

Dear Mr. Coy,

I see on my message board the SEC is seeking public comment on its proposal to curb naked shorting. I think it would go a long way in putting credibility back in the stock market.

I also wish you would reinstate the 70 year old uptick rule. I now hate to advertise my position in a stock by putting a stop under it. The hedge-funds (I call them wolf packs) use it to take advantage of the average investor.
