**Subject:** Do-Not-Call Fees

Telemarketers should pay for the do-not-call program and protection from this invasion of individual privacy. It should not be the financial responsibility of individuals or tax payers to provide the ability to say "thanks, but no thanks."

It is my opinion that fee speech is an individual right and not a corporate privilege to those seeking financial gain. If such a move will devastate the Telemarketing Industry then the answer is simple, the public does not approve of this type of intrusion into their home and is seeking relief.
