AQUACULTURE SITE - A set of pools of water and related structures used for producing finfish, shellfish, or aquatic plants.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of AQUACULTURE SITE is the area encompassing the RESERVOIRS, BUILDINGS, and other associated structures.

Catoctin Furnace, MD
Cecilia, LA
Hayward, WI
Holmesville, OH

ARCHEOLOGICAL SITE/RUIN - An area of scientific interest that contains the material remains of past human activities

ATTRIBUTE/ATTRIBUTE VALUE LIST

Archeological Site/Ruin Category	Form or category
Archeological Site	Study area for past human life and activity
Cliff Dwelling	A habitat built in the recesses of high vertical or over-hanging faces of rock
Petroglyph	Ancient carving or engraving on rock
Pictograph	Ancient line drawing or painting on rock
Ruins	Deteriorated structural remains of historic importance
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of **ARCHEOLOGICAL SITE/RUIN** is the extent of the area containing the material remains.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional			
2-dimensional			

Special Conditions:

If ARCHEOLOGICAL SITE/RUIN has Archeological Site/Ruin Category = Petroglyph or Pictograph,
 Then ARCHEOLOGICAL SITE/RUIN is represented as a 0-dimensional basic feature object.

If ARCHEOLOGICAL SITE/RUIN has Archeological Site/Ruin Category = Ruins or Archeological Site,
 and is < 0.06" along the shortest axis,
 Then ARCHEOLOGICAL SITE/RUIN is represented as a 0-dimensional basic feature object.

If ARCHEOLOGICAL SITE/RUIN has Archeological Site/Ruin Category = Cliff Dwelling and is <
 0.0375" along the longest axis,
 Then ARCHEOLOGICAL SITE/RUIN is represented as a 0-dimensional basic feature object.

If ARCHEOLOGICAL SITE/RUIN has Archeological Site/Ruin Category = Cliff Dwelling and is ≥
 0.0375" along the longest axis,
 Then ARCHEOLOGICAL SITE/RUIN is represented as a 1-dimensional basic feature object.

If ARCHEOLOGICAL SITE/RUIN has Archeological Site/Ruin Category = Ruins or Archeological Site,
 and is ≥ 0.06" along the longest axis,
 Then ARCHEOLOGICAL SITE/RUIN is represented as a 2-dimensional basic feature object.

DATA EXTRACTION

Capture Conditions

If ARCHEOLOGICAL SITE/RUIN is controlled and protected by a government or private agency, and that agency has given USGS permission to capture ARCHEOLOGICAL SITE/RUIN,
Then capture.

Attribute Information

Source Interpretation Guidelines

All

ARCHEOLOGICAL SITE/RUIN, with Archeological Site/Ruin Category = Ruins, can be individual structures or an area of ruined structures. If the individual structural outlines are indefinite, and present few complete outlines, capture the general ruin site as 2-dimensional; otherwise capture each structure by its structural ruin outline, either 0-dimensional or 2-dimensional.

Approval of the administering agency is mandatory before any ARCHEOLOGICAL SITE/RUIN is captured.

Graphic

In the past, the label "Ruins" has been used to identify landmark structures in a state of disrepair, in addition to ruins which are truly of historical importance. It is not possible to tell these two situations apart from the graphic. All features labeled "Ruins" need to be further identified. Those features which are actually deteriorated structures, of no historic importance, will be recategorized as the appropriate feature.

Heiau, in Hawaii, are historic temples or religious sites and are captured as ARCHEOLOGICAL SITE/RUIN with the approval of the National Park Service.

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Retain existing features only if capture conditions are met.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

TBD

Placement

TBD

EXAMPLES

- Andersonville, OH (Mound City Group National Monument)
- Cochiti Dam, NM (Pueblo Ruins)
- Hog Island, VA (Kingsmill Plantation Site)
- Huntoon Valley, NV-CA
- Monks Mound, IL (Cahokia Mounds State Park)
- Selah, WA (Petroglyphs)

ATHLETIC FIELD - A defined, but often unbounded, open area constructed and maintained for the purpose of holding sporting events and activities.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of ATHLETIC FIELD is the perimeter of the open area maintained for a sporting activity or event, including associated structures within the playing field.

REPRESENTATION RULES

Special Conditions:

DATA EXTRACTION

Capture Conditions

If ATHLETIC FIELD is not located within PARK,
Then capture.

Attribute Information

Source Interpretation Guidelines

All

Do not capture a shooting range on a military reservation as ATHLETIC FIELD. See RESERVATION.

Capture shooting/firing ranges not on military reservations, including those used for archery, rifle, pistol, and skeet shooting; ball parks; equestrian areas; and polo fields as ATHLETIC FIELD.

Do not capture individual ball diamonds or tennis courts as ATHLETIC FIELD.

Graphic

Do not capture areas labeled "Recreation Area" as ATHLETIC FIELD. See PARK.

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Delete existing features.

DATA EXTRACTION OR PRODUCT GENERATION at 1:24,000 scale

Inclusion Conditions

All required

Generalization

PRODUCT GENERATION at 1:24,000 scale

Symbolization

Symbol#: ATHLETIC_FIELD_A001
 Dimension: 2

<u>Attribute</u>	<u>Value</u>	<u>Symbol Specs</u>	<u>Type Specs</u>
Name	(Alphanumeric) or Unspecified	<u>Dashed Area Perimeter</u> Color: Black Lineweight: 0.008" Dash Length: 0.05" Dash Spacing: 0.02" Screen: 50%, 150-line biangle	Label and Name: Color: Black Style: UL CAPS or C/lc Size: 6-7 Spacing: 0

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If ATHLETIC FIELD symbol_coalesces BUILDING, BOUNDARY LINE, RAILWAY, or ROAD, Then suppress the dashed area perimeter where they coalesce and extend remaining segments to meet the other feature.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

If ATHLETIC FIELD is associated with a school or university, Then do not show label.

Placement

TBD

EXAMPLES

Abilene East, TX (Ball park)
Albuquerque West, NM
Annapolis, MD (Rifle and pistol ranges)
Beaver Creek Hills, WY (Polo field and landing strip)
Beverly Hills, CA
Brooklyn, NY
Buffalo NE, NY
Burbank, CA (Equestrian area)
Cheyenne North, WY (Baseball park)
Ellensburg South, WA (Baseball park)
Fort Hood, TX (Ball park)
Frederickson, WA (Skeet range, rifle range)
Louisville West, KY-IN
Tarpon Springs, FL
Thatcher, AZ

BOARDWALK - A promenade, usually constructed of planks.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required

2-dimensional		≥ 0.02"	

Special Conditions:

DATA EXTRACTION

Capture Conditions

If BOARDWALK is along a beach or waterfront,
Then capture.

Attribute Information

Source Interpretation Guidelines

All

When determining whether to collect BOARDWALK as a 1-dimensional or 2-dimensional feature, the predominant width of the entire feature should be assessed. Minor structural projections should be disregarded when determining feature width.

If BOARDWALK is captured to scale, minor structural projections, such as entryways onto BOARDWALK or onto BEACH, should be disregarded, and the generalized outline should be captured.

Ocean City, NJ (1-D and 2-D BOARDWALKS)

BUILDING - A permanent construction that is roofed and usually walled.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Building Type	Function or purpose
Arena	
Armory	
Auditorium	
Capitol	
City Hall	
Community Center	
Courthouse	
Firehouse	
Grain Elevator	
Grange Hall	
Hospital	
House of Worship	
Library	
Medical Center	
Memorial	
Museum	
Observatory	
Post Office	
Radio Facility	
Railroad Station	
Rain Shed	A roofed structure in Hawaii for collecting and storing rain water
School	

Stadium	A large usually unroofed building with tiers of seats for spectators at sports events.
Substation	
Town Hall	
Unspecified	The value is not known and is not required
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of BUILDING is the extent of the structure.

1-dimensional			
2-dimensional			≥0.05"

Special Conditions:

DATA EXTRACTION

Capture Conditions

If BUILDING is outside of BUILT-UP AREA and houses human activity,
 Or
 If BUILDING is outside of BUILT-UP AREA, and is not intended for human activity, and is not smaller than the average local dwelling,
 Or
 If BUILDING is outside of BUILT-UP AREA and is landmark,
 Or
 If BUILDING is within BUILT-UP AREA and can be described as one of the following public-use BUILDINGS: arena, auditorium, armory, capitol, city hall, community center, courthouse, firehouse, hospital, house of worship, library, medical center, memorial, museum, post office, railroad station, school, stadium, or town hall,
 Or
 If BUILDING is within BUILT-UP AREA and is ≥ 0.02 square inches (80,000 square feet at 1:24,000-scale),
 Then capture.

Attribute Information

If BUILDING is a church, cathedral, mosque, synagogue, convent, temple, shrine, monastery, or other similar institution,
 Then Building Type = House of Worship.

If BUILDING is a public or private school, college, or university,
 Then Building Type = School.

If BUILDING has radio antennae mounted on it and the primary function of BUILDING is as a Radio Facility,
Then Building Type = Radio Facility.

Source Interpretation Guidelines

All

In congested areas, some buildings may be collected to size and other buildings may be omitted, displaced, or reduced in size. The following three paragraphs deal with BUILDING guidance in congested areas.

If a block has one or more relatively large buildings and several smaller buildings, capture larger buildings and omit smaller buildings.

If building symbols touch or overlap, displace or proportionally adjust buildings so that the symbol pattern approximates the true ground pattern.

In a row of buildings, where not all buildings can be portrayed, capture the first and last building in true position, then capture as many other buildings as will fit in-between, displacing buildings as necessary.

Collect Houses of Worship and Schools that are easily identifiable and occupy separate buildings with some open ground. Buildings used for worship services, but not designed as Houses of Worship, are not captured as Houses of Worship.

Graphic

Revision - General

If BUILDING is captured to scale, minor structural projections $< 0.02'' \times 0.02''$ should be disregarded, and the generalized outline should be captured.

When an educational institution consists of a group of BUILDINGS, capture only the administration building as BUILDING, with Building Type = School. (If it is not clear which BUILDING is the administration building, then capture the largest BUILDING as BUILDING, with Building Type = School). The remainder of the BUILDINGS will be captured as BUILDING, with Building Type to indicate any specialized use (other than school). If there is no other specialized use, they will be captured as BUILDING with Building Type = Unspecified.

When a religious institution consists of a group of BUILDINGS, capture only the main house of worship as BUILDING, Building Type = House of Worship. The remainder of the BUILDINGS will be captured as BUILDINGS, with Building Type to indicate any specialized use (other than House of Worship). If there is no other specialized use, they will be captured as BUILDING, Building Type =

Unspecified.

Revision - Standard

Revision - Limited

Do not capture BUILDING within areas that are collected as BUILT-UP AREA. Delete existing buildings inside BUILT-UP AREA.

Capture BUILDING only in areas where BUILT-UP AREA is not captured. Newly captured buildings will have Building Type = Unspecified. Existing buildings will be given Building Type = Unspecified.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If BUILDING symbol_coalesces 1-D BOARDWALK, BRIDGE, CANAL/DITCH, DAM/WEIR, EMBANKMENT, FENCE LINE, FISH LADDER, FLUME, GATE, LOCK CHAMBER, PIER/BREAKWATER/JETTY, PIPELINE with Relationship to Surface = At or Near, RACETRACK, RAILWAY, RECREATIONAL SLIDE, ROAD, RUNWAY/APRON/TAXIWAY, WHARF, Then symbol_displace to clear by 0.005" in the direction normal to the linear feature. [This rule will require further development. (If a linear feature has an irregular course like STREAM/RIVER, TRAIL, then linear feature is displaced rather than the BUILDING...need to adjust STREAM/RIVER and TRAIL)]

If BUILDING is 0-D and symbol_coalesces BOUNDARY LINE, Then symbol_displace to clear by 0.005" in the direction normal to the BOUNDARY LINE. (If BUILDING coincides BOUNDARY LINE, do not displace)

If BUILDING is 0-D and symbol_coalesces projection line, Then symbol_displace to clear by 0.005".

If BUILDING is 0-D and coincides a horizontal control station,
Then suppress_symbol. (Retain label if appropriate)

If BUILDING symbol_coalesces horizontal control station,
Then symbol_displace.

If BUILDING is 2-D and coincides a horizontal control station,
Then suppress_section.

If BUILDING is 0-D, with Building Type = House of Worship or School, and BUILDING (the cross portion of house of worship symbol, or the pennant portion of the school symbol) coalesces another feature, Then orient_symbol section (the cross portion of the house of worship symbol, or the pennant portion of the school symbol) to halfway along another side of the square. The hierarchy of sides shall be north, east, west, south, 45 degrees at the N.E. corner, 45 degrees at the N.W. corner. If the orientation of a 0-D BUILDING is such that there is no northernmost edge, then the northeastern edge shall be considered to be the northernmost.

If BUILDING is 2-D, with Building Type = House of Worship or School, and BUILDING (the cross portion of the house of worship symbol, or the pennant portion of the school symbol) coalesces another feature, Then orient_symbol section (the cross portion of the house of worship symbol, or the pennant portion of the school symbol) to alternate position. The hierarchy for the alternate position shall be, to the right of the middle of the northernmost side of the area, to the left of the middle of the northernmost side of the area, to the middle of the east, west, south side of the area, 45 degrees at the N.E. corner, 45 degrees at the N.W. corner.

BUILT-UP AREA - An area of intensive use, with much of the land covered by structures.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of BUILT-UP AREA shall be defined by the extent of the area of intensive use.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional			
2-dimensional	> 0		

Special Conditions:

DATA EXTRACTION

Capture Conditions

If BUILT-UP AREA is $\geq 30\%$ built-up, and is ≥ 40 acres in size, and is ≥ 660 feet along the shortest axis, Then capture.

Attribute Information

Source Interpretation Guidelines

All

The limits of BUILT-UP AREA are determined by the relative concentration of buildings and associated intensive use areas, such as parking lots, and the existence of a systematic street pattern. Density of building and associated use areas will vary from densely concentrated areas downtown, to moderately concentrated residential areas where most of the property is developed.

Areas which are $< 30\%$ developed, and which are ≥ 80 acres in size, and are ≥ 660 feet along the shortest axis, will not be collected as BUILT-UP AREA.

If the following features meet capture conditions for that feature, Then do not collect BUILT-UP AREA:

Lake/Pond

Reservoir

2-D Stream/River

2-D Canal/Ditch

Swamp/Marsh

Railway Yard

Park

Athletic Field (other than tracks)

Cemetery

Golf Course

Exhibition Ground

Outdoor Theater

Runway/Apron/Taxiway

All other features are collected based on their individual capture conditions, and BUILT-UP AREA is also collected.

BUILT-UP AREA does not refer to political boundaries and may include incorporated and unincorporated areas as well as military reservations.

Although BUILT-UP AREA limits need not be fixed in relation to linear features, where practical, the limits of BUILT-UP AREA should share the edge with other linear features such as ROADS, RAILWAYS, STREAM/RIVERS, BOUNDARY LINES, etc.

The outline of BUILT-UP AREA should be relatively smooth. It should not be extended to include a

few buildings nor to exclude a few buildings when the smoothness of the edge would be effected. When the perimeter streets are $\geq 30\%$ developed, the BUILT-UP AREA should be extended across the street to include these buildings.

In housing developments where the street network is complete and building development is well underway and can be anticipated that most of the development will be occupied, the area should be included in BUILT-UP AREA.

Narrow strips where there is only a road and buildings along both sides of the road should not be included even if they would connect an adjoining larger area that meets capture conditions.

A large BUILT-UP AREA that is separated from a smaller isolated BUILT-UP AREA, may be extended to include the smaller area, if the smaller area is within 660 feet of the larger BUILT-UP AREA.

Graphic

The minimum allowable size, density criteria, and exclusions for BUILT-UP AREA have been revised. There will be areas on the graphic which are shown with a dense coverage of building symbols, which previously did not meet the minimum requirements for inclusion, but now do. These areas will be captured as BUILT-UP AREA.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If the perimeter of a 2-dimensional CEMETERY symbol_coalesces with another feature symbol, except FENCE LINE, or TRANSMISSION LINE,
 Then suppress dashed area perimeter where they coalesce and extend remaining segments to meet linear features.

If CEMETERY symbol_coalesces RESERVATION,
 Then suppress CEMETERY name and CEMETERY label.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

If Name does not include "Cemetery" or "Cem.",
Then add label in parenthesis after name.

Placement

TBD

EXAMPLES

Cahuilla Mtn., CA
Charlottseville East, VA (Holly Mem. Gardens (Cem.) 2-D)
Charlottseville East, VA (Maplewood Cem. 2-D)
Laguna Beach, CA (Pacific View Memorial Park (Cem.) 2-D)
Lanett North, GA-AL (Lovelace Cem. 0-D)
Laveen, AZ (Cemetery 2-D)
Long Beach, CA (Cem. 2-D)

0-dimensional			
1-dimensional			
2-dimensional	> 0		

Special Conditions:

DATA EXTRACTION

Capture Conditions

If DISTURBED SURFACE cannot be identified as a DISPOSAL SITE or MINE,
Then capture.

Attribute Information

Source Interpretation Guidelines

All

If disturbed area is a mine dump or tailings,
Then do not capture as DISTURBED SURFACE. See DISPOSAL SITE.

If disturbed area is a Quarry, Open Pit, Pit, or Strip Mine,
Then do not capture as DISTURBED SURFACE. See MINE.

Graphic

If a disturbed area is unlabeled,
Then capture as DISTURBED AREA.

Revision - General

Revision - Standard

Revision - Limited

Do not add new features. When DISTURBED SURFACE is encountered during limited update, the feature should preferably be reclassified as the feature it truly represents (i.e., DISPOSAL SITE or MINE). If the true feature which the DISTURBED SURFACE represents cannot be determined, and if contours exist in the disturbed area, then delete the DISTURBED SURFACE. If contours do not exist, then retain the DISTURBED SURFACE.

EXAMPLES

Apré Harbor, GU (Two floating DRYDOCKS)
Jersey City, NJ-NY

EMBANKMENT - A raised linear mound of earth, gravel, or similar material.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Embankment Type	Function or purpose
Defensive Earthworks	A defense fortification, also referred to as breastwork or redoubt
Levee	An embankment built to prevent flooding or to control or confine the flow of liquids
Spoil Bank	An embankment of waste material dredged from a channel and dumped along it
Unspecified	The value is not known and is not required
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of EMBANKMENT is the extent of the raised mound at the base.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional		> 0	
2-dimensional			

Special Conditions:

DATA EXTRACTION

Capture Conditions

- If EMBANKMENT is < 0.04" along the shortest axis and ≥ 0.5 " along the longest axis, and the contour interval is ≥ 10 ft and height is ≥ 5 ft,
- Or
- If EMBANKMENT is < 0.04" along the shortest axis and ≥ 0.5 " along the longest axis, and the contour interval is 5 ft and height is ≥ 3 ft,
- Or
- If EMBANKMENT is < 0.04" along the shortest axis and provides support to raise a CANAL/DITCH or STREAM/RIVER above normal ground level to maintain gravity flow,
- Or
- If EMBANKMENT is < 0.04" along the shortest axis and is an outline or separator of an earthen RESERVOIR, or is an outline of a controlled INUNDATION AREA, or is a fire protection dike around a TANK,
- Or
- If EMBANKMENT is a check dam or other similar feature built to control erosion and is < 0.04" along the shortest axis, ≥ 0.1 " along the longest axis, and the contour interval is ≥ 10 ft and height is ≥ 5 ft,
- Or
- If EMBANKMENT is a check dam or other similar feature built to control erosion and is < 0.04" along the shortest axis, ≥ 0.1 " along the longest axis, and the contour interval is 5 ft and height is ≥ 3 ft,
- Or
- If EMBANKMENT has Embankment Type = Defensive Earthworks, and is of historical significance, and is located in a protected area,
 Then capture.

Attribute Information

If Embankment Type \neq Defensive Earthworks,
Then Name = Unspecified.

Source Interpretation Guidelines

All

Tapered ends of EMBANKMENT will be considered as the same dimensions as the main portion of the EMBANKMENT.

Do not capture embankments ≥ 0.04 " along the shortest axis as EMBANKMENT. See CONTOUR.

If the average width of an EMBANKMENT is < 0.04 " it will be captured as EMBANKMENT even though portions may exceed 0.04". The predominant width will dictate how the feature is represented. Do not combine EMBANKMENT and CONTOUR representation on the same levee.

If the height of the EMBANKMENT varies,
Then map it completely if average height meets capture conditions.

If any gap between the in-line piles of a Spoil Bank is < 0.05 ",
Then capture as a continuous feature.

Graphic

If feature in a protected area is labeled Battle Trench or Breastworks, capture as Embankment Type = Defensive Earthworks.

Hachures have been used to symbolize the extent of pits and mines and do not represent the feature EMBANKMENT.

Embankments constructed to raise CANAL/DITCHES above normal ground in order to maintain gravity flow have been symbolized several ways on the graphics: a levee on each side, half a hachure on each side (sometimes called a split levee), and/or labeled Elevated.

When a levee is shown on each side, it may not be possible to determine if they are to raise the feature or are actual mounds beside the feature. They should be captured as individual levees unless source imagery is available to determine their construction.

If the split levee symbol or elevated label is used or it is possible to determine that the 2 levees represent a raised CANAL/DITCH, a single EMBANKMENT will be captured coincident with the CANAL/DITCH.

Embankments constructed to raise CANAL/DITCH above normal ground in order to maintain gravity

flow will be captured as an EMBANKMENT along the side of the CANAL/DITCH.

Revision - General

Revision - Standard

Revision - Limited

Revise only if clearly visible on the photographs. Collect as a line that follows the top of the embankment. Retain existing features.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If EMBANKMENT separates the RESERVOIRS in a group of two or more adjacent RESERVOIRS with the same Attribute Values and the shortest axis of all RESERVOIRS in the group is ≥ 0.25 " and the RESERVOIR perimeter lines are ≥ 0.005 " and < 0.025 " apart, Then adjacent perimeter lines will be equally displaced and plotted 0.025" apart, and the RESERVOIR symbols will be adjusted accordingly.

If EMBANKMENT separates the RESERVOIRS in a group of two or more adjacent RESERVOIRS with the same Attribute Values and any RESERVOIR in the group has any axis < 0.25 ", Then suppress_section.

If EMBANKMENT separates the RESERVOIRS in a group of two or more adjacent RESERVOIRS with the same Attribute Values and the RESERVOIR perimeter lines are < 0.005 " apart, Then suppress_section.

If EMBANKMENT, with Embankment Type = Levee coincides ROAD,
Then resymbolize_section using L101.

If EMBANKMENT, with Embankment Type = Levee coincides RAILWAY,
Then resymbolize_section using L102.

If EMBANKMENT, with Embankment Type = Levee coincides ROAD and there is < 0.011" clearance
between ROAD symbol and an adjacent CANAL/DITCH, LAKE/POND, RAILWAY, or ROAD,
Then resymbolize_section using L103.

If EMBANKMENT, with Embankment Type = Levee, coincides CANAL/DITCH,
Then resymbolize_section using L104.

If EMBANKMENT is along a CANAL/DITCH, RAILWAY, or ROAD and symbols coalesce,
Then global displacement hierarchy rules (TBD) will apply.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will
continue until all features are completed.

Selection

TBD

Placement

TBD

EXAMPLES

Rhodesdale, MD (Levee/sewage disposal ponds)
Palo Alto, CA (Levee/salt evaporator; ROAD on levee; Lagunita (lake or reservoir) with levee symbol as
DAM/WEIR)
Lawtey, FL (Spoil banks and levees/tailings ponds)
Dos Pueblos Canyon, CA (Diked TANKS)
Lucre, MS (Aerial spoil banks and levee)
Alice North, TX (Levees broken for RAILWAY and ROAD crossing)
LaPorte, TX (Levee/industrial waste pond)
Virginia Point, TX (Levee/acid ponds, spoil bank)
Hiialeah, FL (Levee/sludge pit (abandoned))
Littleton, CO (Levee/1 & 2 sides of ditch)
Devore, CA (Diversion dike & levee/inundation area, levee/ditch)
San Fernando, CA (Levee/spreading ground)
Hayti Heights, MO (Elevated ditch)
Orondo, WA (Erosion dikes)
Poquoson West, VA (1975 edition with Battle Trenches)
Poquoson West, VA (1983 edition with Battle Trenches and Defensive Earthworks 9 & 10)
Yorktown, VA (1957 edition with levee symbol for Defensive Earthworks)
Yorktown, VA (1984 edition with Battle Trenches for Defensive Earthworks)
Petersburg, VA (1952 edition with levees for Defensive Earthworks)
Petersburg, VA (1969 edition with Trenches for Defensive Earthworks)
Westley, CA (Raised ditch with full levee symbol on both sides)

EXHIBITION GROUND - A public area where outdoor fairs, circuses, and other events are held, which also contains permanent structures for the display of livestock, machinery, agricultural produce, etc.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of EXHIBITION GROUND is the extent of the area used for exhibitions and includes all associated structures.

REPRESENTATION RULES

INSTITUTIONAL SITE - A group of buildings or associated structures, functioning as a unit, used predominantly for educational, correctional, governmental, medical, or religious purposes.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Institutional Type	Function or purpose
Civil Government	For the exercise of authority over and the performance of functions for a non-military or non religious political unit
Correctional	For punishment or rehabilitation
Education/Research	For instruction or study
Historical	Feature is historically significant
Medical	For the study or practice of medicine
Military	Area for carrying out military activities
Religious	For the administration, practice, or teaching of religion
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of INSTITUTIONAL SITE is the extent of the area used by the institution, including all associated structures.

REPRESENTATION RULES

LAUNCHING RAMP - A partially submerged hard surface on a shoreline for launching or retrieving vessels or aircraft.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks
Ramp Type	Function or purpose
Boat Ramp	
Seaplane Ramp	

DELINEATION

If LAUNCHING RAMP is at the end of ROAD, the limit is the place where the center of the ROAD intersects the SHORELINE or NONEARTHEN SHORE.

If LAUNCHING RAMP is not at the end of ROAD, the limit is the edge of the hard surface.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

Special Conditions:

DATA EXTRACTION

Capture Conditions

Capture all.

Attribute Information

Source Interpretation Guidelines

All

Do not capture LOCALE if an entity meets the definition for a feature other than LOCALE. See relevant feature template.

Do not capture an area having permanent human population, except ranches, as LOCALE. See POPULATED PLACE.

Graphic

Capture all.

If a site is symbolized with a located object symbol,
Then capture as a 0-dimensional basic feature object.

Areas labelled as "Site" are collected as LOCALE.

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Retain existing features.

Key Biscayne, FL
Miami, FL
Point Pleasant, NJ
Port Everglades, FL

MINE - An excavation in the earth for the purpose of extracting earth materials.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Mine Type	Function or purpose
Open Pit	Excavation where large deposits of mineral ores are removed
Pit	Excavation where unconsolidated materials are removed
Product	Principal commodity involved
Clay	A sediment of soft plastic consistency composed primarily of fine grained minerals.
Gravel	Unconsolidated, natural accumulation of rounded rock fragments, consisting predominantly of particles larger than sand but smaller than boulders, having a diameter in the range of 2mm to 256 mm (1/2 inch to 10 inches).
Sand	Unconsolidated rock particles that are larger than silt but smaller than gravel
Unspecified	The value is not known and is not required
Quarry	Excavation in solid rock where building stone, limestone, etc. are removed
Strip	Excavation where overburden is removed to extract materials close to the surface. The overburden is piled in random heaps or deposited in fairly regular ridges and furrows.
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Operational Status	State or condition
Reclaimed/Reverted/Converted	Restored to approximately the original contours and replanted, reverted to nature, or converted to an alternate use.
Unspecified	The value is not known and is not required

Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of MINE is the edge of the excavation.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional			
2-dimensional			

Special Conditions:

If MINE, with Mine Type = Quarry, Pit, or Open Pit, is < 0.5" along the shortest axis,
 Then MINE is represented as a 0-dimensional basic feature object.

If MINE, with Mine Type = Quarry, Pit, or Open Pit, is ≥ 0.5" along the shortest axis,
 Then MINE is represented as a 2-dimensional basic feature object.

If MINE has Mine Type = Strip,
 Then MINE is represented as a 2-dimensional basic feature object.

DATA EXTRACTION

Capture Conditions

If MINE is a surface mine that has not been reclaimed, reverted to nature, or converted to an alternate use,
Or
If MINE is a reclaimed strip mine for which contour information is not available,
Then capture.

Attribute Information

Operational Status = Reclaimed only in limited update. See Source Interpretation Guidelines, Revision.

Source Interpretation Guidelines

All

Mined areas that have "reverted to nature" are those which have been left to revegetate through natural means; they lack roads for removal of material and show evidence of mature vegetation.

Mined areas that have been "reclaimed" are those in which the landscape has been restored to its original grade.

Mined areas that have been "converted to an alternate use" are those which are being used for activities other than mining.

Do not capture entrances to underground mines as MINE. See MINE ENTRANCE.

Do not capture placer mines as MINE. See DISPOSAL SITE.

Do not capture mines that have filled with water as MINE. See LAKE/POND (Hydrography theme).

Graphic

Do not capture features portrayed with an adit or shaft symbol and labeled as MINE. See MINE ENTRANCE.

The extent of a MINE may be indicated by hachures or depression contours.

Capture all areal mines symbolized by imagery as MINE.

Revision - General

For treatment of contours in mines and reclaimed areas, see CONTOUR (Hypsography theme).

Revision - Standard

Revision - Limited

If a strip mine has been reclaimed, reverted to nature, or converted to an alternate use,
Then capture as MINE, with Operational Status = Reclaimed/Reverted/Converted.

Product = Unspecified for newly collected MINES with Mine Type = Pit. Retain Product (for
example, Clay, Gravel, Sand, or Unspecified) on existing MINES.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

TBD

Placement

TBD

EXAMPLES

- Alice North, TX (0-D quarry)
- Bessemer, AL (Chert pit)
- Brigham City, UT (2-D gravel pits)
- Cordova NW, AL (0-D gravel pits, 2-D gravel pit)
- Falcon NW, CO (0-D sandpit)
- Glassport, PA (2-D strip mines)
- Hopkinton, NH (0-D sandpit)
- La Junta, CO (2-D La Junta Gravel Pit)
- McKeesport, PA (2-D quarry)
- Prunedale, CA (Borrow pit)
- Rileyville, VA (0-D sand and gravel pit)

MINE ENTRANCE - Passage that affords entry to an underground mine.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Entrance Type	Function or purpose
Air Ventilation	To admit fresh air
General Case	Common use
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Passage Category	Form or nature
Horizontal	In a plane parallel to the horizon.
Vertical	In a plane perpendicular to the horizon.
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of MINE ENTRANCE is the edge of the passage.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional		> 0	
1-dimensional			
2-dimensional			

Special Conditions:

DATA EXTRACTION

Capture Conditions

If MINE ENTRANCE is within an area of closely spaced mine entrances and is necessary to accurately represent the pattern of MINE ENTRANCES (see Source Interpretation Guidelines to determine how to accurately represent the pattern),

Or

If MINE ENTRANCE is landmark,
 Then capture.

Attribute Information

If Entrance Type = Air Ventilation,
 Then Passage Category = Vertical.

Source Interpretation Guidelines

All

If MINE ENTRANCE is in an area of closely spaced mine entrances,
 Then first capture named MINE ENTRANCES, then those that are on the perimeter of the area, then those that are most prominent, then finally capture a representative pattern of MINE ENTRANCES internal to the area. MINE ENTRANCES must be captured in their correct position. The symbols for a horizontal MINE ENTRANCE may overlap to reflect the density of MINE ENTRANCES. The symbols for a vertical MINE ENTRANCE must not overlap.

Do not capture a mine shaft that has been filled in as MINE ENTRANCE. If the filled mine shaft is named,

Then capture as LOCALE.

Graphic

A mine shaft symbol is captured as MINE ENTRANCE, with Passage Category = Vertical.

An adit symbol that is unlabeled, unnamed, or labeled "Mine" is captured as MINE ENTRANCE, with Entrance Type = General Case and Passage Category = Horizontal.

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Retain existing features.

<u>Attribute</u>	<u>Value</u>	<u>Symbol Specs</u>	<u>Type Specs</u>
Name	(Alphanumeric) or Unspecified	N/A	Name and Outdoor Theater Type: Color: Black Style: UL C/lc Size: 7 Spacing: 0
Outdoor Theater Type	Aqua Theater		

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If perimeter of 2-dimensional OUTDOOR THEATER symbol_coalesces with BOUNDARY LINE, BUILDING, DRIVE-IN THEATER SCREEN, RAILWAY, or ROAD,
 Then suppress_section and extend remaining dash symbol segments to meet the other feature.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

If Outdoor Theater Type = Amphitheater, and Name = (Alphanumeric) and does not include "Amphitheater",
Then add label in parentheses after name.

Placement

TBD

EXAMPLES

Albuquerque West, NM (Drive-in theater)
Brooklyn, NY (BUILDING labeled "Amphitheater")
Canyon Village, WY (BUILDING labeled "Amphitheater")
Corpus Christie, TX (Drive-in theater)
Elfers, FL (Drive-in theater)
Hollywood, CA (2-D labeled "Greek Theater")
La Jolla, CA (Sea World Aquatic Park)
Morrison, CO (2-D labeled "Red Rocks Amphitheater")
Pasadena, CA
San Clemente, CA
Santa Barbara, CA (2-D labeled "County Bowl")
Seattle North, WA (Aqua Theater)

PARK - A place or area developed for public use or recreation.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Park Type	Function or purpose
Amusement	An area containing various rides and arcades for entertainment and thrill.
Botanical	An area for the exhibition and study of plants
General Case	Common use
Parade Ground	An area for marching and parading of troops
Picnic Area	An outdoor area with facilities for preparing and eating meals except for those along highways primarily for the use of travelers (see REST SITE)
Zoo	An area for the exhibition and study of animals
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of PARK is the extent of the developed area including all associated structures.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional			
2-dimensional			

Special Conditions:

If PARK has Park Type = Picnic Area and is < 0.01 square inches,
 Then PARK is represented as a 0-dimensional basic feature object.

If PARK has Park Type = Picnic Area and is ≥ 0.01 square inches,
 Then PARK is represented as a 2-dimensional basic feature object.

If PARK has Park Type ≠ Picnic Area,
 Then PARK is represented as a 2-dimensional basic feature object.

DATA EXTRACTION

Capture Conditions

If PARK is not a picnic area,
 Or
 If PARK is a picnic area and has more than one picnic table,
 Then capture.

Attribute Information

If PARK is primarily for horticultural exhibition,
 Then Park Type = Botanical (eg. Cypress Gardens, Missouri Botanical Garden, Arboretum, Aquatic Gardens, etc.).

If PARK is Exotic Animal Paradise, Safari Land, etc.,
 Then Park Type = Zoo.

If Park has multiple activities,
 Then Park Type = General Case.

If Park Type = Amusement,
Then Name = Unspecified.

Source Interpretation Guidelines

All

"Since each view is independent of the other views, a single point on the surface of the Earth can be represented under multiple views, and features within any one view may coexist with features in the same or other views." (See Circular 1048 An Enhanced Digital Line Graph Design). A PARK may totally or partially coincide with a feature which is another complex (CAMPGROUND, OUTDOOR THEATER, SPORTS SITE, ATHLETIC FIELD, etc.) or a RESERVATION. A feature captured as complex represents the "cover of intensive use..." whereas the feature captured as RESERVATION represents the bounded area under a particular administration.

If Park Type = Amusement, Botanical, Parade Ground, Picnic Area, or Zoo, it may exist inside a larger PARK that has other activities. In this situation, capture each area as PARK. The area of each PARK is exclusive.

If PARK provides only facilities for athletic activities,
Then do not capture as PARK. See ATHLETIC FIELD.

If an area meets the definition of PARK and is also part of RESERVATION,
Then capture both PARK and RESERVATION.

Graphic

All city PARKS will be captured as PARK even though they may be symbolized by a reservation boundary line. There will no longer be a distinction made by boundary symbol between large and small city PARKS.

If Park Type = Picnic Area and the area cannot be determined,
Then capture as a 0-dimensional feature at the apex of the legs of the picnic table symbol.

If area is labeled "Recreation Area",
Then capture as PARK, Park Type = General Case.

If area is labeled "Roadside Park" or "Wayside Park",
Then do not capture as PARK. See REST SITE (Transportation theme).

Areas labeled "Playground" on the map are not collected.

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Retain existing features.

Stafford, MO (Exotic Animal Paradise)
Washington West, DC-MD (National Arboretum, Kenilworth Aquatic Gardens)
Webster Grove, MO (Missouri Botanical Garden)
Windermere, FL (Disney World)

PIER/BREAKWATER/JETTY - Structure extending in the longest dimension from the shore or positioned offshore for protection, berthing vessels, or recreation.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Operational Status	State or condition
Ruined	
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks
Pier/Breakwater/Jetty Type	Function or purpose
Breakwater	Offshore structure to break the force of waves
Jetty	Extending from the shore to restrain or direct current or tide
Pier	Extending from the shore for berthing or recreation
Unspecified	The value is not known and is not required

DELINEATION

The limit of PIER/BREAKWATER/JETTY is the extent of the structure.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional		< 0.02"	
2-dimensional		≥ 0.02"	

Special Conditions:

DATA EXTRACTION

Capture Conditions

If PIER/BREAKWATER/JETTY is above the water surface and is named,
 Or
 If PIER/BREAKWATER/JETTY is above the water surface and is ≥ 0.05" along the longest axis,
 Then capture.

Attribute Information

Source Interpretation Guidelines

All

The line of contact between a body of water and the land is captured as SHORELINE or NONEARTHEN SHORE. Other structures such as DAM/WEIR, PIER/BREAKWATER/JETTY, or WHARF may coincide with the SHORELINE or NONEARTHEN SHORE, in which case both features are captured.

If PIER/BREAKWATER/JETTY does not meet capture conditions,
 Then see NONEARTHEN SHORE or SHORELINE.

PIPELINE - A closed conduit, with pumps, valves and control devices, for conveying fluids, gases, or finely divided solids.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks
Product	Principal commodity involved
Unspecified	The value is not known and is not required
Relationship to Surface	Vertical location relative to the surface
At or Near	At or slightly above the surface
Elevated	Supported above the earth
Underground	Buried
Unspecified	The value is not known and is not required

DELINEATION

The limit of PIPELINE that is underground is the edge of the ground scars or linear clearings.

The limit of PIPELINE that is at or near the ground or elevated, is the extent of the structure.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
Is Above		UNDERPASS

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional		> 0	
2-dimensional			

Special Conditions:

DATA EXTRACTION

Capture Conditions

If PIPELINE is aboveground and is outside of a congested area; and is a trunk line; and is ≥ 0.25 " from a paralleling road, railway, or other linear feature,

Or

If PIPELINE is underground and surface scars are present; and is outside of a congested area; and is a trunk line; and is ≥ 0.25 " from a paralleling road, railway, or other linear feature,

Then capture.

Attribute Information

Source Interpretation Guidelines

All

If PIPELINE is elevated over a depression by a structure built for that purpose,
 Then capture only PIPELINE, with Relationship to Surface = Elevated.

If PIPELINE is within TUNNEL,
 Then capture both PIPELINE and TUNNEL.

If PIPELINE conveys water,
Then collect in the theme Hydrography.

If PIPELINE conveys a product other than water,
Then collect in the theme Built-up.

Trunk pipelines are those that transport raw materials from central gathering points in producing areas to refineries or terminals, or those that transport products from refineries to large consumer areas.

Graphic

If PIPELINE is labeled "Pipeline Bridge",
Then capture PIPELINE, with Relationship to Surface = Elevated.

Revision - General

Revision - Standard

Revision - Limited

Revise aboveground pipelines only. Retain existing features.

Carmel, IN
Carpinteria, CA
New Cuyama, CA
Valdosta, GA
Wolf Creek Pass, CO

PIPELINE REGULATION STATION - An ancillary facility that controls the flow of fluids or gasses along a pipeline route.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks
Pipeline Regulation Station Type	Function or purpose
Compressor	Used to compact the flow
Pumping	Used to create flow or to raise the flow
Valve	Used to direct or regulate the flow

DELINEATION

The limit of PIPELINE REGULATION STATION is the extent of the area encompassing the structures, often delimited by a fence.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			< 0.06"
1-dimensional			
2-dimensional			≥ 0.06"

Special Conditions:

DATA EXTRACTION

Capture Conditions

If PIPELINE REGULATION STATION is not within BUILT-UP AREA,
 Then capture.

Attribute Information

If PIPELINE REGULATION STATION is a "booster plant",
 Then Pipeline Regulation Station Type = Pumping.

Source Interpretation Guidelines

All

If capture conditions for BUILDING and other structures within PIPELINE REGULATION STATION are met,
 Then capture PIPELINE REGULATION STATION and BUILDING and other structures.

Do not capture pipeline regulation stations housed in a building as PIPELINE REGULATION STATION. See BUILDING.

A "booster plant" will be captured as PIPELINE REGULATION STATION if capture conditions are met.

TBD

Placement

TBD

EXAMPLES

Farmer, WA (Label 'Farmer' refers to three class 1 BUILDINGS, one class 2 BUILDING)
 Vienna, VA (Label 'Reston')

POWER SITE - A group of associated structures, functioning as a unit, used for generating electricity.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Energy Source	Fuel or resource used to produce electricity
Fossil Fuel	
Geothermal	
Nuclear Fuel	
Sun	
Unspecified	The value is not known and is not required
Water	
Wind	
Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks

DELINEATION

The limit of POWER SITE is the extent of the area encompassing the group of associated structures.

Special Conditions:

DATA EXTRACTION

→ Capture Conditions ←

If PROSPECT is landmark,
Then capture.

Attribute Information

Source Interpretation Guidelines

All

If PROSPECT is in an area of closely spaced prospects,
Then first capture named PROSPECTS, then those that are on the perimeter of the area, then those that are most prominent, then finally capture a representative pattern of PROSPECTS internal to the area. PROSPECTS must be captured in their correct position. The symbols may overlap to reflect the density of PROSPECTS.

PROSPECT must have a readily identifiable scar with significant evidence of mineral exploration.

Graphic

Capture all.

Special Conditions:

DATA EXTRACTION

Capture Conditions

If RACETRACK is improved and maintained,
Then capture.

Attribute Information

N/A

Source Interpretation Guidelines

All

Only the racing course will be captured as RACETRACK. The roads used for access and maintenance will be captured as ROAD. In some cases it will be difficult to determine which are which, as some race courses are irregularly shaped. The Daytona International Speedway is an example of a facility having an oval track, an irregularly shaped track and access roads intertwined.

Graphic

A single dashed line, with or without the label 'Athletic Track', will be collected as ATHLETIC FIELD.

A heavy solid, double solid, or double dashed line is a track for vehicle or animal racing, and will be captured as RACETRACK.

→ DELINEATION ←

The limit of RESERVOIR is the rim of the constructed basin.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional		< 0.03"	
1-dimensional			
2-dimensional		< 0.03"	

Special Conditions:

DATA EXTRACTION

Capture Conditions

If RESERVOIR is a sludge pit or an oil sump, and is ≥ 0.03 " along the shortest axis, and is associated with an oil refinery or a central pipeline distribution junction,
Then capture.

Attribute Information

If RESERVOIR has a printed elevation on a 1:24,000-scale graphic,
Then Elevation = (Integer Value),
Else Elevation = Unspecified.

If Reservoir Type = Disposal and Disposal Type = Sludge Pit or Oil Sump,
Then Construction Material = Nonearthen.

Reservoir Type = Unspecified only in limited update. See Source Interpretation Guidelines, Revision.

Source Interpretation Guidelines

All

If RESERVOIR is < 0.03 " along the shortest axis and is within 0.02 " of another RESERVOIR with the same attribute values,
Then capture as one RESERVOIR only if the combined areas are ≥ 0.03 " along the shortest axis.

If two RESERVOIRS are < 0.005 " apart and have the same attribute values,
Then capture as two RESERVOIRS with a shared perimeter line.

If two RESERVOIRS are < 0.005 " apart and do not have the same attribute values,
Then displace the perimeter lines equally and capture so that the perimeter lines are 0.005 " apart.

If RESERVOIR is an oil sump or sludge pit,
Then collect in the theme Built-Up.

If RESERVOIR is not an oil sump or sludge pit,
Then collect in the theme Hydrography.

If RESERVOIR is divided by wire mesh, screens, or grates,
Then do not capture the resulting divisions as separate RESERVOIRS.

Graphic

If RESERVOIR is symbolized with a black outline,
Then Construction Material = Nonearthen.

If RESERVOIR is symbolized with a blue or brown outline,
Then Construction Material = Earthen.

If RESERVOIR is < 0.03 " along the shortest axis, and shares an outline with another RESERVOIR with the same attribute values, and their combined area is ≥ 0.03 " along the shortest axis,
Then capture the combined areas as one RESERVOIR.

Revision - General

Revision - Standard

Revision - Limited

Reservoir Type = Unspecified for newly collected RESERVOIRS. Retain Reservoir Type on existing RESERVOIRS.

Elevation = Unspecified for newly collected RESERVOIRS. Retain Elevation on existing RESERVOIRS.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If perimeter line of RESERVOIR coincides EMBANKMENT,
 Then suppress_section.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

If RESERVOIR coincides AQUACULTURE SITE or INDUSTRIAL SITE and RESERVOIR Name = AQUACULTURE SITE Name or INDUSTRIAL SITE Name,
 Then do not show RESERVOIR Name.

If RESERVOIR, with Reservoir Type = Treatment, Treatment Type = Sewage Treatment Pond coincides SEWAGE DISPOSAL PLANT,
 Then do not show RESERVOIR label.

If RESERVOIR, with Reservoir Type = Treatment, Treatment Type = Filtration Pond coincides FILTRATION PLANT,
 Then do not show RESERVOIR label.

Placement

TBD

EXAMPLES

Courtland, AL (Clarifier and purification)
Palo Alto, CA (Evaporator - salt)
Fort Logan, CO (Filtration bed - covered)
Cary, MS (Fish raising - fish farm)
Martinsville, IN (Fish raising - fish hatchery)
Benton, MS (Fish pond - to be captured as RESERVOIR)
Anachoomalu, HI and Halawa, HI (Fish pond - not captured as RESERVOIR)
Jonesborough, TN (Fish raising - minnows)
Auburndale, FL (Industrial waste)
Dos Pueblos Canyon, CA (Oil sump)
Lamont, CA (Oil sump)
Phoenix, AZ (Sewage disposal)
Carpenteria, CA (Storage, water - perennial)
New Cuyama, CA (Storage, water - intermittent)
Del Sur, CA (Storage, water - intermittent)

SEWAGE DISPOSAL PLANT - A group of structures functioning as a unit used for the disposal of domestic water-born waste.

Conflict Detection and Resolution

Conflict detection and resolution rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

If TRANSMISSION LINE symbol_follows RAILWAY or ROAD, separation < 0.05", distance ≥ 0.05",
 Then suppress_section.

If TRANSMISSION LINE coincides with BOUNDARY LINE that is associated with CITY, COUNTY,
 MINOR CIVIL DIVISION, NATION, or STATE/TERRITORY,
 Then suppress_section.

If TRANSMISSION LINE crosses through BUILT-UP AREA for a distance ≥ 1 mile,
 Then suppress_section.

If TRANSMISSION LINE symbol_coalesces TOWER,
 Then suppress_section.

Names and Labels

Selection and placement rules are being developed. Additions and modifications to the rule set will continue until all features are completed.

Selection

TBD

Placement

TBD

EXAMPLES

- Boston North, MA (TRANSMISSION LINES with and without TOWERS - within BUILT-UP AREA)
- Cascadel Point, CA (TRANSMISSION LINES - dots shown between TOWERS)
- Oil City, PA (Telephone line)
- University Park, FL (Two parallel TRANSMISSION LINES - no TOWERS)

UNDERPASS - The grade separation where part or all of one feature instance is directly above part or all of another feature instance.

ATTRIBUTE/ATTRIBUTE VALUE LIST

N/A

DELINEATION

The limit of UNDERPASS is the extent of the horizontal area where the two separated feature instances overlap.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
Is Above		BUILDING

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional			
2-dimensional			

Special Conditions:

If the feature object above UNDERPASS is 0-dimensional, and the feature object below UNDERPASS is 1-dimensional, or vice-versa,
 Then UNDERPASS is represented as a 0-dimensional basic feature object.

If the feature object above and the feature object below UNDERPASS are both 1-dimensional, and they are not collinear in the planar graph,
 Then UNDERPASS is represented as a 0-dimensional basic feature object.

If the feature object above and the feature object below UNDERPASS are both 1-dimensional, and they are at least partially collinear in the planar graph (they share at least one chain if in the same surface, or some linear portion of their chains match if in different surfaces),
 Then UNDERPASS is represented as a 1-dimensional basic feature object.

If the feature object above UNDERPASS is 1-dimensional and the feature object below UNDERPASS is 2-dimensional, or vice-versa,
 Then UNDERPASS is represented as a 1-dimensional basic feature object.

If the feature object above and the feature object below UNDERPASS are both 2-dimensional,
Then UNDERPASS is represented as a 2-dimensional basic feature object.

DATA EXTRACTION

Capture Conditions

If UNDERPASS occurs where BUILDING, CANAL/DITCH, RAILWAY, ROAD, or RUNWAY/APRON/TAXIWAY cross over each other at different levels, and if there is no captured structure indicating vertical relationship (for example, BRIDGE, TUNNEL, or FORD) and the vertical relationship is not otherwise inferable,
Then capture.

Attribute Information

N/A

Source Interpretation Guidelines

All

UNDERPASS typically occurs where two roads cross without intersecting, but may also occur in other situations, such as when a building is above and straddling a road.

Do not capture UNDERPASS, even if there is no captured separating structure, between ROAD or RAILWAY, and a waterbody. Without a structure, ROAD or RAILWAY is always assumed to be above the waterbody, never below.

Only two feature objects may be involved in instances of the Is Above relationship with an UNDERPASS feature object. In a case of three or more feature objects overpassing each other at the same place, only vertically adjacent feature objects are involved in Is Above relationship instances with any one UNDERPASS feature object. Thus, a triple level stacking of feature objects requires two UNDERPASS feature objects; one UNDERPASS between the top and middle feature objects, and the other UNDERPASS between the middle and bottom feature objects.

EXAMPLES

WALL - An upright structure of masonry, wood, plaster, or other building material serving to enclose, divide, or protect an area.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks
Wall Type	Function or purpose
General Case	Common use
Sea	A wall set back from the shoreline for the purpose of holding back the sea.

DELINEATION

The limit of WALL is the edge of the structure.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional			
1-dimensional		> 0	
2-dimensional			

Special Conditions:

DATA EXTRACTION

Capture Conditions

If WALL is associated with a correctional institution or historic military fort,
Or
If WALL is around a tank for fire protection,
Or
If WALL is a seawall,
Or
If WALL is associated with a 2-dimensional LOCK CHAMBER and WALL has water on both sides,
Or
If WALL extends into a body of water and is not a pier/breakwater/jetty or seawall,
Then capture.

Attribute Information

Source Interpretation Guidelines

All

If WALL separates two bodies of water,
Then capture in the Hydrography theme.

If WALL is not associated with a hydrographic feature,
Then capture in the Built-Up theme.

If DAM/WEIR, NONEARTHEN SHORE, PIER/BREAKWATER/JETTY, or SPILLWAY is captured,
Then do not capture WALL.

If the edge of LOCK CHAMBER separates water from land,
Then do not capture WALL. See NONEARTHEN SHORE.

Graphic

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Retain only those WALLS associated with LOCK CHAMBER.

WELL - A pit or hole dug or bored into the earth for the extraction of oil, water, other fluids, or gases.

ATTRIBUTE/ATTRIBUTE VALUE LIST

Name	Proper name, specific term, or expression
(Alphanumeric)	Length Value: 99
Unspecified	The value is not known and is not required
Photorevision Category	Whether or not a feature was added or modified as part of a photorevision assignment
Not Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that included field checks, if required
Photorevised	Feature was compiled from aerial photographs and other sources as part of a revision assignment that did not include field checks
Product	Principal commodity involved
Unspecified	The value is not known and is not required
Production Status	State or condition
Non-producing	Not yielding a product
Producing	Yielding a product

DELINEATION

The limit of WELL is the extent of the hole in the ground.

REPRESENTATION RULES

Feature Object Representation, Composition, and Relationship Table

RELATIONSHIPS	INSTANCES (CARDINALITY)	WITH OBJECT
---------------	----------------------------	-------------

Representation Conditions

KIND OF FEATURE OBJECT	AREA	SHORTEST	LONGEST
0-dimensional		> 0	
1-dimensional			
2-dimensional			

Special Conditions:

DATA EXTRACTION

Capture Conditions

If WELL is a producing oil or gas well outside of a developed WELL FIELD,
 Or
 If WELL is an oil or gas well outside of a developed WELL FIELD; and is a drill hole, exploratory well or test well; and is landmark,
 Or
 If WELL is an oil or gas well within a developed WELL FIELD and does not have the product of WELL FIELD,
 Then capture.

Attribute Information

If Production Status = Non-producing,
 Then Product = Unspecified.

If WELL produces oil or gas,
 Then Product = Unspecified.

Source Interpretation Guidelines

All

If WELL is within an area of closely spaced wells,

Then first capture named WELLS, then those that are on the perimeter of the area, then those that are most prominent, then finally capture a representative pattern of WELLS internal to the area. Capture as many as can be shown in correct position. The symbols must not overlap.

If WELL is associated with WINDMILL,
Then do not capture WELL. See WINDMILL.

Irrigation wells are often enclosed in a structure and are usually found in wide areas along or at the end of field roads. They may be evidenced by a wide wet collection area leading into a linear channel.

If WELL produces water or heat,
Then collect in the theme Hydrography.

If WELL produces a product other than water or heat,
Then collect in the theme Built-up.

Do not capture dry wells.

Graphic

If WELL is identified as an "Exploratory well" or "Test well" on the graphic,
Then Production Status = Non-producing and Product = Unspecified.

Revision - General

Revision - Standard

Revision - Limited

Do not revise. Retain existing features.
