

**ANE Regional REG. 216 and
Pest/Food Safety Management Workshop**
Sponsored by ANE and RDM/A

Learning Objectives

This workshop is designed to support USAID Asia and Near East Bureau's and its Mission's ability to implement 22 CFR 216 (Reg. 216), environmentally sound design (ESD) and best management practices (BMP). Specifically, during this four-day workshop, participants will:

- Review their workshop objectives and expectations
- Examine key environmental compliance lessons
- Strategize to get Initial Environmental Examinations (IEE) submitted/approved
- Review some really poor environmental practices
- Identify potential adverse environmental impacts of proposed activities
- Recommend conditions and mitigation measures to reduce adverse impacts
- Review Environmental Management Plans (EMP)
- Review Environmental Assessment Screens (EAS)
- Review the environmental assessment (EA) and stakeholder input process
- Review implementing, tracking, monitoring and evaluation, and auditing
- Identify ANE and host-country regional environmental challenges and issues
- Appreciate pesticide and food safety management issues
- Audit and de-brief an infrastructure project
- Have fun in small-group exercises, role playing, auditing, and networking
