SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license renewal to Materials License No. 45-09599-01. This license is held by Old Dominion University (Licensee) in Norfolk, Virginia. As part of its license renewal, the Licensee has requested an exemption from the requirement in 10 CFR 30.32(g) to list sealed sources by their manufacturer and model number as registered under the provisions of 10 CFR 32.210. The Licensee requested this exemption in a letter dated December 13, 2005. The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), Part 51 (10 CFR Part 51). Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The license renewal, including the approval of the exemption request, will be issued to the Licensee following the publication of this FONSI and EA in the **Federal Register**.

II. Environmental Assessment

Identification of Proposed Action

The proposed action would renew License No. 45-09599-01, including approval of the Licensee's request for exemption submitted on December 13, 2005. License No. 45-09599-01 was issued on September 11, 1979, pursuant to 10 CFR Parts 30, 40, and 70, and has

been amended periodically since that time. This license authorized the Licensee for research and development as defined in 10 CFR 30.4, animal studies, teaching and training of students, and calibration and checking of the licensee's instruments.

On October 11, 2005, the Licensee submitted its renewal application for License No. 45-09599-01. In a letter dated December 13, 2005, submitted in response to an inquiry from the NRC, the Licensee requested an exemption from the requirement in 10 CFR 30.32(g) to list sealed sources by their manufacturer and model number as registered under the provisions of 10 CFR 32.210. In requesting this exemption, the Licensee stated that one of the sources in its inventory is a custom-made encapsulated sealed source containing 60 mCi of Eu-155 which has been in its possession since 1982 and has no model number.

Need for the Proposed Action

The licensee has possessed and used this custom source safely for many years. This exemption is needed to authorize the Licensee to continue to possess this source.

Technical Analysis of the Proposed Action

10 CFR 30.11(a) states that the Commission may grant such exemptions from the requirements of the regulations as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest. The NRC staff has analyzed the Licensee's request to be authorized to receive and take possession of sealed sources and devices which have not been registered with the NRC under 10 CFR 32.210 or with an Agreement State. The NRC staff considered that the Licensee is qualified by sufficient training and experience and has sufficient facilities and equipment to handle these sources and devices. Furthermore, NRC inspections have evaluated the Licensee's performance and determined that the Licensee has safely handled this unregistered source for many years. Accordingly, the NRC staff has concluded that granting this exemption is authorized by law, will not endanger life or property or the common defense and security, and is in the public interest.

Environmental Impacts of the Proposed Action

The proposed action is largely administrative in nature. Approving this exemption will have no environmental impact.

Environmental Impacts of the Alternatives to the Proposed Action

Due to the largely administrative nature of the proposed action, its environmental impacts are small. Additionally, denying the exemption request would result in no change in current environmental impacts. The environmental impacts of the proposed action and the no-action alternative are therefore similar, and the no-action alternative is accordingly not further considered.

Conclusion

The NRC staff has concluded that the proposed action will not significantly impact the quality of the human environment; the NRC staff concludes that the proposed action is the preferred alternative.

Agencies and Persons Consulted

The NRC staff has determined that the proposed action is of a procedural nature, and will not affect listed species or critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. The NRC staff has also determined that the proposed action is not the type of activity that has the potential to cause effects on historic properties. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

III. Finding of No Significant Impact

The NRC staff has prepared this EA in support of the proposed action. On the basis of this EA, the NRC finds that there are no significant environmental impacts from the proposed action, and that preparation of an environmental impact statement is not warranted. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate.
