\_\_\_\_\_ 1. *Request for Categorical Exclusion(s)*

\_\_\_\_\_ 2. *Initial Environmental Examination:*

For a Single IEE:

\_\_\_\_\_ *Negative Determination:* no significant adverse effects expected regarding the proposed activities, which are well defined over life of the proposal.

- \_\_\_\_\_ *without conditions* (ideal conditions, no special mitigation measures needed, normal good practices and engineering will be used)
- \_\_\_\_\_ *with conditions* (non-ideal conditions, special mitigation measures specified to prevent unintended impact)

For an Umbrella IEE:

- \_\_\_\_\_ *Negative Determination*: no significant adverse effects expected, but multiple sites and sub grant activities are involved that are not yet fully defined or designed. Refer to “Umbrella IEEs and Subgrant Environmental Screening” in the EPTM (March 2002), Annex G.
  - \_\_\_\_\_ conditions agreed to among Umbrella partners regarding an appropriate process of environmental capacity building and screening, mitigation and monitoring.
- \_\_\_\_\_ *Positive Determination*: IEE confirms potential for significant adverse effect of one or more activities. Appropriate environmental review needed/conducted.
  - \_\_\_\_\_ EA to be / being / has been (circle one) conducted. Note that the activities affected cannot go forward until the EA is approved.
- \_\_\_\_\_ *Deferral*: one or more elements not yet sufficiently defined to perform environmental analysis; activities will not be implemented until amended IEE is approved.

Briefly describe the nature of the deferred activities below:

---

**Summary of Findings:**

Briefly describe (in 1 or 2 paragraphs) the activities being implemented or proposed and those deferred. Justify the reason for the recommended action(s) and cite appropriate sections of Reg. 216 as needed. ### **5. SUMMARY OF FINDINGS**

- 5.1 Environmental Determinations**
- 5.2 Conditions**

## INITIAL ENVIRONMENTAL EXAMINATION

### **Program/Project Data:**

MYAP/SYAP Program/Activity:

CS Name, Country/Region:

*The following narrative should be organized around the major activity sub-headings, if the activity categories are rather distinct, e.g., road construction, agricultural development, and irrigation works. As in sample IEEs (EPTM, Annex D.3 & D.4), treat each major activity under each section. Alternatively, one could organize by activity and then each major heading would cover the Sections 1 to 4. The summary in Section 5 is to cover all categories addressed, with an overview of the summaries at the end.*

*If you are preparing an “Umbrella” IEE, please refer to EPTM Annex D.5 for the detailed description of what the outline might include.*

### **1.0 BACKGROUND AND ACTIVITY DESCRIPTION**

*Describe why the activity is desired and appropriate, and outline the key activities proposed for Title II funding. A current activity description should be provided and the purpose and scope of the IEE indicated (amendment, why needed, what it covers).*

### **2.0 COUNTRY AND ENVIRONMENTAL INFORMATION**

*This section is critical and should briefly assess the current physical environment that might be affected by the activity. Depending upon the activities proposed, this could include an examination of land use, geology, topography, soil, climate, groundwater resources, surface water resources, terrestrial communities, aquatic communities, environmentally sensitive areas (e.g., wetlands or protected species), agricultural cropping patterns and practices, infrastructure and transport services, air quality, demography (including population trends/projections), cultural resources, and the social and economic characteristics of the target communities.*

*The information obtained through this process should serve as an environmental baseline for future environmental monitoring and evaluation. Be selective in the country and environmental information you provide, as it should be specific to the activity being proposed and more information is not necessarily better.*

*Finally, indicate the status and applicability of host country, Mission, and CS policies, programs and procedures in addressing natural resources, the environment, food security, and other related issues.*

### **3.0 EVALUATION OF ACTIVITY/PROGRAM ISSUES WITH RESPECT TO ENVIRONMENTAL IMPACT POTENTIAL**

*This section of the IEE is intended to define all potential environmental impacts of the activity or project, whether they be considered direct, indirect, beneficial, undesired, short-term, long-term, or cumulative. Be clear and concise in the organization of this section.*

### **4.0 RECOMMENDED MITIGATION ACTIONS (INCLUDING MONITORING AND EVALUATION)**

*For each proposed activity or major component recommend whether a specific intervention included in the activity should receive a categorical exclusion, negative determination (with or without conditions), positive determination, etc., as well as cite which sections of Reg. 216 support the requested determinations.*

*Recommend what is to be done to avoid, minimize, eliminate or compensate for environmental impacts. For activities where there are expected environmental consequences, appropriate environmental monitoring and impact indicators should be incorporated in the activity's monitoring and evaluation plan.*

### **5.0 EXECUTIVE SUMMARY OF FINDINGS**

*This should clearly summarize the proposed environmental determinations and recommendations.*
