Pursuant to this plan, revised regulations for the control of volatile organic compound emissions were submitted by the Secretary of the Kansas Department of Health and Environment on January 6, 1988. In numerous instances, the revised Kansas regulations provide for departmental discretion to approve compliance plans and test methods which are alternatives to the EPA reference methods. EPA approves these regulations with the understanding that all such alternative compliance plans and test methods must be submitted to EPA, and approved, as individual SIP revisions. In the absence of such approval, the enforceable requirements of the SIP shall be the emission limits or reduction requirements stated in the regulations. Also, the Kansas

regulations contain provisions whereby testing is required when the facility intends to demonstrate compliance by improved operations or new emission controls, yet no test procedures are specified. Examples of such provisions are transfer efficiency (TE) and vapor processing systems. Test methods which are developed by the state must be approved by EPA before facilities may demonstrate compliance through alternative controls and/or TE.

§ 52.876 Compliance schedules.

(a) The requirements of § 51.260 and of § 51.15(a)(2) of this chapter as of September 19, 1976 (40 FR 43216), are not met since the plan does not contain legally enforceable compliance schedules setting forth the dates by which all stationary sources or categories of such sources must be in compliance with applicable portions of the control strategy. Paragraphs C and D of Kansas Regulation 28-19-9 specify that all sources not in compliance must submit an acceptable compliance schedule within 120 days after receiving notification from the State. There are no assurances that all sources will be notified by the State in a timely manner,

therefore, paragraphs C and D of Regulation 28-19-9 are disapproved.

(b) *Federal compliance schedule.* (1) Except as provided in paragraph (2) of this paragraph (b), the owner or operator of any stationary source subject to any emission regulation which is part of the approved plan shall be in compliance on or before January 31, 1974.

(i) Any owner or operator in compliance with any such applicable regulation on the effective date of this paragraph shall certify such compliance to the Administrator no later than December 31, 1972.

(ii) Any owner or operator who achieves compliance with any such applicable regulation after the effective date of this paragraph shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(2) An owner or operator of a stationary source subject to any emission regulation approved by the Administrator may no later than December 31, 1972, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with such regulation as expeditiously as practicable, but no later than July 31, 1975. The compliance schedule shall provide for periodic increments of progress toward compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but not be limited to: Letting of necessary contracts for construction or process changes, if applicable; initiation of construction; completion and startup of control systems; performance tests; and submittal of performance test analysis and results.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(4) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(c) *State compliance schedules.* (1) [Reserved]
