

§ 6.603 Limitations on actions during environmental review process.

The processing and review of an applicant's NPDES permit application shall proceed concurrently with the procedures within this subpart. Actions undertaken by the applicant or EPA shall be performed consistent with the requirements of § 122.29(c) of this chapter.

[47 FR 9831, Mar. 8, 1982, as amended at 51 FR 32613, Sept. 12, 1986]

§ 6.604 Environmental review process.

(a) *New source.* If EPA's initial determination under § 6.602(b) is that the facility is a new source, the responsible official shall evaluate any environmental information to determine if any significant impacts are anticipated and an EIS is necessary. If the permit applicant requests, the responsible official shall establish time limits for the completion of the environmental review process consistent with 40 CFR 1501.8.

(b) *Information needs.* Information necessary for a proper environmental review shall be provided by the permit applicant in an environmental information document. The responsible official shall consult with the applicant to determine the scope of an environmental information document. In doing this the responsible official shall consider the size of the new source and the extent to which the applicant is capable of providing the required information. The responsible official shall not require the applicant to gather data or perform analyses which unnecessarily duplicate either existing data or the results of existing analyses available to EPA. The responsible official shall keep requests for data to the minimum consistent with his responsibilities under NEPA.

(c) *Environmental assessment.* The responsible official shall prepare a written environmental assessment based on an environmental review of either the environmental information document and/or any other available environmental information.

(d) *EIS determination.* (1) When the environmental review indicates that a significant environmental impact may occur and that the significant adverse

impacts cannot be eliminated by making changes in the proposed new source project, a notice of intent shall be issued, and a draft EIS prepared and distributed. When the environmental review indicates no significant impacts are anticipated or when the proposed project is changed to eliminate the significant adverse impacts, a FNSI shall be issued which lists any mitigation measures necessary to make the recommended alternative environmentally acceptable.

(2) The FNSI together with the environmental assessment that supports the finding shall be distributed in accordance with § 6.400(d) of this regulation.

(e) *Lead agency.* (1) If the environmental review reveals that the preparation of an EIS is required, the responsible official shall determine if other Federal agencies are involved with the project. The responsible official shall contact all other involved agencies and together the agencies shall decide the lead agency based on the criteria set forth in 40 CFR 1501.5.

(2) If, after the meeting of involved agencies, EPA has been determined to be the lead agency, the responsible official may request that other involved agencies be cooperating agencies. Cooperating agencies shall be chosen and shall be involved in the EIS preparation process in the manner prescribed in the 40 CFR 1501.6(a). If EPA has been determined to be a cooperating agency, the responsible official shall be involved in assisting in the preparation of the EIS in the manner prescribed in 40 CFR 1501.6(b).

(f) *Notice of intent.* (1) If EPA is the lead agency for the preparation of an EIS, the responsible official shall arrange through OER for the publication of the notice of intent in the FEDERAL REGISTER, distribute the notice of intent and arrange and conduct a scoping meeting as outlined in 40 CFR 1501.7.

(2) If the responsible official and the permit applicant agree to a third party method of EIS preparation, pursuant to § 6.604(g)(3) of this part, the responsible official shall insure that a notice of intent is published and that a scoping meeting is held before the third party contractor begins work which may influence the scope of the EIS.
