Address 1: 4330 East West Highway  Address 2:  City: Bethesda  Representing: U.S. Consumer Product Safety  Commission Saff  Country: U.S.A.  Consumer Product Safety  Commission Saff  Country: U.S.A.  Consumer Product Safety  Country: U.S.A.  Date: 09/07/1999  COR EACH PROPOSAL, PLEASE COMPLETE EACH OF THE FOLLOWING:  1.a)Document Title: National Electrical Code  b) Article/Section: Section 230-XX in Part E  (incw)  2. Proposal recommends: (Check one):		Last Name: King
Address 2: City: Bethesda Representing: U.S. Consumer Product Safety Country: U.S. A.  Country: U.S. A.  Country: U.S. A.  Date: 09/07/1999  FOR EACH PROPOSAL, PLEASE COMPLETE EACH OF THE FOLLOWING:  1.a)Document Title: National Electrical Code b) Article/Section: Section 230-XX in Part E (new) 2. Proposal recommends: (Check one): Anew text revised text deleted tex  3. Proposal (include proposed new or revised wording, or identification of wording to be deleted): Add new Section 230-XX as follows: 230-XX. Replacement of Service Equipment in Dwelling Units. When service equipment in dwelling units is replaced, each existing 125-volt, single-phase, 15- and 20-ampere lighting and appliance branch circuit shall be individually protected by an arc-fault circuit interrupter.  FPN: See Section 210-12(c). (Editorial note: Section 210-12(c) is a proposed new paragraph, submitted separately to the CMP for Article 210, to complement this proposed new Section 230-XX. For information purposes, proposed new Section 210-12(c) reads as follows: Lighting and Appliance Branch Circuits. Each existing 125-volt, single-phase, 15- and 20-ampere lighting and appliance branch circuit shall be individually protected by an arc-fault circuit-interrupter when the service equipment is replaced.)  4. Statement of Problem and Substantiation for Proposal: According to a study conducted by the U.S. Consumer Product Safety Commission (CPSC), "Residential Electrical Distribution System Fires", Smith & McCoskrie, 1987, fires originating in branch circuit wiring predominately occurred in dwellings over 20 years old, with the highest rates of fires occurring in dwellings over 40 years old. Older dwellings are frequently upgraded with replacement service equipment to accomodate an increase in the service rating to supply additional appliance and equipment loads. However, often times, the existing lighting and appliance branch circuit conductors are		Telephone#: 301-504-0508, ext. 1296
