National Institutes of Health**Report on Bioassay of 4,4'-Methylenebis(N,N-Dimethyl)Benzenamine for Possible Carcinogenicity; Availability**

4,4'-Methylenebis(N,N-dimethyl)benzenamine (CAS 101-61-1) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Testing Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay for the possible carcinogenicity of 4,4'-methylenebis(N,N-dimethyl)benzenamine was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an intermediate in the manufacture of dyes. 4,4'-Methylenebis(N,N-dimethyl)benzenamine was administered in the feed, at either of two concentrations, to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay, 4,4'-methylenebis(N,N-dimethyl)benzenamine was carcinogenic in Fischer 344 rats, inducing thyroid follicular-cell carcinomas in both males and females. Administration of the compound was carcinogenic in female B6C3F1 mice, inducing liver neoplasms. There was no conclusive evidence that 4,4'-methylenebis(N,N-dimethyl)benzenamine was carcinogenic in male B6C3F1 mice.

Single copies of the report, Bioassay of 4,4'-Methylenebis(N,N-dimethyl)benzenamine for Possible Carcinogenicity (T.R. 186), are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Maryland 20205.

Lakeview District Office Oregon; Restriction of Use of Motorized Vehicles on Public Lands

Notice is hereby given that certain public lands in the Fossil Lake area are closed to all motorized vehicles in accordance with the provisions of 43 CFR Part 8340. These restrictions do not apply to military, fire, emergency or law enforcement vehicles or to Federal or other Government vehicles while being used for official or emergency purposes, or vehicles authorized by permit or contract.

The areas affected by this designation are located approximately eleven miles northeast of Christmas Valley, Oregon. The legal description of the closed lands is:

Township 26 South, Range 19 East,
Willamette Meridian

Section 7, NE¼SE¼, S¼SE¼
Section 8, S¼NW¼, S¼
Section 9, S¼, S¼NW¼, S¼NE¼,
NE¼NE¼
Section 10, All
Section 11, All
Section 14, All
Section 15, All
Section 17, All
Section 18, E½
Section 21, All
Section 22, All
Section 23, All
Total Acres 6550

The use of these public lands by vehicles in the past has destroyed vertebrate fossils that have significant scientific value. After consultation with various universities, museums and individuals throughout the United States, a motorized vehicle closure was determined to be necessary to protect the paleontological values (fossils) from further destruction and disturbance. The need for the original vehicle closure was discussed at formal public meetings for the Christmas Lake Planning Unit and informally with various off-road vehicle clubs using the area for recreation. New inventory work completed in the area during the period of restriction and further informal consultation with universities, museums and individuals, has shown the need of the restriction to protect paleontological value (fossils). In addition, significant cultural values (archeological) were identified which also are in need of protection from further disturbance and destruction.

The restriction is effective immediately. Maps showing the areas
