NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on March 3, 2008.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR Part 100, "Reactor Site Criteria."

3. *Current OMB approval number:* 3150-0093.

4. *The form number if applicable:* Not applicable.

5. *How often the collection is required:* As necessary in order for the NRC to assess the adequacy of proposed seismic design bases and the design bases for other site hazards for nuclear power and test reactors constructed and licensed in accordance with 10 CFR Parts 50 and 52 and the Atomic Energy Act of 1954, as amended.

6. *Who will be required or asked to report:* Applicants and licensees for nuclear power and test reactors.

7. *An estimate of the number of annual responses:* Approximately 5.33 (16 responses in three years). Note that this estimate was revised from the estimate published in the 60-day **Federal Register** Notice for this collection, in which the NRC estimated that it would receive 9 annual responses. The estimate was adjusted to better reflect the number of applications the NRC anticipates receiving during the three-year clearance period.

8. *The estimated number of annual respondents:* Approximately 5.33.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 389,090 (73,000 hours per applicant).

10. *Abstract:* 10 CFR Part 100, A Reactor Site Criteria, establishes approval requirements for proposed sites for the purpose of constructing and operating stationary power and testing reactors pursuant to the provisions of 10 CFR Parts 50 or 52. These reactors are required to be sited, designed, constructed, and maintained to withstand geologic hazards, such as faulting, seismic hazards, and the maximum credible earthquake, to protect the health and safety of the public and the environment. Non-seismic siting criteria must also be evaluated. Non-seismic siting criteria include such factors as population density, the proximity of man-related hazards, and site atmospheric dispersion characteristics. NRC uses the information required by 10 CFR Part 100 to evaluate whether natural phenomena and potential man-made hazards will be appropriately accounted for in the design of nuclear power and test reactors.

OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by July 2, 2008. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory
 Commission (NRC).

ACTION: Notice of the OMB review of
 information collection and solicitation
 of public comment.

SUMMARY: The NRC has recently
 submitted to OMB for review the
 following proposal for the collection of
 information under the provisions of the
 Paperwork Reduction Act of 1995 (44
 U.S.C. Chapter 35). The NRC hereby
 informs potential respondents that an
 agency may not conduct or sponsor, and
 that a person is not required to respond
 to, a collection of information unless it
 displays a currently valid OMB control
 number. The NRC published a **Federal
 Register** Notice with a 60-day comment
 period on this information collection on
 February 14, 2008.

1. *Type of submission, new, revision,
 or extension:* Extension.
2. *The title of the information
 collection:* Notice of Enforcement
 Discretion (NOEDs) For Operating
 Power Reactors and Gaseous Diffusion
 Plants (GDP) (NRC Enforcement Policy).
3. *Current OMB approval number:*
 3150-0136.
4. *The form number if applicable:*
 N/A.
5. *How often the collection is
 required:* On occasion.
6. *Who is required or asked to report:*
 Nuclear power reactor licensees and
 gaseous diffusion plant certificate
 holders.
7. *An estimate of the number of
 annual responses:* Approximately 14.
8. *The estimated number of annual
 respondents:* Approximately 14.
9. *An estimate of the total number of
 hours needed annually to complete the
 requirement or request:* 1,825.
10. *Abstract:* The NRC's Enforcement
 Policy addresses circumstances in
 which the NRC may exercise
 enforcement discretion. A specific type
 of enforcement discretion is designated
 as a NOED and relates to circumstances
 which may arise where a nuclear power
 plant licensee's compliance with a

Technical Specification Limiting
 Condition for Operation or other license
 conditions would involve: (1) An
 unnecessary plant shutdown; (2)
 performance of testing, inspection, or
 system realignment that is inappropriate
 for the specific plant conditions; or (3)
 unnecessary delays in plant startup
 without a corresponding health and
 safety benefit.

Similarly, for a gaseous diffusion
 plant, circumstances may arise where
 compliance with a Technical Safety
 Requirement or other condition would
 unnecessarily call for a total plant
 shutdown, or, compliance would
 unnecessarily place the plant in a
 condition where safety, safeguards or
 security features were degraded or
 inoperable. A licensee or certificate
 holder seeking the issuance of an NOED
 must provide a written justification, in
 accordance with guidance provided in
 NRC Inspection Manual, Part 9900,
 which documents the safety basis for
 the request and provides whatever other
 information the NRC staff deems
 necessary to decide whether or not to
 exercise discretion.

A copy of the final supporting
 statement may be viewed free of charge
 at the NRC Public Document Room, One
 White Flint North, 11555 Rockville

 given to comments received after this
 date.
