and signature, certifying the accuracy of the content of the report.

- (c) Date of report and beginning and ending dates of the reporting period.
- (d) The values for the operating limits established pursuant to §62.14635 or §62.14640.
- (e) If no deviation from any emission limitation or operating limit that applies to you has been reported, a statement that there was no deviation from the emission limitations or operating limits during the reporting period, and that no monitoring system used to determine compliance with the operating limits was inoperative, inactive, malfunctioning or out of control.
- (f) The highest recorded 3-hour average and the lowest recorded 3-hour average, as applicable, for each operating parameter recorded for the calendar year being reported.
- (g) Information recorded under §62.14700(b)(6) and (c) through (e) for the calendar year being reported.
- (h) If a performance test was conducted during the reporting period, the results of that test.
- (i) If you met the requirements of §62.14680(a) or (b), and did not conduct a performance test during the reporting period, you must state that you met the requirements of §62.14680(a) or (b), and, therefore, you were not required to conduct a performance test during the reporting period.
- (j) Documentation of periods when all qualified CISWI unit operators were unavailable for more than 8 hours, but less than 2 weeks.

## §62.14735 What else must I report if I have a deviation from the operating limits or the emission limitations?

- (a) You must submit a deviation report if any recorded 3-hour average parameter level is above the maximum operating limit or below the minimum operating limit established under this subpart, if the bag leak detection system alarm sounds for more than 5 percent of the operating time for any 6-month reporting period, or if a performance test was conducted that yielded results that deviated from any emission limitation.
- (b) The deviation report must be submitted by August 1 of that year for data collected during the first half of

the calendar year (January 1 to June 30), and by February 1 of the following year for data you collected during the second half of the calendar year (July 1 to December 31).

#### § 62.14740 What must I include in the deviation report?

In each report required under §62.14735, for any pollutant or parameter that deviated from the emission limitations or operating limits specified in this subpart, include the six items described in paragraphs (a) through (f) of this section.

- (a) The calendar dates and times your unit deviated from the emission limitations or operating limit requirements.
- (b) The averaged and recorded data for those dates.
- (c) Duration and causes of each deviation from the emission limitations or operating limits and your corrective actions
- (d) A copy of the operating limit monitoring data during each deviation and any test report that documents the emission levels.
- (e) The dates, times, number, duration, and causes for monitoring downtime incidents (other than downtime associated with zero, span, and other routine calibration checks).
- (f) Whether each deviation occurred during a period of startup, shutdown, or malfunction, or during another period.

# § 62.14745 What else must I report if I have a deviation from the requirement to have a qualified operator accessible?

- (a) If all qualified operators are not accessible for two weeks or more, you must take the two actions in paragraphs (a)(1) and (2) of this section.
- (1) Within 10 days of each deviation, you must submit a notification that includes the three items in paragraphs (a)(1)(i) through (iii) of this section.
- (i) A statement of what caused the deviation.
- (ii) A description of what you are doing to ensure that a qualified operator is accessible.
- (iii) The date when you anticipate that a qualified operator will be available.

#### § 62.14750

- (2) Submit a status report to the Administrator every 4 weeks that includes the three items in paragraphs (a)(2)(i) through (iii) of this section.
- (i) A description of what you are doing to ensure that a qualified operator is accessible.
- (ii) The date when you anticipate that a qualified operator will be accessible.
- (iii) Request approval from the Administrator to continue operation of the CISWI unit.
- (b) If your unit was shut down by the Administrator, under the provisions of §62.14625(b)(2), due to a failure to provide an accessible qualified operator, you must notify the Administrator that you are resuming operation once a qualified operator is accessible.

#### § 62.14750 Are there any other notifications or reports that I must submit?

You must submit notifications as provided by 40 CFR 60.7.

#### §62.14755 In what form can I submit my reports?

Submit initial, annual, and deviation reports electronically or in paper format, postmarked on or before the submittal due dates.

### $\S 62.14760$ Can reporting dates be changed?

If the Administrator agrees, you may change the semiannual or annual reporting dates. See 40 CFR 60.19(c) for procedures to seek approval to change your reporting date.

AIR CURTAIN INCINERATORS THAT BURN 100 PERCENT WOOD WASTES, CLEAN LUMBER AND/OR YARD WASTE

#### § 62.14765 What is an air curtain incinerator?

An air curtain incinerator operates by forcefully projecting a curtain of air across an open chamber or open pit in which combustion occurs. Incinerators of this type can be constructed above or below ground and with or without refractory walls and floor. (Air curtain incinerators are different from conventional combustion devices which typically have enclosed fireboxes and controlled air technology such as mass

burn, modular, and fluidized bed combustors.)

### §62.14770 When must I achieve final compliance?

If you plan to continue operating, then you must achieve final compliance by October October 4, 2004. It is unlawful for your air curtain incinerator to operate after October 4, 2004 if you have not achieved final compliance. An air curtain incinerator that continues to operate after October 4, 2004 without being in compliance is subject to penalties.

#### § 62.14795 How do I achieve final compliance?

For the final compliance, you must complete all equipment changes and retrofit installation control devices so that, when the affected air curtain incinerator is placed into service, all necessary equipment and air pollution control devices operate as designed and meet the opacity limits of §62.14815.

# § 62.14805 What must I do if I close my air curtain incinerator and then restart it?

- (a) If you close your incinerator but will reopen it prior to the final compliance date in this subpart, you must achieve final compliance by October 4, 2004.
- (b) If you close your incinerator but will restart it after October 4, 2004, you must have completed any needed emission control retrofits and meet the opacity limits of §62.14815 on the date your incinerator restarts operation.
- (c) You are subject to the operating permit requirements of title V of the CAA and 40 CFR part 70 or 71 until you close your air curtain incinerator and at the time you restart it.

# §62.14810 What must I do if I plan to permanently close my air curtain incinerator and not restart it?

If you plan to permanently close your incinerator rather than comply with this subpart, you must submit a closure notification, including the date of closure, to the Administrator by March 31, 2004. In addition, while still in operation, your air curtain incinerator is subject to the same requirement
