

Dated: March 30, 1989.

William K. Reilly,
Administrator.

For the reasons set out in the preamble, Title 40 of the Code of Federal Regulations is amended as follows:

PART 302—DESIGNATION, REPORTABLE QUANTITIES, AND NOTIFICATION

1. The authority citation for Part 302 continues to read as follows:

Authority: Sec. 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9602; secs. 311 and 501(a) of the Federal Water Pollution Control Act, 33 U.S.C. 1321 and 1361.

2. Section 302.5 is amended by revising paragraph (a) to read as follows:

§ 302.5 Determination of reportable quantities.

(a) *Listed hazardous substances.* The quantity listed in the column "Final RQ" for each substance in Table 302.4, or in Appendix B to Table 302.4, is the reportable quantity (RQ) for that substance. The RQs in Table 302.4 are in units of pounds based on chemical toxicity, while the RQs in Appendix B to Table 302.4 are in units of curies based on radiation hazard. Whenever the RQs in Table 302.4 and Appendix B to the table are in conflict, the lowest RQ shall apply.

3. Section 302.6 is amended by redesignating paragraph (c) as (d) and by revising paragraph (b) and the newly designated (d) and by adding a new paragraph (c) to read as follows:

§ 302.6 Notification requirements.

(b) Releases of mixtures or solutions of

(1) Hazardous substances, except for radionuclides, are subject to this section's notification requirements only where a component hazardous substance of the mixture or solution is released in a quantity equal to or greater than its RQ.

(2) Radionuclides are subject to this section's notification requirements only in the following circumstances:

(i) If the identity and quantity (in curies) of each radionuclide in a released mixture or solution is known, the ratio between the quantity released (in curies) and the RQ for the radionuclide must be determined for each radionuclide. The only such releases subject to this section's notification requirements are those in which the sum of the ratios for the

radionuclides in the mixture or solution released is equal to or greater than one.

(ii) If the identity of each radionuclide in a released mixture or solution is known but the quantity released (in curies) of one or more of the radionuclides is unknown, the only such releases subject to this section's notification requirements are those in which the total quantity (in curies) of the mixture or solution released is equal to or greater than the lowest RQ of any individual radionuclide in the mixture or solution.

(iii) If the identity of one or more radionuclides in a released mixture or solution is unknown (or if the identity of a radionuclide released by itself is unknown), the only such releases subject to this section's notification requirements are those in which the total quantity (in curies) released is equal to or greater than either one curie or the lowest RQ of any known individual radionuclide in the mixture or solution, whichever is lower.

(c) The following categories of releases are exempt from the notification requirements of this section:

- (1) Releases of those radionuclides that occur naturally in the soil from land holdings such as parks, golf courses, or other large tracts of land;
- (2) releases of radionuclides occurring naturally from the disturbance of land for purposes other than mining, such as for agricultural or construction activities;
- (3) releases of radionuclides from the dumping of coal and coal ash at utility and industrial facilities with coal-fired boilers; and
- (4) releases of radionuclides from coal and coal ash piles at utility and industrial facilities with coal-fired boilers.

(d) Except for releases of radionuclides, notification of the release of an RQ of solid particles of antimony, arsenic, beryllium, cadmium, chromium, copper, lead, nickel, selenium, silver, thallium, or zinc is not required if the mean diameter of the particles released is larger than 100 micrometers (0.004 inches).

§ 302.4 [Amended]

4. In Section 302.4, Table 302.4 is amended by revising the entry for "Radionuclides" under the "Final RQ" column for "Pounds (kg)" to read: "§."

5. In Section 302.4, Table 302.4 is amended by revising the footnote at the end of the table explaining "§" to read: "§—the adjusted RQs for radionuclides may be found in Appendix B to this table."

6. In Section 302.4, Table 302.4 is amended by adding the following table as Appendix B:

APPENDIX B—RADIONUCLIDES

Radionuclide	Atomic Number	Final RQ Ci (Bq)
Radionuclides*		1& (3.7E 10)
Actinium-224	89	100 (3.7E 12)
Actinium-225	89	1 (3.7E 10)
Actinium-226	89	10 (3.7E 11)
Actinium-227	89	0.001 (3.7E 7)
Actinium-228	89	10 (3.7E 11)
Aluminum-26	13	10 (3.7E 11)
Americium-237	95	1000 (3.7E 13)
Americium-238	95	100 (3.7E 12)
Americium-239	95	100 (3.7E 12)
Americium-240	95	10 (3.7E 11)
Americium-241	95	0.01 (3.7E 8)
Americium-242m	95	0.01 (3.7E 8)
Americium-242	95	100 (3.7E 12)
Americium-243	95	0.01 (3.7E 8)
Americium-244m	95	1000 (3.7E 13)

ci—Curie. The curie represents a rate of radioactive decay. One curie is the quantity of any radioactive nuclide which undergoes 3.7E 10 disintegrations per second.

Bq—Becquerel. The becquerel represents a rate of radioactive decay. One becquerel is the quantity of any radioactive nuclide which undergoes one disintegration per second. One curie is equal to 3.7E 10 becquerel.

*—Final RQs for all radionuclides apply to chemical compounds containing the radionuclides and elemental forms regardless of the diameter of pieces of solid material.

&—The adjusted RQ of one curie applies to all radionuclides not otherwise listed. Whenever the RQs in Table 302.4 and this appendix to the table are in conflict, the lowest RQ shall apply. For example, uranyl acetate and uranyl nitrate have adjusted RQs shown in Table 302.4 of 100 pounds, equivalent to about one-tenth the RQ level for uranium-238 listed in this appendix.

E—Exponent to the base 10. For example, 1.3E 2 is equal to 130 while 1.3E 3 is equal to 1300.

m—Signifies a nuclear isomer which is a radionuclide in a higher energy metastable state relative to the parent isotope.

φ—Notification requirements for releases of mixtures or solutions of radionuclides can be found in Section 302.6(b) of this rule. Final RQs for the following four common radionuclide mixtures are provided: radium-226 in secular equilibrium with its daughters (0.053 curie); natural uranium (0.1 curie); natural uranium in secular equilibrium with its daughters (0.052 curie); and natural thorium in secular equilibrium with its daughters (0.011 curie).

BILLING CODE 6560-50

**ENVIRONMENTAL PROTECTION
AGENCY****40 CFR Part 355**

[FRL-3574-2]

**Reportable Quantity Adjustment—
Radionuclides****AGENCY:** U.S. Environmental Protection Agency (EPA).**ACTION:** Technical amendment.

SUMMARY: Sections 103(a) and 103(b) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, require that persons in charge of vessels or facilities from which a hazardous substance has been released within a 24-hour period in a quantity equal to or greater than its reportable quantity immediately notify the National Response Center of the release. As discussed elsewhere in today's *Federal Register*, the U.S. Environmental Protection Agency (EPA) has decided to exempt from CERCLA notification requirements the following four categories of releases of radionuclides: (1) Releases of radionuclides that occur naturally in soil from land holdings such as parks, golf courses, or other large tracts of land; (2) releases of radionuclides occurring naturally from the disturbance of land for purposes other than mining, such as for agricultural or construction activities; (3) releases of radionuclides from the dumping of coal and coal ash at utility and industrial facilities with coal-fired boilers; and (4) releases of radionuclides from coal and coal ash piles at utility and industrial facilities with coal-fired boilers. These releases also are exempt from the reporting requirements of section 304 of the Emergency Planning and Community Right to Know Act (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Under SARA Section 304(a)(3), releases

of radionuclides must be reported to the community emergency coordinator for the Local Emergency Planning Committee (LEPC) and to the State Emergency Response Commission (SERC) of any State that is likely to be affected by the release, if the release occurs at a facility at which a hazardous chemical is produced, used, or stored, and if notification of the release is required under section 103(a) of CERCLA. Because of today's exemptions of certain radionuclide releases from CERCLA notification requirements, as described above, such exempted releases also are exempt from the reporting requirements of section 304 of SARA.

This Technical Amendment also adds language to 40 CFR 355.40(a)(2) that was inadvertently deleted in publishing the final rule adjusting Threshold Planning Quantities for Extremely Hazardous Substances (52 FR 13396; April 22, 1987). This amendment adds paragraph 355.40(a)(2)(iv) that provides that releases exempted from CERCLA section 103(a) reporting by CERCLA section 103(e) (which applies to the application, handling, or storage of a pesticide registered under the Federal Insecticide, Fungicide, and Rodenticide Act) also are exempt from reporting under SARA section 304. In addition, this Technical Amendment clarifies the language in paragraph (a)(2)(v). Section 355.40(a)(2)(v) exempts from section 304 reporting any occurrence not meeting the definition of release under section 101(22) of CERCLA. Such occurrences are also exempt from reporting under CERCLA Section 103(a).

EFFECTIVE DATE: July 24, 1989.

FOR FURTHER INFORMATION CONTACT: Ms. Pamela Harris, Project Officer, Response Standards and Criteria Branch, Emergency Response Division (WH-548B), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or the RCRA/Superfund Hotline, 1-800/424-9346; in

Washington DC metropolitan area, 1-202/382-3000.

Dated: May 11, 1989.

Jonathan Z. Cannon,
Acting Assistant Administrator.

For the reasons set forth above, Title 40 of the Code of Federal Regulations is amended as follows:

**PART 355—EMERGENCY PLANNING
AND NOTIFICATION**

1. The authority citation for Part 355 is revised to read as follows:

Authority: 42 U.S.C. 11002 and 11048.

2. Section 355.40 is amended by adding paragraphs (a)(2)(v) and (a)(2)(vi), and by revising paragraph (a)(2)(iv) to read as follows ((a)(2) introductory text is republished):

§ 355.40 Emergency release notification.

(a) Applicability.

(1) * * *

(2) This section does not apply to:

* * *

(iv) Any release of a pesticide product exempt from CERCLA section 103(a) reporting under section 103(e) of CERCLA;

(v) Any release not meeting the definition of release under Section 101(22) of CERCLA, and therefore exempt from Section 103(a) reporting; and

(vi) Any radionuclide release which occurs (A) naturally in soil from land holdings such as parks, golf courses, or other large tracts of land; (B) naturally from the disturbance of land for purposes other than mining, such as for agricultural or construction activities; (C) from the dumping of coal and coal ash at utility and industrial facilities with coal-fired boilers; and (D) from coal and coal ash piles at utility and industrial facilities with coal-fired boilers.
