

Blind and Disabled Recipients

Chart 1.
Number who work, December 1987–2003

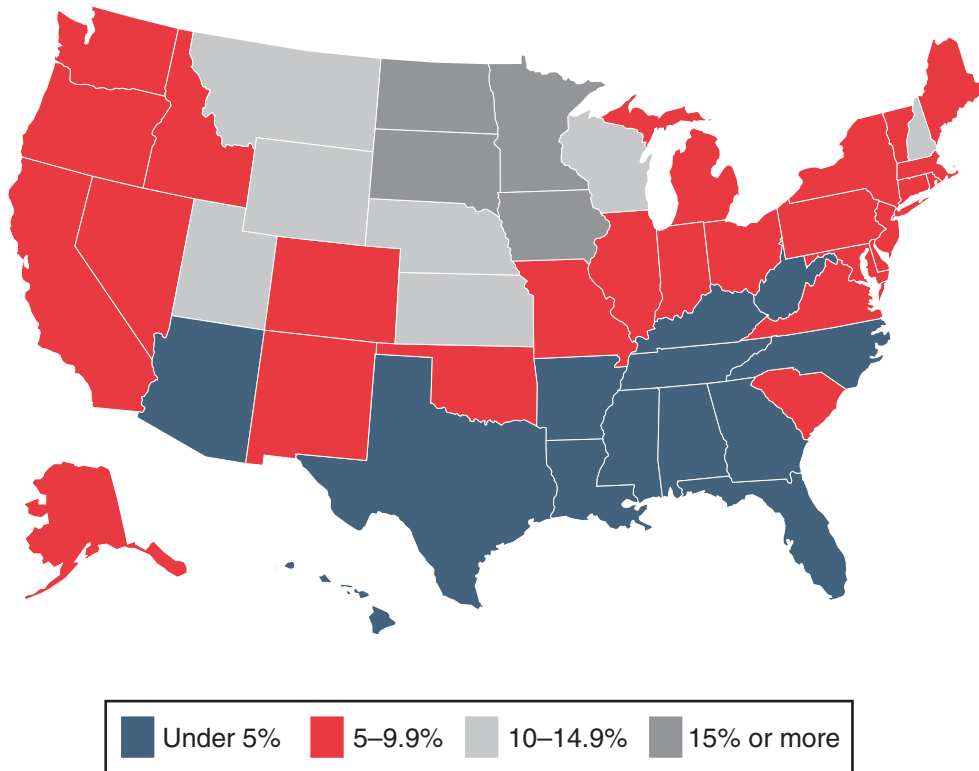

The number of blind and disabled recipients who work almost doubled between 1987 and 2003, from 173,000 to 324,000. Initially, the number of participants under sections 1619(a) and 1619(b) were approximately equal. However, participation under section 1619(b) gradually increased to five times the initial total, and it now exceeds participation under section 1619(a) by more than four to one. The number of working recipients not participating under either of these provisions has increased by almost 65 percent.

SOURCE: Tables 1 and 9.

Chart 2.
Percentage who work, by state, December 2003

In 14 states, mostly in the South and Southeast, less than 5 percent of blind and disabled recipients were working in December 2003. The highest employment rates, 15 percent or more, were in the upper Midwest: Iowa, Minnesota, North Dakota, and South Dakota.

Skin and subcutaneous tissue	0.2	0.1
Other	0.2	0.3
Unknown	6.9	14.6

SOURCE: Social Security Administration, Supplemental Security Record (Characteristic Extract Record format), 100 percent data.

NOTE: Effective with the December 2002 edition, all recipients in each recipient category are included when computing percentages for each diagnostic category. Previously, only recipients with identified diagnoses were included in this computation.

a. Includes section 1619(b) participants.

b. Most disabled recipients classified as blind are included in this category. A few blind recipients with a primary impairment other than diseases of the eye are coded in other categories. Also, a few recipients are classified with diseases of the eye, but their impairment does not meet the definition of blindness.
