

Advocacy: the voice of small business in government

Small Business Profile: COLORADO

In Colorado, small businesses are vital to the financial wellbeing of the state's economy. Their contribution is essential for economic growth since they make up almost all employer firms in the state. As entrepreneurs and innovators, small business owners represented a diverse group in 2004 and continued to keep the state's economy productive. The *Small Business Profile* provides information on the performance of small businesses in the state using the most current federal data available.

Number of Businesses. There were an estimated 493,886 small businesses in Colorado in 2004.¹ Of the 146,379 firms with employees, an estimated 97.7 percent, or 142,943, were small firms. In 2004, the estimated number of employer businesses increased by 1.8 percent. The number of self-employed persons (including incorporated) increased overall by 6.7 percent, from 328,278 in 2003 to 350,403 in 2004. Non-employer businesses numbered 350,943 in 2002, an increase of 2.8 percent since 2001, based on the most recent data available. (Sources: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept of Labor, Bureau of Labor Statistics.)

Women-Owned Businesses. In 2002 women-owned firms totaled 135,224, an increase of 18 percent from 1997, and generated \$16.4 billion in revenues. Firms owned jointly by women and men numbered 63,149 with revenues of \$15.5 billion. Women represented 39.5 percent of the self-employed persons in the state. (Sources: U.S. Dept. of Labor, Bureau of Labor Statistics; U.S. Dept. of Commerce, Census Bureau.)

Minority-Owned Businesses. In 2002, Hispanic-owned firms numbered 24,054, an increase of 15 percent from 1997. Black-owned firms numbered 7,067, an increase of 43 percent; Asian-owned firms numbered 10,917, an increase of 25 percent; American Indian and Alaska Native-owned firms numbered 3,950, an increase of 17 percent; and there were 413 Native Hawaiian and other Pacific Islander-owned businesses.² (Source: U.S. Dept. of Commerce, Census Bureau.) **Business Turnover.** There were an estimated 23,694 new employer businesses in 2004, 5.8 percent more than the previous year. Business terminations numbered 9,734 in 2004, a decrease of 26.5 percent. Business bankruptcies increased by 42.4 percent and totaled 786 in 2004. (Sources: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau.)

Employment. Small firms with fewer than 500 employees numbered 116,761 in 2002 and employed 981,209 individuals, or 51.3 percent of the state's non-farm private sector (Table 1).³ Net job gains among firms with fewer than 20 employees totaled 13,690, while large firms with 500 or more employees lost 57,627 jobs between 2001 and 2002 (Table 2). (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses.)

Small Business Income. Non-farm proprietors' income, a partial measure of small business income, increased by 6.8 percent, from \$17.2 billion in 2002 to \$18.4 billion in 2003. (Source: U.S. Dept. of Commerce.)

Finance. Commercial bank lenders are an important source of small business loans, and small firms usually rely on them for financing. Over the last 10 years the number of banks in Colorado has declined (Table 3). The Office of Advocacy has identified banks in each state that make the most loans to small businesses. This information is available in its banking studies at www.sba.gov/advo/research/lending.html.

¹ The Office of Advocacy's estimate of the total number of state small businesses is based on the percent of small businesses (2002 Census Bureau firm size data) multiplied by the total number of employer businesses in 2004 (Employment and Training Administration). To this total is added the 2002 number of non-employer firms (Census Bureau). See *Business Estimates from the Office of Advocacy*, www.sba.gov/advo/research/rs258tot.pdf.

² Minority owners may be in more than one minority group.

³ The number of employers in Table 1 is not directly comparable to the figures in the *Number of Businesses* section due to different data sources.
