Installation Summaries from the FY 2005 Survey of Threatened and Endangered Species on Army Lands

This report, as part of a continuing series, summarizes the Army's Threatened and Endangered species data. Data are obtained from various sources, including the Army Environmental Data Base - Environmental Quality (AEDB-EQ), U.S. Fish and Wildlife Service (FWS), Headquarters Department of Army (HQDA), Installation Management Agency (IMA) Regions, Major Commands (MACOMs), and Army installations. Installation-level data provide information

on federally-listed species occurrences onsite or contiguous to each installation. Species-level data list all installations on which each species occurs. Corresponding information on federal status, critical habitat, and threatened and endangered species expenditures are provided. Also included in the report is information on species at risk (SAR) and migratory birds, with web links for further information.

1 Executive Summary

As of 1 October 2005, the Army has recorded 188 federally Threatened and Endangered (T&E) (definitions found in section 5) species on 102 installations. Figure 1 shows the breakdown by category of the onsite¹ T&E species for Fiscal Year (FY) 2005. The Army also has 14 installations with designated critical habitat occurring for one or more species, and two (2) of these installations have unoccupied critical habitat. Appendices A, B, and C provide data on all the installations and federally Threatened, Endangered, Proposed, and Candidate Species (TEPC) reported in FY 2005. To allow for quick and easy reference, the data have been sorted by installation, scientific name and common name (by category) in Appendix A, B, C, respectively.

In FY 2005, the Army spent approximately \$42 million on TEPC management. This figure includes Endangered Species Act (ESA) reportable expenses² of approximately \$41 million³, including expenditures on both onsite and contiguous species. In addition, over \$1 million were spent on non-reportable expenses⁴ for onsite and contiguous⁵ species. These monetary figures do not include dollars that are expended by military operations or military construction for work-arounds and avoidance. Figure 2 shows reportable and non-reportable expenses from FYs 1991-2005 (non-reportable costs captured 1998 and forward). Table 1 shows the top ten species, in terms of expenditures, for FY 2004 & 2005.

Figure 1. Onsite T&E by Category for FY 2005

¹ Species that have been documented on the installation.

² Money spent primarily for the conservation of Threatened and Endangered species pursuant to the Endangered Species Act.

³ Over 50% of expenditure was for implementation of conservation measures for the expansion of the National Training Center at Fort Irwin.

⁴ Money spent on multi-species projects where no specific amount of money is attributable to individual listed species.

⁵ Species known to occupy or otherwise use habitat adjacent to an installation, which may be affected by installation activities.

Figure 2. Reportable and Non-reportable T&E expenditures.

Table 1. Army's top T&E expenditures for FY 2004 & 2005.

Top Expenditures for FY 2004		Top Expenditures for FY 2005	
Species Common Name	Reportable Expenditures (\$K)	Species Common Name	Reportable Expenditures (\$K)
Red-cockaded woodpecker	\$4,500.70	Desert tortoise*	\$23,690.4
Golden-cheeked warbler	\$2,137.00	Red-cockaded woodpecker	\$3,811.3
Black-capped vireo	\$2,135.80	Bald eagle	\$2,806.9
Desert tortoise	\$1,083.10	Indiana bat	\$1,178.6
Gopher tortoise	\$930.00	Black-capped vireo	\$991.2
Indiana bat	\$904.70	Golden-cheeked warbler	\$845.0
Gray bat	\$764.90	Gray Bat	\$757.3
Bald eagle	\$708.50	Gopher tortoise	\$725.0
Saint Francis' satyr butterfly	\$400.00	Huachuca water-umbel	\$377.2
Southwestern willow flycatcher	\$335.00	Mexican spotted owl	\$374.4

* Majority of expenditure due to implementation of conservation measures for the expansion of the National Training Center at Fort Irwin.

2. Introduction

Background

The Army's primary mission is to provide national defense. However, as a federal agency, the Army is also required by the ESA to conserve the federally listed T&E species that occur on the lands where it conducts the training of soldiers, testing of weapons and all other functions essential for national defense. Data collection efforts provide the Army with information that it needs to monitor and manage TEPC, species at risk (SAR), and their habitats (refer to Section 5 for an expanded definition of the acronyms). Each year, installations enter data on TEPC into the Army Environmental Data Base – Environmental Quality [AEDB-EQ; formerly known as the Environmental Quality Report (EQR)] to provide Headquarters, Department of the Army (HQDA) with a list of TEPC occurring within their boundaries and on surrounding lands. This information gives the Army the ability to assess the status of its TEPC nationwide, to plan for expenditures related to TEPC, and to deal proactively with any potential conflicts between TEPC and the military mission and management efforts. SAR information is not provided by installations, but was taken from the "Species at Risk on Department of Defense Installations" report prepared by NatureServe [DoD 2004 - an update of the 2002 species of concern report (DoD 2002)], and has been used to identify species that are priority due to their potential for listing and impact on military readiness.

The information provided in this report only reflects those TEPC that are found on or adjacent to property owned or leased by the Army. The Army will also train on land owned by other services. Such lands may have restrictions due to listed or proposed species that affect timing, duration and intensity of training for these units, such as Army National Guard (ARNG) training on Camp Pendleton or Eglin Air Force Base. The respective service landowner reports these species, so they are not captured in this report. However, the Army is still required to comply with ESA for actions on these sites; therefore, the Army's financial responsibilities for ESA compliance extends beyond Army properties.

The Army Reserve has six installations and ±1,500 facilities spread throughout the country. Base operation functions of this Command are part of the Installation Management Agency (IMA). The installations and the 9th Regional Readiness Command (RRC) have transferred over to the IMA Regions, but the facilities have stayed with the Army Reserve. These facilities are all organized and reported under 11 RRCs (excluding the 9th), each covering multiple states. Therefore, TEPC species recorded for the RRCs, the specific location or state where the species occurs is not captured for most of the species recorded in this document.

This report may not capture all the TEPC found on installations that are closed or being closed under Base Realignment and Closure (BRAC) law. The Army does not require these installations to submit data into the AEDB-EQ, nor are they required to prepare Integrated Natural Resources Management Plans (INRMPs) under the Sikes Act (Public Law 86-797, as amended; 16 U.S.C. §§ 670-670f). An independent data request was made to update the BRAC installations. These installations may not have an impact on military training or testing, but the presence of listed species could provide tremendous challenges in the effort to dispose of BRAC property.

Objective

The objective of this project is to analyze and report the most current TEPC information from the FY 2005 AEDB-EQ and other available data sources. This data will help the Army plan how to best comply with its obligations under the ESA and perpetuate its role as an active and effective steward of public land while carrying out its military mission.

Approach

Information summarized by this report is collected from the AEDB-EQ and other sources. TEPC-related AEDB-EQ questions include federal status, presence of critical habitat, and total expenditures for each species on an installation. The U.S. Army Environmental Center (USAEC) obtained other necessary data and clarifications from the U.S. Fish and Wildlife Service (FWS), National Oceanic and Atmospheric Administration - National Marine Fisheries Service (NOAA-Fisheries), HQDA, Major Commands (MACOMs), IMA, and Army installations.

Scope

This report encompasses all Army installations with federally-listed onsite or contiguous species as of the end of FY 2005 (30 September 05). Federally-listed species include: Threatened, Endangered, Proposed Threatened, Proposed Endangered, or Candidate status. For practical purposes, the survey represents a complete census of Army installations with TEPC. Data in this report are most reflective of current installation summaries, as these data were quality assured/quality controlled at the IMA, ARNG, BRAC, RRC, USAEC, and installation levels. The USAEC tracks the interim status of all information, including new federal listings, species status, and critical habitat designations on Army lands.

3. Changes from Fiscal Year (FY) 2004 Threatened, Endangered, Proposed and Candidate Species (TEPC) Survey

New Species Reported and Species Removed from Installations Reporting TEPC in FY 2005

Table 2 reflects species reported by installations for the first time in FY 2005. Eight species recorded by a total of six installations were added since the FY 2004 published report. Twenty of the 22 species are recorded onsite and the Steller sea-lion and the Fender's blue butterfly are recorded as contiguous.

Table 2. Species Reported in FY 2005 that were not reported in FY 2004.

Scientific Name	Common Name	Category	Status
<i>Abutilon sandwicense</i>	No common name	Plant	E
<i>Achatinella bulimoides</i>	Pupu kuahwi	Snail	E
<i>Chamaesyce herbstii</i>	`Akoko	Plant	E
<i>Cyanea calycina</i>	Haha	Plant	C
<i>Cyanea grimesiana ssp. grimesiana</i>	Haha	Plant	E
<i>Cyanea grimesiana ssp. obatae</i>	Haha	Plant	E
<i>Cyanea longiflora</i>	Haha	Plant	E
<i>Eumetopias jubatus</i>	Sea-lion, Steller	Mammal	T
<i>Icaricia icarioides fenderi</i>	Butterfly, Fender's blue	Insect	E
<i>Joinvillea ascendens ascendens</i>	Ohe	Plant	C
<i>Limnanthes vinculans</i>	Meadowfoam, sebastopol	Plant	E
<i>Manduca blackburni</i>	Moth, Blackburn's sphinx	Insect	E
<i>Megalagrion leptodermis</i>	Damselfly, crimson Hawaiian	Insect	C
<i>Panthera onca</i>	Jaguar	Mammal	E
<i>Phyllostegia kaalaensis</i>	No common name	Plant	E
<i>Phyllostegia parviflora</i>	No common name	Plant	E
<i>Rana subaquavocalis</i>	Frog, Ramsey Canyon leopard	Amphibian	C
<i>Scaphirhynchus albus</i>	Sturgeon, pallid	Fish	E
<i>Schiedea kaalae</i>	No common name	Plant	E
<i>Sesbania tomentosa</i>	Ohai	Plant	E
<i>Stenogyne kanehoana</i>	No common name	Plant	E
<i>Tetramolopium lepidotum ssp. lepidotum</i>	No common name	Plant	E

Table 3 represents the species no longer reported on or contiguous to any Army installation in FY 2005 due to withdrawal from consideration, new distribution information, installation closures, or the species no longer recorded by an installation. The species in Table 3 represent a total of 13 installations.

Table 3. Species removed from installations reporting in FY 2005.

Scientific Name	Common Name	Category	Status 04	Status 05
<i>Achatinella leucorraphe</i>	Pupu kuahwi	Fish	E	E
<i>Cyanea lanceolata</i>	Haha	Plant	C	C
<i>Cynomys ludovicianus</i>	Prairie dog, black-tailed	Mammal	C	None

4. Summary Information

Installation and Species Information

For the FY 2005 reporting period, information was collected from a total of 129 installations that have either onsite or contiguous TEPC. Of those responding, 103 installations (79.8%) reported onsite TEPC (one installation reported only candidate species onsite) and 26 installations (20.2%) reported only having contiguous TEPC. No installations reported proposed threatened or proposed endangered species.

Of the 246 TEPC species⁶ recorded onsite or contiguous to Army installations, 169 (68.7%) are Endangered, 46 (18.7%) are Threatened, 30 (12.2%) are Candidates, 2 (<1%) are Threatened due to similarity of appearance [T(S/A)] (American alligator & desert tortoise^{***}) (Table 4). By category, 54.5% of the species are plants, 14.2% are birds, 5.7% are mammals, 5.7% are insects, 5.3% are fish, 5.3% are reptiles, 4.9% are snails, 2.4% are amphibians, 1.2% are crustaceans, <1% are arachnids and clams combined (Table 4).

The 129 installations with onsite or contiguous TEPC include 11 Army Materiel Command (AMC), 59 ARNG, three Army Reserve Readiness Commands (USAR), six BRAC, 11 IMA NE Region (NERO), 9 IMA NW Region (NWRO), seven IMA Pacific Region (PAC), 11 IMA SE Region (SERO), and 12 IMA SW Region (SWRO) installations. Table 5 summarizes the numbers of TEPC species that occur within the MACOMs, BRAC and IMA.

Table 4. Federal Status of Onsite or Contiguous TEPC Species by Category for FY 2005.

	Candidate	Threatened	Endangered	Threatened (S/A)	Total by Category
Amphibians	1	3	2	0	6
Arachnids	0	0	1	0	1
Birds	3	9	24	0	36
Clams	0	0	1	0	1
Crustaceans*	1	1	1	0	3
Fish	1	6	6	0	13
Insects	4	2	8	0	14
Mammals	1	4	9	0	14
Plants**	15	16	103	0	134
Reptiles	3	6	3	2 ^{***}	13
Snails	1	0	11	0	12
Total	30	47	169	1	247

*Due to conservation agreement between Camp Shelby and FWS, the Camp Shelby burrowing crayfish is no longer a Candidate Species.

** One threatened species, the Eggert's sunflower, was delisted on 18 August 2005.

*** Includes the T(S/A) for desert tortoise, which is also listed as threatened on a number of installations.

⁶ Species that have more than one federal designation (i.e., T or E depending on location such as the steelhead in WA, or desert tortoise which has T or T(S/A) status depending on location) or are subspecies of the same species (i.e., Mexican and Northern spotted owls) are recorded as one species.

Table 5. Federal status of onsite or contiguous TEPC reported by AMC/ARNG/BRAC/IMA installations.

	Candidate	Threatened	Endangered	Threatened (S/A)	TOTAL # of Species	# of Records Reported	# Installations W/ Onsite T&Es
AMC	0	3	6	1	10	14	8
Army National Guard Bureau	0	16	14	2	31	122	44

Threatened and Endangered (T&E) Species

A total of 216 different T&E species (422 occurrences) were identified by 128 of the 129 installations that reported having onsite or contiguous TEPC. Of the 128 installations, 102 reported having onsite and/or contiguous T&E species. The remaining 26 installations reported having only contiguous T&E species. Of the 216 T&E species, 188 species occurred onsite and the remaining 29 species were reported as being contiguous to at least one installation and not onsite at any installation (Table 6). See Appendix D and E, respectively, for a list of installations with T&E species onsite and of all the T&E species found on Army installations.

Table 6. Installations reporting Threatened & Endangered species for FY 2005.

	Onsite	Contiguous Only	Total
Number of Installations	102	26	128
Number of Distinct Species	188	28	216
Number of Species Occurrences	344	81	425

The bald eagle was the most commonly reported T&E species on Army installations. Fifty-seven installations reported the bald eagle, of which 45 of them identified it as onsite. Thirteen of the installations recorded the bald eagle as the only T&E species found onsite. The red-cockaded woodpecker and Indiana bat were tied for second with each having 11 installations reporting them as onsite or contiguous. Nine installations reported the gray bat on or contiguous to them.

IMA Pacific Region installations have the most T&E species recorded onsite: Schofield Barracks with 43 onsite T&E species, followed by Makua Military Reservation with 38, Kawaihoa Training Area with 28, and Pohakuloa Training Area with 18. A distant fifth is Camp Blanding (ARNG) with eight (8) followed by Fort Stewart (SERO), Fort Hunter Liggett (NERO), White Sands Missile Range (SWRO) and Fort Ruger (ARNG), each with six (6).

Proposed and Candidate Species

A total of 30 distinct Candidate species were identified from the 129 installations that reported having onsite or contiguous TEPC. No installations reported having proposed species. A total of 15

installations reported having Candidate species on or contiguous to them. One of these installations reported having only a Candidate species on or contiguous to them. All 30 distinct Candidate species identified on Army lands occurred within at least one (1) installation's boundary (Table 7).

Table 7. Installations reporting Candidate species for FY 2005.

	Onsite	Contiguous	Total
Number of Installations	14	0	14
Number of Distinct Species	30	0	30

What is a Candidate Species?

FWS Candidate Species:

First and foremost, candidate species are not afforded protection under the ESA. However, these species are eligible for listing and could be proposed for listing or be emergency listed at any time. There are two ways in which a species becomes a candidate species. The first route is via petition and the second route is a FWS internal process.

1) Petition: A person and/or group submits a petition to the FWS to list a species under the ESA. Petitions are basically a factual argument justifying why a species should be listed in accordance with any of the five listing factors [ESA Section 4(a)(1)]. When the FWS receives such a petition, they have 90-days to determine, and then publish in the Federal Register, whether the information in the petition and within their files presents substantial scientific or commercial information indicating that listing the species may be warranted. There are two possible outcomes of a 90-day finding:

a) If the FWS determines that the information available does not warrant listing of the species, then the FWS takes no further action on the petition and the species is no longer considered for listing, at least at that time.

b) If the FWS determines that listing **may** be warranted, then the FWS will initiate a 12-month status review of the species to determine if proposing a rule to list the species **is** warranted. The FWS reviews all the available scientific and commercial information on the species and then after the 12-month period, publishes their findings in the Federal Register. There are three potential outcomes to a 12-month review, and they are:

- (i) Listing is not warranted,
- (ii) Listing is warranted, but precluded by higher listing priority actions (a candidate species is born), or
- (iii) Listing is warranted, and a rule to list the species is proposed.

A species becomes a candidate species if a "(ii)" finding is made.

2) FWS internal process: On 5 December 1996 (61 FR 64481), the FWS made a final decision to include as candidate species those species for which they had sufficient information on file on the biological vulnerability and threat(s) to support issuance of a proposed rule to list the species, but for which a proposed rule is precluded. This standard for making a species a candidate is identical to the standard for making a "warranted-but-precluded" 12-month finding on a petition to list.

Therefore, all candidate species are species in which the FWS has sufficient information on file to support a proposal to list as endangered or threatened, but in which issuance of a proposed rule is currently precluded by higher priority listing actions.

National Marine Fisheries Service (NOAA-Fisheries) Candidate Species

The process NOAA-Fisheries uses to classify a species as a candidate is virtually the same as FWS, but with one difference. If on a 90-day finding NOAA-Fisheries determines that a petition to list a species presents substantial scientific information indicating the petitioned action may be warranted, then they will classify the species as a candidate. Therefore, a positive 90-day finding, and not the 12-month finding as with FWS, is the criteria designating candidate status to a species.

In summary, Candidate species will remain as such until the FWS or NOAA-Fisheries, depending on who has jurisdiction over the species, determines that listing is not warranted, proposes the species for listing, or emergency lists the species within its authority under section 4(b)(7) of the ESA. Once a species is proposed for listing, it is afforded some protection under the ESA.

Experimental Populations Under the ESA

The FWS and NOAA-Fisheries have the authority to reintroduce populations into unoccupied portions of a listed species' historical range when doing so would foster the conservation and recovery of the species. Under section 10(j) of the Act, FWS or NOAA-Fisheries can designate reintroduced populations established outside the species' current range, but within its historical range, as "experimental."

FWS or NOAA-Fisheries determines whether an experimental population is "essential" or "non-essential" to the continued existence of the species. Regulatory restrictions are considerably different between the two designations.

Species designated as "essential experimental populations" are afforded the full protection of the ESA. However, according to the FWS' Threatened and Endangered Species System queried in February 2006, no reintroduced listed species have been given this designation. All experimental population designations to date have been "non-essential."

Under ESA Section 9, a reintroduced species designated as a "non-essential experimental population" (NEP) is treated as threatened or proposed threatened, depending on where it is located.

Within a National Wildlife Refuge or unit of the National Park System, a NEP is treated as a threatened species in which all the provisions of the ESA applies. When a NEP is located on other federal property, the population is treated as a proposed species and section 7(a)(1) and section 7(a)(4) apply. ESA Section 7(a)(4) requires federal agencies to confer (not consult) with FWS or NOAA-Fisheries on actions that are likely to jeopardize the continued existence of a proposed species. The results of a conference are advisory in nature and do not restrict agencies from carrying out, funding, or authorizing activities.

Species at Risk

The DoD Legacy Program funded a cooperative FWS and DoD project to identify species at risk⁷ on military installations. NatureServe prepared the report and delivered it to DoD in 2002 (DoD 2002). In 2004, NatureServe submitted a revised report to DoD that provided more in-depth analyses of SAR within installations and in buffer areas surrounding installations (DoD 2004). Species identified in the report occur on or within a 2 kilometer buffer of a military site. The report is not inclusive of all Army installations. The report does not capture Army Reserve properties other than the Army Reserve installations that are a part of IMA or many of the Army National Guard sites. The report also does not, nor was it intended to, specifically address migratory birds of concern as referenced in Executive Order 13186 -- Responsibilities of federal Agencies To Protect Migratory Birds, but some of these bird species are also identified as SAR. The 2004 report is a useful resource for identifying SAR that may be on or near DoD property. The 2004 report can be accessed at the following web address:

⁷ Species at risk (SAR); species that are classified by NatureServe scientists as critically imperiled (G1 or T1) or imperiled (G2 or T2) on a global scale or Candidate species under the ESA (DoD 2002).

https://www.denix.osd.mil/denix/Public/Library/NCR/Endangered_sp.html

On 29 July 2005, HQDA established policy to manage SAR and their habitats in order to preclude the need for federal listing or prepare installations for imminent listings. The policy specifically focuses on Category 1 installations. The Army is in the process of finalizing policy and guidance of the SAR program that focuses on the proactive conservation of SAR. The goal of the program is to support military readiness and sustainability while furthering conservation of declining species.

Critical Habitat

The FWS and NOAA-Fisheries have designated critical habitat for 474 species; 13 of those species have designations on 14 Army installations (Table 8). There is a total of 15 occurrences of critical habitat on Army installations and of these, two of the designations is on unoccupied critical habitat, which means that the species is not known to occur within the area designated as critical habitat but the area contains those constituent elements essential to the conservation of the species.

What is Critical Habitat and Adverse Modification?

Section 3 of the ESA defines critical habitat as, "(i) the specific areas within the geographic area occupied by the species ... on which are found those physical or biological features (I) **essential to the conservation of the species** and (II) which may require special management considerations or protection; and (ii) specific areas outside the geographic area occupied by the species at the time it is listed ... upon a determination ... that such areas are essential for the conservation of the species." "Conservation" means the use of all methods and procedures that are necessary to bring a listed species to the point at which listing under ESA is no longer necessary, or in other words, "recovery".

Federal agencies are to ensure that their actions do not result in the destruction or adverse modification of critical habitat, which would be an action that has "a direct or indirect alteration that appreciably diminishes the value of critical habitat for **both the survival AND recovery** of a listed species. Such alterations include, but are not limited to, alterations adversely modifying any of those physical or biological features that were the basis for determining the habitat to be critical." (50 CFR Part 402.02). The FWS' application of "destruction or adverse modification" has been identical to a jeopardy determination. With each classification having similar thresholds, the FWS and other federal agencies regarded the designation of statutory critical habitat as providing little additional protection other than for unoccupied areas. Although, for unoccupied critical habitat, survival is not a factor, so by regulatory definition, it would appear impossible to reach the "survival and recovery" threshold; therefore, there is no value of critical habitat on such lands other than the regulatory burden it places upon the Federal agency.

Recently, however, a few federal and circuit court rulings have basically redefined "destruction or adverse modification" to mean impacts on **either survival OR recovery**. The courts believe this is more in line with the statutory definition of critical habitat, which ties critical habitat to conservation (recovery) and not just survival. This new application of the ESA would clearly separate "jeopardy" and "destruction or adverse modification" with the latter now having a lower threshold. Application of this new definition would mean an action could result in the "destruction or adverse modification" of critical habitat without reaching the "jeopardy" threshold. An action proposed on unoccupied critical habitat could now be subject to the "destruction or adverse modification" threshold.

On 9 Dec 04, FWS issued a director's memorandum stating that FWS should no longer rely on the regulatory definition of "destruction or adverse modification" in their evaluation of federal actions. Instead, FWS Regions are to use conservation of the species as their threshold. On 4 January 2006, Army issued critical habitat guidance that address' the changes in the critical habitat designation process and adverse modification threshold. The policy can be found at the following website:

<http://aec.army.mil/usaec/natural/natural01.html>

The list of critical habitat occurrences on Army installations decreased by two from what was recorded in FY 2004. However, there are ten differences from the FY 2004 report. Fort Ord no longer reports critical habitat for three species. The portions of Fort Ord that contained critical habitat are no longer under Army control. The three ARNG Armories in Alaska did not report unoccupied critical habitat for the spectacled eider. Lastly, four installations; Fort Ruger, Kanaio Wets, Kekaha Wets, and Warrenton/Camp Rilea (all ARNG); reported critical habitat for the first time or for a new species (Fort Ruger) in FY05. Critical habitat for their respective species were designated in the past, but not recorded until this time. Table 8 identifies the installations with designated critical habitat and the associated species.

Table 8. Critical habitat designated on Army installations, as of end FY 2005.

MACOM/ Region	Installation	Federal Status	Category	Scientific Name	Common Name	Species Onsite or Contiguous
ARNG	Camp Navajo	T	Bird	<i>Strix occidentalis lucida</i>	Mexican spotted owl	Onsite
ARNG	Fort Ruger	E	Plant	<i>Cyperus trachysanthos</i>	Pu`uka`a	Onsite
ARNG	Fort Ruger	E	Plant	<i>Spermolepis hawaiiensis</i>	No common name	Onsite
ARNG	Kanaio Wets	E	Insect	<i>Manduca blackburni</i>	Blackburn's sphinx moth	Onsite
ARNG	Kekaha Wets	E	Plant	<i>Panicum niuhauense</i>	Lau`ehu	Onsite
ARNG	Santa Cruz Armory	T	Plant	<i>Holocarpha macradenia</i>	Santa Cruz tarplant	Onsite
ARNG	Warrenton/Camp Rilea	T	Insect	<i>Speyeria zerene hippolyta</i>	Oregon silverspot butterfly	Onsite
NWRO	Fort Lewis	T	Bird	<i>Strix occidentalis caurina</i>	Northern spotted owl	Contiguous
PAC	Kawailoa TA	E	Bird	<i>Chasiempis sandwichensis ibidis</i>	O'ahu 'elepaio	Contiguous
PAC	Makua Military Reservation	E	Bird	<i>Chasiempis sandwichensis ibidis</i>	O'ahu 'elepaio	Onsite

PAC	Schofield Barracks Military Reservation	E	Bird	<i>Chasiempis sandwichensis ibidus</i>	O'ahu 'elepaio	Onsite
SWRO	Fort Huachuca	E	Plant	<i>Lilaeopsis schaffneriana</i> var. <i>recurva</i>	Huachuca water-umbel	Onsite
SWRO	Fort Irwin	T	Reptile	<i>Gopherus agassizii</i>	Desert tortoise	Onsite
SWRO	White Sands Missile Range	E	Plant	<i>Hedeoma todsenii</i>	Todsens pennyroyal	Onsite

Installations Excluded from Critical Habitat Designation Based on ESA 4(a)(3)(B) and/or 4(b)(2)

On 24 November 2003, the President signed the National Defense Authorization Act for FY 2004 (NDAA) (Public Law 108-136). Contained within this law are a number of environmental provisions that impact the military. Specifically, Section 318 precludes the FWS and NOAA-Fisheries from designating critical habitat on any areas owned, controlled, or designated for use by the DoD, if such areas are subject to an INRMP that provides a benefit to the species subject to critical habitat designation [ESA 4(a)(3)(B)]. The conference report states that Congress expects the Secretary of the Interior to establish criteria in determining if an INRMP provides benefits to the species. The FWS has produced a draft of these criteria, which are undergoing an internal review. If the FWS/NOAA-Fisheries does not determine an INRMP provides a benefit to the species, then the applicable regulatory agency can designate critical habitat on the respective installation. The act also amends the ESA by requiring the FWS or NOAA-Fisheries to consider the impacts of critical habitat designation on national security. Therefore, the FWS or NOAA-Fisheries may preclude designation of critical habitat on a military reservation if they conclude, regardless of the status of an INRMP, that such a designation would have a significant impact on national security [ESA 4(b)(2)]. However, neither FWS nor NOAA-Fisheries can exclude an area as critical habitat solely based on 4(b)(2) if the exclusion would result in the extinction of the species concerned. Although, the ESA does not prevent FWS from excluding lands as critical habitat even if such exclusion would prevent the conservation of the species. Lastly, NDAA section 318 does not affect the prohibition on the taking of listed species or the requirements to consult and to not jeopardize the species.

Over the past fiscal year, 10 Army installations have been excluded from critical habitat designation based on these ESA amendments. These exclusions were based on both 4(a)(3)(B) and 4(b)(2), and three on both. One common factor for all the exclusions was that the Army installations provided essential information to the FWS or NOAA-Fisheries that was necessary for them to make their determination. Such proactive measures have proven to be very beneficial to Army installations.

To make the "benefit" determination of an INRMP, the FWS has been using the following criteria: (1) A current INRMP must be complete and provide a conservation benefit to the species; (2) the plan must provide assurances that the conservation management strategies will be implemented; and (3) the plan must provide assurances that the conservation management strategies will be effective, by providing for periodic monitoring and revisions as necessary. Table 9 lists the 10 installations that the FWS has excluded from critical habitat designation. The Army was excluded from critical habitat for seven species, with a total of 14 exclusions.

Table 9. Installations excluded from critical habitat designation.

INSTALLATION	SPECIES	EXCLUSION	DATE
Fort Hunter Liggett	Vernal pool fairy shrimp	4(b)(2)	3/8/05
Camp Roberts	Vernal pool fairy shrimp	4(a)(3)(B)	3/8/05
Fort Irwin	Lane-mountain milk-vetch	4(b)(2)	4/8/05
Fort Hunter Liggett	Arroyo toad	4(b)(2)	4/13/05
Fort Hunter Liggett	California tiger salamander	4(a)(3)(B)	8/23/05
Fort Ord	California tiger salamander	4(b)(2)	8/23/05
Parks RFTA	California tiger salamander	4(a)(3)(B)	8/23/05
Camp Roberts	Steelhead	4(a)(3)(B)	9/2/05
Camp San Luis Obispo	Steelhead	4(a)(3)(B)	9/2/05
Fort Lewis	Chinook salmon	4(a)(3)(B) & 4(b)(2)	9/2/05
Pier 23	Chinook salmon	4(a)(3)(B) & 4(b)(2)	9/2/05
Yakima Training Center	Steelhead	4(a)(3)(B) & 4(b)(2)	9/2/05

Table 9 continued

INSTALLATION	SPECIES	EXCLUSION	DATE
Mare Island Army Reserve Center	Steelhead	4(a)(3)(B)	9/2/05
Fort Lewis	Bull trout	4(a)(3)(B)	9/26/05

Expenditures

T&E expenditures are broken down into reportable and non-reportable expenditures. Reportable expenditures include money spent primarily for the conservation of T&E species pursuant to the ESA, in which the expenditures can be identified for a specific species. Non-reportable expenditures are money spent on multi-species projects where no specific amount of money is attributable to individual listed species. These expenses are typically incurred to prevent listing or proactively prepare an installation, with respect to the ESA, if such a species is listed. Table 10 provides a summary of Army reportable expenses from FY2000-FY2005.

In reportable expenditures, a total of \$40,998K was spent for onsite T&E species in FY 2005, which includes funds spent on T&E research and development projects. This figure is nearly \$20 million greater than the second highest FY expenditure. The dramatic increase is due to implementation of desert tortoise conservation measures by Fort Irwin for the expansion of the National Training Center. Expenditures for all species categories is provided in Table 11. Expenditures for specific Candidate species were reported as approximately \$250K in FY 2005.

Approximately \$1,010K was spent by ARNG, but no funds were expended by AMC, BRAC or Army Reserve installations on reportable species in FY 2005. Under the IMA in FY 2005, the NERO spent approximately \$2,200K, NWRO \$1,270K, PAC \$2,480K, SERO \$4,430K, and SWRO \$27,700K on reportable species.

An additional \$1,002K was spent in non-reportable expenditures in FY 2005. This figure is considerably lower than previous years because non-reportable expenditures were not captured in the FY05 AEDB-EQ data call.

Table 10. Reportable expenditures (\$K) over the last 5 years (FY 2000-FY 2005).

Year (FY)	2005	2004	2003	2002	2001	2000
Reportable Expenditures (\$K)	\$40,997.6	\$21,271.4	\$21,274.8	\$18,369.3	\$15,533.6	\$17,568.6

Table 11. FY 2004 & FY 2005 comparison of reportable expenditures (\$K) by category.

FY 2004 Expenditures (\$K)		FY 2005 Expenditures (\$K)	
Mammals	\$2,111.2	Mammals	\$2,332.2
Birds	\$10,552.7	Birds	\$9,500.4
Reptiles	\$2,057.8	Reptiles	\$24,436.8*
Amphibians	\$394.3	Amphibians	\$161.0
Fish	\$121.0	Fish	\$213.7
Arachnids	\$50.0	Arachnids	\$100.0
Insects	\$744.2	Insects	\$735.0
Snails	\$523.4	Snails	\$191.0
Crustaceans	\$204.7	Crustaceans	\$118.8
Plants	\$4,512.7	Plants	\$3,208.7

Consistent Reporting

The Army is frequently asked for information on T&E species. However, the intricacy of the data results in multiple answers to the question, "How many T&E species are on Army lands?" For consistency, the number provided, unless other data are specifically requested, will be the number of different T&E species recorded as onsite⁸, not contiguous to, Army installations. A Threatened or Endangered species may be recorded on more than one installation, but it is only counted once. Species that have more than one status (i.e., threatened in one part of its range and endangered in another) are recorded as one species. This rationale also applies to listed subspecies, such as the *Cyanea grimesiana* ssp. *Grimesiana* and *Cyanea grimesiana* ssp. *obatae* are reported as one species even though they are listed separately. Table 12 shows these numbers for FY 2000 through FY 2005. In the table, the number of installations reflects the number of distinct installations that have recorded one or more T&E species onsite.

Table 12. Number of T&E species by fiscal year.

	Fiscal Year	# of species	# of installations
Onsite	2000	170	94
	2001	172	99
	2002	170 ^a	92 ^a
	2003	175	95
	2004	177	100
	2005	188	102

^a Figures for FY 2002 are not official.

Migratory Birds

In June of 2004, the FWS published a **proposed rule** on the take of migratory birds by the DoD. This proposed rule was a requirement of Section 315 of the NDAA of 03, which exempted DoD from the **unintentional take of migratory birds during military readiness activities**. In short, the proposed rule requires DoD to confer and cooperate with FWS to develop appropriate conservation measures to minimize or mitigate actions that have or may have significant adverse effects on migratory bird populations. Though it is anticipated that the probability is low for any action to reach the level of significant adverse effect on a population, the species most likely to experience negative impacts at a population level would be those identified as species of concern. The final rule is anticipated sometime in the second or third quarter of FY 06.

The Executive Order (EO) 13186 - Responsibilities of Federal Agencies to Protect Migratory Birds, requires each Federal agency to develop and implement, a Memorandum of Understanding (MOU) with the FWS that shall promote the conservation of migratory bird populations. The MOU, amongst other things, require federal agencies to minimize the unintentional take of migratory birds, with emphasis on species of concern. The DoD **MOU** will focus on **actions that are not classified as military readiness activities**.

Although the focus of both the rule and EO are migratory bird species of concern, there is no one-source that specifically identifies all the different species of concern. There are currently seven different sources, listed below, that identify these species of concern. The most basic geographical unit by which migratory birds are designated as species of concern is the Bird Conservation Region (BCR). The species of concern identified within these BCRs are the species DoD are to be most concerned about.

⁸ Proposed species are not included in this number, even though for management purposes the Army considers them the same as T&E species.

However, not all the resources listed specifically identify which bird species are considered migratory bird species of concern on a BCR level.

- Birds of Conservation Concern published by the FWS
- North American Waterbird Conservation Plan
- United States Shorebird Conservation Plan
- Partners in Flight Bird Conservation Plans
- North American Waterfowl Management Plan
- Listed threatened and endangered bird species
- Game birds below desired population sizes

To address this problem, USAEC assisted DoD Partners in Flight with the development of a database that identifies the bird species of concern as well as the DoD installations found within each BCR. The database can be viewed at:

<http://dodpif.org/BCRMap.htm>

At this site, you can identify the BCR where your installation occurs and view all the migratory bird species of concern within that BCR.

Army has issued two policies relating to migratory birds. These policies can be found at:

<http://aec.army.mil/usaec/natural/natural01.html>

5. Definitions

Biological Opinion – The document that states the opinion of the FWS/ NOAA-Fisheries as to whether or not a federal agency's proposed action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat.

Category – Species are divided into the following categories in this report:

amphibians	insects
arachnids	mammals
birds	plants
crustaceans	reptiles
clams	snails
fish	

Category 1 Installations – Installations that have an Army-wide strategic and enduring training mission capability.

Constituent Elements – Physical and biological features of designated or proposed critical habitat essential to the conservation of the species, including, but not limited to: (1) space for individual and population growth, and for normal behavior; (2) food, water, air, light, minerals, or other nutritional or physiological requirements; (3) cover or shelter; (4) sites for breeding, reproduction, rearing of offspring, germination, or seed dispersal; and (5) habitats that are protected from disturbance or are representative of the historic geographic and ecological distributions of a species.

Consultation – The process in which each Federal agency consults with FWS/NOAA-Fisheries to insure that any action they authorize, fund, or carry out is not likely to **jeopardize** the continued existence of a listed species or result in the destruction or **adverse modification** of designated critical habitat. In fulfilling these requirements, each agency is to use the best scientific and commercial data available. Consultation can be conducted as follows:

Formal Consultation – The process between USFWS/ NOAA-Fisheries and a federal agency that commences when the federal agency determines its action may adversely affect a listed species or critical habitat. The federal agency then submits a written request for consultation with USFWS/ NOAA-Fisheries. The process concludes with the issuance of a Biological Opinion from the USFWS/ NOAA-Fisheries, stating whether or not the action is likely to result in jeopardy to the species or adverse modification of critical habitat.

Informal Consultation – The informal consultation process that may be requested by a federal agency, a designated non-federal representative, or other applicant. Informal consultation may include such topics as which species occur in the proposed action area, and what effect the action may have on listed species or critical habitats. Informal consultation often concludes with USFWS/ NOAA-Fisheries providing written concurrence with the federal agency's determination that its action is not likely to adversely affect listed species or critical habitat.

Critical Habitat – ESA Section 3(5)(A) “(i) the specific areas within the geographical area occupied by the [listed] species, at the time it is listed in accordance with the provisions of section 4 of this Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) which may require special management considerations or protection; and (ii) specific areas outside the geographical area occupied by the species at the time it is listed in accordance with the provisions of section 4 of this Act, upon a determination by the Secretary that such areas are essential for the conservation of the species.”

Distinct Species – A species may occur on several installations, but is only counted once for purposes of assessing the number of distinct species found Army-wide. For example, species X may occur on five

installations, but when the total number of species is presented, species X is only counted once. In addition, a species that has two listed subspecies (i.e., Mexican and northern spotted owls) or has multiple evolutionary significant units listed (i.e., salmon and steelhead) is only counted as one species.

Expenditures – The total cost for managing each federally listed T&E species for which funds were expended during the reporting fiscal year. Guidelines for reporting T&E expenditures are provided by the USFWS. Guidance is based on the notion of "reasonably identifiable Federal Expenditures made primarily for the conservation of Endangered and Threatened species pursuant to this [Threatened and Endangered Species] Act."

Federal Status

E – Federally Endangered

T – Federally Threatened

T(S/A) – Threatened due to Similarity of Appearance

PE – Federally Proposed as Endangered (none reported this FY)

PT – Federally Proposed as Threatened (none reported this FY)

C – Candidate for Federal Listing

Federal Action [Proposed Action] – Any activity permitted, funded, or conducted by a federal agency.

G# - Global conservation status ranks of species, assigned by NatureServe scientists:

G1 – Critically imperiled globally because of extreme rarity or because of some factor(s) making it especially vulnerable to extinction. Typically 5 or fewer occurrences or very few remaining individuals (<1,000).

G2 – Imperiled globally because of rarity or because of some factor(s) making it very vulnerable to extinction or elimination. Typically 6 to 20 occurrences or few remaining individuals (1,000 to 3,000).

Installation – The term installation includes active military installations, state ARNG offices, ARNG training sites, Army ammunition plants and depots, and regional support centers for the Army Reserve. Analyses in this report do not make a distinction between the various types. In some cases it was difficult to define "installation" data because some ARNG state offices, for example, reported on an individual basis, while others reported at the state level.

Installation Management Agency (IMA) - Installations, excluding the National Guard installations, are divided into 5 U.S. regions; Northeast, Northwest, Southeast, Southwest, and Pacific Regions. IMA Regions are responsible for supporting installation base operations. The Army Reserve base-operations is also under IMA.

Jeopardy Biological Opinion – A Biological Opinion issued by the USFWS or NOAA-Fisheries stating that a proposed action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat.

Non-jeopardy Biological Opinion – A Biological Opinion issued by the USFWS or NOAA-Fisheries stating that a proposed action may affect, but is not likely to jeopardize the continued existence of listed species or result in adverse modification of critical habitat.

Species Occurrence – An occurrence is equivalent to an individual record. For example, a species that occurs on three installations is recorded as having three occurrences.

S/A – Similarity of Appearance – A species that closely resembles a Threatened or Endangered species may be given the federal status of the species it resembles. Similarities of Appearance species are denoted with a T(S/A) or E(S/A). However, no distinction is made between S/A and T&E for reporting purposes.

Species at Risk (SAR) – Species that are Candidates under the ESA and/or are considered to be critically imperiled (global rank of G1 or T1) or imperiled (global rank of G2 or T2) and have not been federally listed (DoD 2004).

Species Location

Contiguous – Species known to occupy or otherwise use habitat adjacent to an installation, which may be affected by installation military activities and land management practices. Contiguous species are of concern to installations because of the possibility that they may at some future time be found on the installation or the installation activities may affect the species and be included in the action area for assessing potential effects.

Onsite – Species that have been documented on the installation.

T # – The status of infraspecific taxa (subspecies or varieties) following a species' global rank:

T1 – Subspecies or variety critically imperiled globally because of extreme rarity or because of some factor(s) making it especially vulnerable to extinction.

T2 – Subspecies or variety imperiled globally because of rarity or because of some factor(s) making it very vulnerable to extinction or elimination.

T&E – The term T&E includes only federally Threatened and Endangered species. These two statuses include S/A species.

TEPC – The term includes all federally Threatened, Endangered, Proposed, and Candidate species on Army lands.

Appendix E: T&E Species found on Army Installations

Scientific Name (Genus species)	Common Name	Federal Listing Status	Scientific Name (Genus species)	Common Name	Federal Listing Status
<i>Abutilon sandwicense</i>	No common name	E	<i>Branchinecta lynchi</i>	Fairy shrimp, vernal pool	T
<i>Achatinella apexfulva</i>	Pupu kuahiwi	E	<i>Branta sandvicensis</i>	Goose, Hawaiian	E
<i>Achatinella bulimoides</i>	Pupu kuahiwi	E	<i>Bufo californicus</i>	Toad, Arroyo	E
<i>Achatinella byronii</i>	Pupu kuahiwi	E	<i>Buteo solitarius</i>	Hawk, Hawaiian	E
<i>Achatinella curta</i>	Pupu kuahiwi	E	<i>Canis lupus</i>	Wolf, gray	T
<i>Achatinella decipiens</i>	Pupu kuahiwi	E	<i>Cenchrus agrimonioides</i>	Kamanomano	E
<i>Achatinella lila</i>	Pupu kuahiwi	E	<i>Chamaesyce celastroides</i> var. <i>kaenana</i>	Akoko	E
<i>Achatinella livida</i>	Pupu kuahiwi	E	<i>Chamaesyce herbstii</i>	Akoko	E
<i>Achatinella mustelina</i>	Pupu kuahiwi	E	<i>Chamaesyce rockii</i>	Akoko	E
<i>Achatinella pulcherrima</i>	Pupu kuahiwi	E	<i>Charadrius melodus</i>	Plover, piping	T
<i>Achatinella sowerbyana</i>	Pupu kuahiwi	E	<i>Chasiempis sandwichensis ibidis</i>	Elepaio, Oahu	E
<i>Acipenser brevirostrum</i>	Sturgeon, shortnose	E	<i>Chlorogalum purpureum</i>	Amole, purple	T
<i>Alectryon macrococcus</i>	Mahoe	E	<i>Chorizanthe pungens</i> var. <i>pungens</i>	Spineflower, Monterey	T
<i>Alligator mississippiensis</i>	Alligator, American	T(S/A)	<i>Cicurina madla</i>	Meshweaver, Madla's Cave	E
<i>Alsinidendron obovatum</i>	No common name	E	<i>Cirsium fontinale</i> var. <i>obispoense</i>	Thistle, Chorro Creek bog	E
<i>Alsinidendron trinerve</i>	No common name	E	<i>Coryphantha sneediivar. sneedii</i>	Cactus, Sneed pincushion	E
<i>Amaranthus pumilus</i>	Amaranth, Seabeach	T	<i>Ctenitis squamigera</i>	Pauoa	E
<i>Ambystoma californiense</i>	Salamander, California tiger	T	<i>Cyanea acuminata</i>	Haha	E
<i>Ambystoma cingulatum</i>	Salamander, flatwoods	T	<i>Cyanea crispa</i>	No common name	E
<i>Ambystoma tigrinum stebbinsi</i>	Salamander, Sonoran tiger	E	<i>Cyanea grimesiana</i> ssp <i>grimesiana & obatae</i>	Haha	E
<i>Anas wyvilliana</i>	Duck, Hawaiian	E	<i>Cyanea humboldtiana</i>	Haha	E
<i>Aphelocoma coerulescens</i>	Jay, Florida scrub	T	<i>Cyanea koolauensis</i>	Haha	E
<i>Apios priceana</i>	Potato-bean, Price's	T	<i>Cyanea longiflora</i>	Haha	E
<i>Arctomecon humilis</i>	Bear-poppy, Dwarf	E	<i>Cyanea st-johnii</i>	Haha	E
<i>Asplenium fragile</i> var. <i>insulare</i>	No common name	E	<i>Cyanea superba</i>	No common name	E
<i>Astragalus jaegerianus</i>	Milk-vetch, Lane Mountain	E	<i>Cyperus trachysanthos</i>	Pu`uka`a	E
<i>Bonamia menziesii</i>	No common name	E	<i>Cyrtandra dentata</i>	Ha`iwale	E
<i>Brachyramphus marmoratus</i> <i>marmoratus</i>	Murrelet, marbled	T	<i>Cyrtandra subumbellata</i>	Ha`iwale	E

Scientific Name (Genus species)	Common Name	Federal Listing Status	Scientific Name (Genus species)	Common Name	Federal Listing Status
<i>Cyrtandra viridiflora</i>	Ha`iwale	E	<i>Helonias bullata</i>	Pink, swamp	T
<i>Delissea subcordata</i>	Oha	E	<i>Hemignathus munroi</i>	Akiapola`au	E
<i>Dendroica chrysoparia</i>	Warbler, golden-cheeked	E	<i>Hesperomannia arborescens</i>	No common name	E
<i>Dendroica kirtlandii</i>	Warbler, Kirtland's	E	<i>Hesperomannia arbuscula</i>	No common name	E
<i>Diellia falcata</i>	No common name	E	<i>Hibiscus brackenridgei</i>	Ma`o hau hele	E
<i>Drymarchon corais couperi</i>	Snake, eastern indigo	T	<i>Himantopus mexicanus knudseni</i>	Stilt, Hawaiian	E
<i>Dubautia herbstobatae</i>	Na`ena`e	E	<i>Holocarpha macradenia</i>	Tarplant, Santa Cruz	T
<i>Echinacea laevigata</i>	Coneflower, smooth	E	<i>Howellia aquatilis</i>	Howellia, water	T
<i>Echinocereus fendleri var. kuenzleri</i>	Cactus, Kuenzler hedgehog	E	<i>Isodendrion longifolium</i>	Aupaka	T
<i>Epicrates inornatus</i>	Boa, Puerto Rican	E	<i>Isoetes louisianensis</i>	Quillwort, Louisiana	E
<i>Eugenia koolauensis</i>	Nioi	E	<i>Isotria medeoloides</i>	Pogonia, small whorled	T
<i>Euphorbia haeleeleana</i>	Akoko	E	<i>Labordia cyrtandrae</i>	Kamakahala	E
<i>Falco femoralis septentrionalis</i>	Falcon, northern aplomado	E	<i>Lampsilis higginsi</i>	Pearlymussel, Higgins' eye	E
<i>Flueggea neowawraea</i>	Mehamehame	E	<i>Lasiurus cinereus semotus</i>	Bat, Hawaiian hoary	E
<i>Fulica americana alai</i>	Coot, Hawaiian	E	<i>Lepidium arbuscula</i>	Anaunau	E
<i>Gallinula chloropus sandvicensis</i>	Moorhen, Hawaiian common	E	<i>Leptonycteris curasoae yerbabuenae</i>	Bat, lesser long-nosed	E
<i>Gardenia mannii</i>	Nanu	E	<i>Lilaeopsis schaffneriana ssp. recurva</i>	Water-umbel, Huachuca	E
<i>Gopherus agassizii</i>	Tortoise, desert	T & T(S/A)	<i>Limnanthes vinculans</i>	Meadowfoam, sebastopol	E
<i>Gopherus polyphemus</i>	Tortoise, gopher	T	<i>Lipochaeta tenuifolia</i>	Nehe	E
<i>Grus americana</i>	Crane, whooping	E	<i>Lobelia gaudichaudii ssp. koolauensis</i>	No common name	E
<i>Gymnogyps californianus</i>	Condor, California	E	<i>Lobelia niihauensis</i>	No common name	E
<i>Haliaeetus leucocephalus</i>	Eagle, bald	T	<i>Lobelia oahuensis</i>	No common name	E
<i>Haplostachys haplostachya</i>	Honohono	E	<i>Loxioides bailleui</i>	Palila	E
<i>Hedeoma todsenii</i>	Pennyroyal, Todsen's	E	<i>Lupinus sulphureus kincaidii</i>	Lupine, Kincaid's	T
<i>Hedyotis coriacea</i>	Kio`ele	E	<i>Lycaeides melissa samuelis</i>	Butterfly, Karner blue	E
<i>Hedyotis degeneri</i>	No common name	E	<i>Lycopodium nutans</i>	No common name	E
<i>Hedyotis parvula</i>	No common name	E	<i>Lysimachia asperulaefolia</i>	Loosestrife, rough-leaved	E
<i>Helianthus eggertii</i>	Sunflower, Eggert's	T	<i>Manduca blackburni</i>	Moth, Blackburn's sphinx	E

Scientific Name (Genus species)	Common Name	Federal Listing Status	Scientific Name (Genus species)	Common Name	Federal Listing Status
<i>Marshallia mohrii</i>	Button, Mohr's Barbara's	T	<i>Pritchardia kaalae</i>	Lo`ulu	E
<i>Melicope lydgatei</i>	Alani	E	<i>Pteris lidgatei</i>	No common name	E
<i>Mycteria americana</i>	Stork, wood	E	<i>Pterodroma phaeopygia sandwichensis</i>	Petrel, Hawaiian dark-rumped	E
<i>Myotis grisescens</i>	Bat, gray	E	<i>Ptilimnium nodosum</i>	Harperella	E
<i>Myotis sodalis</i>	Bat, Indiana	E	<i>Puma concolor coryi</i>	Panther, Florida	E
<i>Myrsine juddii</i>	Kolea	E	<i>Rana aurora draytonii</i>	Frog , California red-legged	T
<i>Neonympha mitchellii francisci</i>	Butterfly, Saint Francis' satyr	E	<i>Rhadine exilis</i>	Ground beetle	E
