- a. Earnings of retired-worker beneficiary affect total monthly family benefit. Earnings of dependent or survivor beneficiary affect only his or her benefit. However, effective January 1985, earnings of retired-worker beneficiary do not affect benefit to divorced spouse who has been divorced at least 2 years. Effective for benefits after December 1990, the 2-year requirement is waived, if the worker was entitled to benefits before the divorce.
- b. Monthly test for self-employment income is defined in terms of substantial services. For taxable years beginning after December 31, 1977, monthly test eliminated for both wage and self-employment income except that each individual may use monthly test for 1 grace year, usually the year of retirement.
- c. Applied to self-employment income only.
- d. Special provisions for earnings in noncovered employment outside the United States.
- e. Became effective due to automatic adjustment provisions mandated by 1972 and 1973 legislation.
- f. Full retirement age is 65 for beneficiaries who attain age 62 (age 60 for widow(er)s) before 2000, gradually increasing to age 67 for beneficiaries who attain age 62 in 2022 or later.
- g. Discretionary increase included in 1977 legislation.
- h. Actual amount is \$1,041.66 2/3.
- i. Actual amount is \$1,208.33 1/3.
- j. Actual amount is \$1,291.66 2/3.
- k. Public Law 106-182, enacted April 7, 2000, eliminated the earnings test beginning with the month a beneficiary reaches full retirement age (FRA). The annual earnings test that applies in the year of attainment of FRA is based on the annual limits established under P.L. 104-121 (including the \$1 for \$3 withholding rate). In determining annual earnings for purposes of the annual earnings test under this legislation, only earnings before the month of attainment of FRA will be considered. Public Law 106-182 did not change the annual exempt amount for beneficiaries who are under FRA throughout the year, which continues to be pegged to increases in the average wage.
- l. Actual amount is \$1,416.66 2/3.
- m. Actual amount is \$2,083.33 1/3.

a. Earnings above the maximum amount ordinarily demonstrate SGA; earnings below the minimum amount show that SGA has not occurred. When earnings are between the minimum and maximum, other factors are considered.

b. The 1977 amendments provided that, effective 1978, earnings of blind beneficiaries would be evaluated under different SGA guidelines than nonblind beneficiaries.

c. Pre-1978 guidelines are the same as those applicable to nonblind beneficiaries.

d. Annual amounts were determined by automatic adjustments linked to increases in average wage level. The amounts equal the monthly exempt amounts under the earnings test applicable to beneficiaries who have reached full retirement age (see Table 2.A29 for the 1983–1995 amounts).

e. Computed as follows: Nonblind SGA amount for 2000, multiplied by the ratio of the 2001 national average wage index to the 1998 index. Rounding is to the nearest multiple of \$10. (Had this computation produced a lower SGA level than the 2002 level, the 2002 level would have been used.)

f. Computed as follows: Blind SGA amount for 1994, multiplied by the ratio of the 2001 national average wage index to the 1992 index. Rounding is to the nearest multiple of \$10. (Had this computation produced a lower SGA level than the 2002 level, the 2002 level would have been used.)

NOTES: Earnings are net of any wage subsidies and impairment-related expenses.

SGA guidelines for self-employed individuals differ from the guidelines for wage earners.

Self-employment activity is generally examined in terms of time spent and degree of effort, as compared with that of nondisabled self-employed individuals.

NOTES: Income is defined as modified adjusted gross income, plus 50 percent of Social Security and Tier 1 Railroad Retirement benefits. Modified adjusted gross income is adjusted gross income (before Social Security or Railroad Retirement benefits are considered), plus tax-exempt interest income, with further modification of adjusted gross income in some cases involving certain tax provisions of limited applicability among the beneficiary population.

Social Security and Tier 1 Railroad Retirement benefits include workers' compensation benefits to the extent they cause a reduction in Social Security or Tier 1 Railroad Retirement disability benefits.

- a. Adjusted gross income (before Social Security or Railroad Retirement benefits are considered), plus tax-exempt interest income, with further modification of adjusted gross income in some cases involving certain tax provisions of limited applicability among the beneficiary population.
- b. Social Security and Tier 1 Railroad Retirement benefits, including workers' compensation benefits to the extent they cause a reduction in either of these two types of benefits.
- c. For married couples filing joint returns, up to 50 percent of benefits are subject to income tax if gross income is over \$32,000 but less than \$44,000. If gross income is less than \$32,000, none of the Social Security benefits will be taxable. If gross income exceeds \$44,000, up to 85 percent of Social Security benefits will be taxable income. Similar lower and upper level thresholds or "base amounts" for single individuals are \$25,000 and \$34,000. There is no similar threshold or base amount for married individuals who live together but file separate returns (for example, up to 85 percent of Social Security benefits in those cases may be considered taxable income).
- d. Includes only married taxpayers filing separately who lived with their spouse at any time during the tax year; married individuals filing separately who did not live with their spouse are treated the same as unmarried individuals.
