

Environmental Protection Agency

§ 6.105

required with other appropriate parties to initiate and coordinate the necessary environmental analyses.

[44 FR 64177, Nov. 6, 1979, as amended at 47 FR 9829, Mar. 8, 1982]

§ 6.105 Synopsis of environmental review procedures.

(a) *Responsible official.* The responsible official shall utilize a systematic, interdisciplinary approach to integrate natural and social sciences as well as environmental design arts in planning programs and making decisions which are subject to environmental review. The respective staffs may be supplemented by professionals from other agencies (see 40 CFR 1501.6) or consultants whenever in-house capabilities are insufficiently interdisciplinary.

(b) *Environmental information documents (EID).* Environmental information documents (EIDs) must be prepared by applicants, grantees, or permittees and submitted to EPA as required in subparts E, F, G, H, and I. EIDs will be of sufficient scope to enable the responsible official to prepare an environmental assessment as described under § 6.105(d) of this part and subparts E through I. EIDs will not have to be prepared for actions where a categorical exclusion has been granted.

(c) *Environmental reviews.* Environmental reviews shall be conducted on the EPA activities outlined in § 6.102 of this part and set forth under subparts E, F, G, H and I. This process shall consist of a study of the action to identify and evaluate the related environmental impacts. The process shall include a review of any related environmental information document to determine whether any significant impacts are anticipated and whether any changes can be made in the proposed action to eliminate significant adverse impacts; when an EIS is required, EPA has overall responsibility for this review, although grantees, applicants, permittees or contractors will contribute to the review through submission of environmental information documents.

(d) *Environmental assessments.* Environmental assessments (i.e., concise public documents for which EPA is responsible) are prepared to provide sufficient data and analysis to determine whether an EIS or finding of no signifi-

cant impact is required. Where EPA determines that a categorical exclusion is appropriate or an EIS will be prepared, there is no need to prepare a formal environmental assessment.

(e) *Notice of intent and EISs.* When the environmental review indicates that a significant environmental impact may occur and significant adverse impacts can not be eliminated by making changes in the project, a notice of intent to prepare an EIS shall be published in the FEDERAL REGISTER, scoping shall be undertaken in accordance with 40 CFR 1501.7, and a draft EIS shall be prepared and distributed. After external coordination and evaluation of the comments received, a final EIS shall be prepared and disseminated. The final EIS shall list any mitigation measures necessary to make the recommended alternative environmentally acceptable.

(f) *Finding of no significant impact (FNSI).* When the environmental review indicates no significant impacts are anticipated or when the project is altered to eliminate any significant adverse impacts, a FNSI shall be issued and made available to the public. The environmental assessment shall be included as a part of the FNSI. The FNSI shall list any mitigation measures necessary to make the recommended alternative environmentally acceptable.

(g) *Record of decision.* At the time of its decision on any action for which a final EIS has been prepared, the responsible official shall prepare a concise public record of the decision. The record of decision shall describe those mitigation measures to be undertaken which will make the selected alternative environmentally acceptable. Where the final EIS recommends the alternative which is ultimately chosen by the responsible official, the record of decision may be extracted from the executive summary to the final EIS.

(h) *Monitoring.* The responsible official shall provide for monitoring to assure that decisions on any action where a final EIS has been prepared are properly implemented. Appropriate mitigation measures shall be included in actions undertaken by EPA.
