

intended for use by children, or information as to whether the chemical substance is used in or on any consumer products intended for use by children is not readily obtainable.

(C) The estimated percentage, rounded off to the closest 10%, of the submitter's site's total production volume of the reportable chemical substance associated with each commercial and consumer product category. Where a particular commercial and consumer product category accounts for 5% or less of the total production volume of a reportable chemical substance, the percentage must not be rounded off to zero % if the production volume attributable to that commercial and consumer product category is 300,000 lbs. (136,077 kg) or more during the reporting year. Instead, in such a case, submitters must report the percentage, rounded off to the closest 1%, of the submitter's site's total production volume of the reportable chemical substance associated with the particular commercial and consumer product category.

(D) Where the reportable chemical substance is used in commercial or consumer products, the estimated typical maximum concentration, measured by weight, of the chemical substance in each commercial and consumer product category reported under paragraph (c)(4)(ii)(A) of this section. For each substance in each commercial and consumer product category reported under paragraph (c)(4)(ii)(A) of this section, submitters must select from among the ranges of concentrations listed in the table in paragraph (c)(3)(vii) of this section and report the corresponding code (i.e., M1 through M5).

#### **§ 710.53 When to report.**

All information reported to EPA in response to the requirements of this subpart must be submitted during an applicable submission period. The first submission period is from August 25, 2006, to December 23, 2006. Subsequent recurring submission periods are from August 25 to December 23 at 4-year intervals after the first submission period. Any person described in § 710.48(a) must report during each submission period for each chemical substance de-

scribed in § 710.45 that the person manufactured (including imported) during the preceding calendar year (i.e., the "reporting year").

#### **§ 710.55 Duplicative reporting.**

(a) *With regard to section 8(a) rules.* Any person subject to the requirements of this part who previously has complied with reporting requirements of a rule under section 8(a) of the Act by submitting the information described in § 710.52 for a chemical substance described in § 710.45 to EPA, and has done so within 1 year of the start of a submission period described in § 710.53, is not required to report again on the manufacture of that substance at that site during that submission period.

(b) *With regard to importers.* This part requires that only one report be submitted on each import transaction involving a chemical substance described in § 710.45. When two or more persons are involved in a particular import transaction and each person meets the Agency's definition of "importer" as set forth in §§ 710.3 and 704.3 of this chapter, they may determine among themselves who should submit the required report; if no report is submitted as required under this part, EPA will hold each such person liable for failure to report.

#### **§ 710.57 Recordkeeping requirements.**

Each person who is subject to the reporting requirements of this subpart must maintain records that document any information reported to EPA. Records relevant to reporting during a submission period must be retained for a period of 5 years beginning with the effective date of that submission period.

#### **§ 710.58 Confidentiality.**

(a) Any person submitting information under this subpart may assert a business confidentiality claim for the information at the time it is submitted. These claims will apply only to the information submitted with the claim. New confidentiality claims, if necessary, must be asserted with regard to information submitted during the next submission period. Guidance for asserting confidentiality claims is provided in the instruction booklet
