values for 30<br>consecutive days<br>shall not ex-<br>ceed— |  |
|                         | Metric units (kg/kkg of raw material) |   |  |
| Zinc                    | 0.058                                 | 0.024   |  |
| BOD5                    | 2.4                                   | 1.4   |  |
| TSS                     | 2.26                                  | 0.94  |  |
| рН                      | (1)                                   | (1)   |  |
|                         |                                       | its (lb/1,000 lb of material)   |  |
| Zinc                    | 0.058                                 | 0.024   |  |
| BOD5                    | 2.4                                   | 1.4   |  |
| TSS                     | 2.26                                  | 0.94  |  |
| pH                      | (1)                                   | (1)   |  |

<sup>1</sup> Within the range 6.0 to 9.0.

[40 FR 2345, Jan. 10, 1975, as amended at 60 FR 33964, June 29, 1995]

### § 428.113 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

|                         | Effluent limitations                  |   |
|-------------------------|---------------------------------------|---|
| Effluent characteristic | Maximum<br>for any 1<br>day           | Average of daily<br>values for 30<br>consecutive days<br>shall not ex-<br>ceed— |
|                         | Metric units (kg/kkg of raw material) |   |
| Zinc                    | 0.058                                 | 0.024   |
| BOD5                    | 2.4                                   | 1.4   |
| TSS                     | 2.26                                  | 0.94  |
| pH                      | (1)                                   | (1)   |
|                         |                                       | nits (lb/1,000 lb of<br>v material)   |
| Zinc                    | 0.058                                 | 0.024   |
| BOD5                    | 2.4                                   | 1.4   |
| TSS                     | 2.26                                  | 0.94  |
| pH                      | (1)                                   | (1)   |
