

## Environmental Protection Agency

## § 6.108

(e) *General criteria for not granting a categorical exclusion.* (1) The full environmental review procedures of this part must be followed if undertaking an action consistent with allowable categories in paragraph (d) of this section may involve serious local or environmental issues, or meets any of the criteria listed below:

(i) The action is known or expected to have a significant effect on the quality of the human environment, either individually, cumulatively over time, or in conjunction with other Federal, State, local, tribal or private actions;

(ii) The action is known or expected to directly or indirectly affect:

(A) Cultural resource areas such as archaeological and historic sites in accordance with § 6.301,

(B) Endangered or threatened species and their critical habitats in accordance with § 6.302 or State lists,

(C) Environmentally important natural resource areas such as floodplains, wetlands, important farmlands, aquifer recharge zones in accordance with § 6.302, or

(D) Other resource areas identified in supplemental guidance issued by the OEA;

(iii) The action is known or expected not to be cost-effective or to cause significant public controversy; or

(iv) Appropriate specialized program specific criteria for not granting an exclusion found in other subparts of this regulation are applicable to the action.

(2) Notwithstanding the provisions of paragraph (d) of this section, if any of the conditions cited in paragraph (e)(1) of this section exist, the responsible official shall ensure:

(i) That a categorical exclusion is not granted or, if previously granted, that it is revoked according to paragraph (c) of this section;

(ii) That an adequate EID is prepared; and

(iii) That either an environmental assessment and FNSI or a notice of intent for an EIS and ROD is prepared and issued.

(f) *Developing new categories of excluded actions.* The responsible official, or other interested parties, may request that a new general or specialized program specific category of excluded actions be created, or that an existing

category be amended or deleted. The request shall be in writing to the Assistant Administrator, OEA, and shall contain adequate information to support the request. Proposed new categories shall be developed by OEA and published in the FEDERAL REGISTER as a proposed rule, amending paragraph (d) of this section when the proposed new category applies to all eligible programs or, amending appropriate paragraphs in other subparts of this part when the proposed new category applies to one specific program. The publication shall include a thirty (30) day public comment period. In addition to criteria for specific programs listed in other subparts of this part, the following general criteria shall be considered in evaluating proposals for new categories:

(1) Any action taken seldom results in the effects identified in general or specialized program specific criteria identified through the application of criteria for not granting a categorical exclusion;

(2) Based upon previous environmental reviews, actions consistent with the proposed category have not required the preparation of an EIS; and

(3) Whether information adequate to determine if a potential action is consistent with the proposed category will normally be available when needed.

[50 FR 26315, June 25, 1985, as amended at 51 FR 32610, Sept. 12, 1986]

### § 6.108 Criteria for initiating an EIS.

The responsible official shall assure that an EIS will be prepared and issued for actions under subparts E, G, H, and I when it is determined that any of the following conditions exist:

(a) The Federal action may significantly affect the pattern and type of land use (industrial, commercial, agricultural, recreational, residential) or growth and distribution of population;

(b) The effects resulting from any structure or facility constructed or operated under the proposed action may conflict with local, regional or State land use plans or policies;

(c) The proposed action may have significant adverse effects on wetlands, including indirect and cumulative effects, or any major part of a structure or facility constructed or operated

## § 6.200

under the proposed action may be located in wetlands;

(d) The proposed action may significantly affect threatened and endangered species or their habitats identified in the Department of the Interior's list, in accordance with § 6.302, or a State's list, or a structure or a facility constructed or operated under the proposed action may be located in the habitat;

(e) Implementation of the proposed action or plan may directly cause or induce changes that significantly:

(1) Displace population;

(2) Alter the character of existing residential areas;

(3) Adversely affect a floodplain; or

(4) Adversely affect significant amounts of important farmlands as defined in requirements in § 6.302(c), or agricultural operations on this land.

(f) The proposed action may, directly, indirectly or cumulatively have significant adverse effect on parklands, preserves, other public lands or areas of recognized scenic, recreational, archaeological, or historic value; or

(g) The Federal action may directly or through induced development have a significant adverse effect upon local ambient air quality, local ambient noise levels, surface water or groundwater quality or quantity, water supply, fish, shellfish, wildlife, and their natural habitats.

[50 FR 26315, June 25, 1985, as amended at 51 FR 32611, Sept. 12, 1986]

### Subpart B—Content of EISs

#### § 6.200 The environmental impact statement.

Preparers of EISs must conform with the requirements of 40 CFR part 1502 in writing EISs.

#### § 6.201 Format.

The format used for EISs shall encourage good analysis and clear presentation of alternatives, including the proposed action, and their environmental, economic and social impacts. The following standard format for EISs should be used unless the responsible official determines that there is a compelling reason to do otherwise:

(a) Cover sheet;

(b) Executive Summary;

(c) Table of contents;

(d) Purpose of and need for action;

(e) Alternatives including proposed action;

(f) Affected environment;

(g) Environmental consequences of the alternatives;

(h) Coordination (includes list of agencies, organizations, and persons to whom copies of the EIS are sent);

(i) List of preparers;

(j) Index (commensurate with complexity of EIS);

(k) Appendices.

#### § 6.202 Executive summary.

The executive summary shall describe in sufficient detail (10-15 pages) the critical facets of the EIS so that the reader can become familiar with the proposed project or action and its net effects. The executive summary shall focus on:

(a) The existing problem;

(b) A brief description of each alternative evaluated (including the preferred and no action alternatives) along with a listing of the environmental impacts, possible mitigation measures relating to each alternative, and any areas of controversy (including issues raised by governmental agencies and the public); and

(c) Any major conclusions.

A comprehensive summary may be prepared in instances where the EIS is unusually long in nature. In accordance with 40 CFR 1502.19, the comprehensive summary may be circulated in lieu of the EIS; however, both documents shall be distributed to any Federal, State and local agencies who have EIS review responsibilities and also shall be made available to other interested parties upon request.

#### § 6.203 Body of EISs.

(a) *Purpose and need.* The EIS shall clearly specify the underlying purpose and need to which EPA is responding. If the action is a request for a permit or a grant, the EIS shall clearly specify the goals and objectives of the applicant.

(b) *Alternatives including the proposed action.* In addition to 40 CFR 1502.14, the EIS shall discuss:
