

Small Business Profile: KANSAS

Small businesses are the heart of Kansas's economy. Research by the Office of Advocacy shows that small businesses create most of the nation's net new jobs, and they bring dynamic ideas, innovative services, and new products to the marketplace. They account for almost all of the nation's employer firms and generate half of non-farm private output. New business creation is key to a state's ability to increase its gross state product, state personal income, and total state employment.¹ This small business profile uses the most recent data available to demonstrate the valuable contributions that small businesses make to Kansas's economic health.

Number of Businesses. Kansas had an estimated total of 246,900 small businesses.² Employer firms totaled 70,700 in 2006, up 1.0 percent from the previous year. Of this total, an estimated 97.1 percent, or 68,700 were small. Self-employment (incorporated and unincorporated) totaled 179,400 in 2006, a decrease from 188,700 in 2005. Non-employer firms totaled 179,000 in 2005, an increase of 2.5 percent since 2004. (Sources: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics.)

Women-owned Firms. In 2002, businesses owned by women numbered 59,600, represented 27.2 percent of the state's 219,400 businesses, and generated \$6.9 billion in revenues. Employer firms owned by women totaled 9,300, an increase of 10.0 percent since 1997. Women numbered 65,800 or 36.7 percent of the state's self-employed persons in 2006, a decrease of 5.7 percent from the previous year. (Sources: U.S. Dept. of Labor, Bureau of Labor Statistics; U.S. Dept. of Commerce, Census Bureau.)

Minority-owned Firms.³ In 2002, Asian-owned firms totaled 3,600, and 1,400 of them were employer firms; Black-owned firms numbered 4,500, and 600 were employer firms; Hispanic-owned firms totaled 4,200, and 900 were employer firms. American Indian and Alaska Native-owned firms numbered 1,700, and 400 of them were employer firms; while

¹ Small businesses are defined as having fewer than 500 employees. Their economic contribution is documented in research published by the Office of Advocacy: www.sba.gov/advo/research.

² This estimate is based on the percent that small businesses are of the state's total businesses (see Table 1, 2004 firm size data). This percentage is multiplied by the total number of employer businesses in 2006 (Dept. of Labor). The 2005 number of non-employer firms is added to this total (Census Bureau).

³ The groups should not be added together or double counting will result, since owners may belong to more than one minority group.

Native Hawaiian and other Pacific Islander-owned businesses numbered 40, and data on employer firms are unavailable. (Source: U.S. Dept. of Commerce, Census Bureau.)

Business Turnover. An estimated 6,973 new employer firms were created in 2006, which is 1.7 percent less than the number created in 2005. Business bankruptcies totaled 158 in 2006, down from 410 the previous year, while business terminations decreased from 7,300 in 2005 to 7,000 in 2006. (Sources: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau.)

Employment. Small firms employed 54.6 percent of the state's non-farm private labor force in 2004, which was above the national average of 50.9 percent.⁴ These 60,000 firms accounted for 97.1 percent of the state's employer businesses, and they employed 609,800 people (Table 1). Small businesses added a total of 9,900 net new jobs between 2003 and 2004 (Table 2). (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses.)

Small Business Income. Non-farm proprietors' income, which is a share of small business income, increased by 6.0 percent, from \$8.3 billion in 2005 to \$8.8 billion in 2006.⁵ (Source: U.S. Dept. of Commerce.)

Finance. Commercial banks and savings institutions continued to be important sources of small business financing. The number of lending institution branches in the state increased in 2006 (Table 3). For a list of financial institutions in the state that make the most loans to small businesses, visit www.sba.gov/advo/research/lending.html.
