

The following memorandum was signed on December 18, 1995.

MEMORANDUM

SUBJECT: Aerospace Manufacturing and Rework Facilities NESHAP

FROM: Bruce C. Jordan, Director  
Emission Standards Division (MD-13)

TO: See Below

This memorandum is being sent to alert you to a correction that OAQPS anticipates making soon to the Aerospace Manufacturing and Rework Facilities NESHAP rule that was promulgated on July 31, 1995. This correction may have an impact on your region's inspection and enforcement strategies regarding the applicable sources.

In paragraph V.H.(2)(a) of the preamble to the proposed aerospace NESAHP, the Agency stated its intent to override the General Provisions and to require existing sources to submit the initial notification no later than 12 months before the final compliance date. The rule currently defaults to the 120 days for the initial notification within the General Provisions, 40 CFR part 63 subpart A. We expect to make the necessary correction to reflect the original intent stated in the preamble of the proposed rule in the near future.

If you have any questions about this issue, please contact James Szykman of my staff at (919) 541-2452.
