

Table of Contents

UNDERSTANDING THE USER

Chapter 1: Introduction

- 1.1 Guidebook overview 1-1
- 1.2 Metric verses English units 1-3
- 1.3 Benefits of sidewalks and trails 1-3
- 1.4 Legislation and standards 1-6
 - 1.4.1 Accessibility standards for new construction and alterations 1-7
 - 1.4.2 Developing accessibility standards for sidewalks 1-8
 - 1.4.3 Developing accessibility standards for trails 1-9

Chapter 2: Understanding Sidewalk and Trail Users

- 2.1 Function, activity and participation 2-1
 - 2.1.1 Function 2-3
 - 2.1.2 Activity 2-3
 - 2.1.3 Participation 2-4
 - 2.1.4 Contextual factors 2-5
- 2.2 Different abilities for sidewalks and trails 2-5

- 2.3 Designing for all abilities 2-7
 - 2.3.1 The need for a new approach 2-8
 - 2.3.2 Accessible environments through universal design 2-11
 - 2.3.3 Natural and constructed environmental constraints 2-12
- 2.4 Barriers create activity and participation limitations 2-13
 - 2.4.1 Movement barriers 2-13
 - 2.4.2 Information barriers 2-15
- 2.5 Conflicting pedestrian needs 2-20
- 2.6 Function, activity, participation and technology 2-22
 - 2.6.1 Personal technologies 2-23
 - 2.6.2 Activity-specific technologies 2-24
 - 2.6.3 Environmental technologies and design 2-26
 - 2.6.4 How does technology influence design? 2-27
 - 2.6.5 Limitations of technology 2-29

SIDEWALK DEVELOPMENT

Chapter 3: Integrating Pedestrians into the Project Planning Process

3.1 Recent legislation 3-2

3.1.1 Americans with Disabilities Act (ADA) 3-3

3.1.2 Federal transportation legislation (ISTEA and TEA-21) 3-3

3.2 Prioritizing pedestrian access 3-4

3.2.1 Sidewalk installation 3-4

3.2.2 Pedestrian oriented detail 3-6

3.2.3 National policy 3-7

3.2.4 State and local sidewalk policies 3-7

3.3 Local land use and zoning 3-8

3.3.1 Traditional land use patterns 3-9

3.3.2 Land use recommendations 3-9

3.4 Comprehensive planning 3-10

3.4.1 Pedestrian master plans 3-11

3.4.2 Pedestrian design guides 3-12

3.5 Prioritizing resources 3-12

3.6 Funding strategies 3-14

3.7 Site development 3-16

3.7.1 Pedestrian level of service 3-16

3.7.2 Access management 3-17

3.7.3 Design constraints 3-18

3.8 Public involvement 3-19

3.8.1 Making accessibility provisions at public meetings 3-20

3.8.2 Outreach strategies for initiating community involvement 3-21

3.8.3 Public involvement strategies ... 3-22

3.8.4 Community involvement in sidewalk assessments 3-25

Chapter 4: Sidewalk Corridors

4.1 Sidewalk corridor width 4-2

4.1.2 The zone system 4-3

4.1.2.1 Curb zone 4-4

4.1.2.2 Planter/furniture zone ... 4-4

4.1.2.3 Pedestrian zone 4-6

4.1.2.4 Frontage zone 4-8

4.1.3 Protruding objects 4-9

4.1.4 Improving access on narrow sidewalks 4-11

4.2 Sidewalk grades and cross slopes 4-16

4.2.1 Grade 4-16

4.2.2 Cross slope 4-20

4.2.2.1 Grade and cross slope construction tolerances 4-21

4.2.2.2 Elevation difference between street and building 4-22

4.3 Sidewalk surfaces	4-24	6.2 Pedestrian signs	6-3
4.3.1 Surface material	4-24	6.3 Detectable warnings	6-5
4.3.1.1 Firm and stable	4-24	6.3.1 Design specifications for	
4.3.1.2 Slip resistant	4-25	detectable warnings	6-6
4.3.1.3 Wet or icy surfaces	4-26	6.3.2 Installation recommendations	
4.3.1.4 Decorative surface		for detectable warnings	6-7
materials	4-26	6.3.3 Recommended locations	6-8
4.3.2 Changes in level	4-28	6.3.4 Grooves	6-10
4.3.3 Gaps, grates, and openings	4-30	6.4 Directional surfaces	6-10
4.4 The impact of trees on the		6.4.1 Raised directional	
sidewalk corridor	4-30	tiles and pavers	6-11
4.5 Well-lit sidewalks	4-33	6.4.2 Intersection guidestrips	6-11
4.6 Grade-separated crossings	4-33	6.5 Accessible pedestrian signals	6-12
4.7 Sidewalks in confined spaces	4-36	6.5.1 Installation	
		recommendations	6-13
		6.5.2 Fixed time signals (pedestrian	
		signal indicators with	
		automated signal phasing)	6-14
		6.5.3 Pedestrian actuated	
		signal devices	6-16
		6.5.3.1 Providing information	
		in multiple formats	6-17
		6.5.3.2 Physical design	
		characteristics	6-18
		6.5.4 Infrared or LED transmitters	6-20

Chapter 5: Driveway Crossings

5.1 Change in cross slope	5-1
5.2 Driveway crossings on	
wide sidewalk corridors	5-3
5.3 Jogged driveway crossing	5-4
5.4 Built-up driveway crossing	5-4
5.5 Parallel ramped driveway crossing	5-5
5.6 Rolled curbs	5-5

Chapter 6: Providing Information to Pedestrians

6.1 Non-visual information	6-2
----------------------------------	-----

Chapter 7: Curb Ramps

7.1 The impact of curb ramps	7-1
------------------------------------	-----

TABLE OF CONTENTS

7.1.1	Impact of curb ramps on people with mobility impairments.....	7-2	7.3.7.1	Impacts of change of grade on people who use wheelchairs	7-29
7.1.2	Impact of curb ramps on people with vision impairments	7-2	7.3.7.2	Recommendations for maximum change in grade.....	7-30
7.1.3	Ideal design characteristics	7-3	7.3.7.3	Street resurfacing.....	7-31
7.2	Curb ramp types.....	7-3	7.3.8	Transition height	7-32
7.2.1	Perpendicular curb ramps.....	7-5	7.3.9	Sidewalk approach width	7-33
7.2.2	Diagonal curb ramps	7-8	7.3.10	Landing dimension and slope ...	7-33
7.2.3	Parallel curb ramps.....	7-11	7.3.11	Returned curbs and flares	7-34
7.2.4	Combined parallel and perpendicular curb ramp	7-13	7.4	Design considerations for curb ramp installation	7-35
7.2.5	Built-up curb ramps	7-14	7.4.1	Curb ramp placement at an intersection	7-36
7.2.6	Depressed corners	7-16	7.4.2	Influence of turning radii on curb ramp design	7-38
7.2.7	Recommendations for selecting a curb ramp design.....	7-18	7.4.3	Determining sidewalk width at pedestrian crossings	7-40
7.3	Curb ramp specifications	7-18	7.4.3.1	Type of crossing	7-40
7.3.1	Ramp grade.....	7-23	7.4.3.2	Curb ramp design	7-40
7.3.2	Ramp cross slope	7-25	7.4.3.3	Steep terrain.....	7-41
7.3.3	Ramp length	7-25	7.4.3.4	Volume of pedestrian traffic	7-41
7.3.4	Ramp width	7-27	7.4.4	Curb ramps at high curbs	7-42
7.3.5	Gutter slope	7-27	7.4.5	Curb ramps on narrow sidewalks	7-43
7.3.5.1	Gutter slope at diagonal curb ramps	7-27			
7.3.6	Transition detection	7-28			
7.3.7	Change of grade	7-28			

7.4.6 Curb ramps on steep terrain 7-45
 7.5 Curb ramp drainage 7-46

Chapter 8: Pedestrian Crossings

8.1 Barriers to pedestrian access..... 8-2
 8.1.1 Movement barriers 8-2
 8.1.2 Information barriers 8-3
 8.1.3 Design solutions 8-4
 8.2 Midblock crossings 8-6
 8.3 Turning radius 8-7
 8.4 Right turn on red and turning vehicles 8-9
 8.5 Crosswalks 8-10
 8.5.1 Crosswalk markings 8-10
 8.5.2 Crosswalk research 8-11
 8.5.3 Recommendations for enhancing pedestrian safety and access 8-13
 8.5.3.1 Flashing signals 8-15
 8.5.3.2 Reducing motorist speeds 8-15
 8.6 Crossing times 8-16
 8.7 Medians 8-18
 8.8 Corner islands 8-19
 8.9 Improving sight lines at intersections 8-21

8.10 Skewed intersections 8-23
 8.11 Railroad crossings 8-25

Chapter 9: Traffic Calming

9.1 Volume control measures 9-3
 9.1.1 Full closures 9-3
 9.1.1.1 Impact on pedestrian access 9-4
 9.1.1.2 Recommendations 9-4
 9.1.2 Half closures 9-4
 9.1.2.1 Impact on pedestrian access 9-4
 9.1.2.2 Recommendations 9-5
 9.1.3 Median barriers 9-5
 9.1.3.1 Impact on pedestrian access 9-5
 9.1.3.2 Recommendations 9-5
 9.1.4 Forced turn islands 9-6
 9.1.4.1 Impact on pedestrian access 9-6
 9.1.4.2 Recommendations 9-7
 9.2 Speed control measures 9-7
 9.2.1 Speed humps 9-8
 9.2.1.1 Impact on pedestrian access 9-9
 9.2.1.2 Recommendations 9-9

9.2.2	Speed tables and raised crosswalks	9-9
9.2.2.1	Impact on pedestrian access	9-10
9.2.2.2	Recommendations	9-11
9.2.3	Raised intersections	9-11
9.2.3.1	Impact on pedestrian access	9-11
9.2.3.2	Recommendations	9-12
9.2.4	Textured pavement	9-12
9.2.4.1	Impact on pedestrian access	9-13
9.2.4.2	Recommendations	9-13
9.2.5	Roundabouts	9-13
9.2.5.1	Impact on pedestrian access	9-14
9.2.5.2	Recommendations	9-15
9.2.6	Neighborhood traffic circles	9-16
9.2.6.1	Impact on pedestrian access	9-17
9.2.6.2	Recommendations	9-17
9.2.7	Chicanes, lateral shifts, and chokers	9-17
9.2.7.1	Impact on pedestrian access	9-18
9.2.7.2	Recommendations	9-18
9.2.8	Curb extensions at intersections	9-18
9.2.8.1	Impact on pedestrian access	9-18
9.2.8.2	Recommendations	9-19
9.2.9	Center island narrowings	9-19
9.2.9.1	Impact on pedestrian access	9-19
9.2.9.2	Recommendations	9-20
Chapter 10: Sidewalk Maintenance and Construction Site Safety		
10.1	Facility maintenance	10-1
10.1.1	Assessment techniques	10-2
10.1.2	Sidewalk maintenance problems	10-3
10.1.3	Maintenance responsibilities	10-4
10.2	Information maintenance	10-4
10.3	Citizen reporting	10-5
10.4	Construction safety	10-7
Chapter 11: Sidewalk Assessment		
11.1	Benefits of assessment	11-1
11.2	Sidewalk Assessment Process overview	11-2
11.3	Sidewalk access characteristics	11-3
11.4	Data collection	11-4

11.4.1	Stroll Sheet station measurements	11-5	12.5	Providing access and preserving the environment	12-10
11.4.2	Stroll Sheet feature measurements	11-6	12.5.1	Potential conflicts between access and preservation	12-11
11.4.3	Stroll Sheet curb ramp measurements	11-8	12.5.1.1	Cultural, historic, religious, or significant natural features	12-12
11.4.4	Intersection Checklist	11-9	12.5.1.2	Nature of the setting or purpose of the trail	12-13
11.4.5	Sidewalk Element Analysis Forms	11-11	12.5.1.3	Federal, State, or local regulations or statutes	12-14
11.5	Presentation of sidewalk assessment information	11-13	12.5.1.4	Terrain, conditions, or prevailing construction practices	12-16

TRAIL DEVELOPMENT

Chapter 12: Trail Planning

12.1	Commitment to universal design	12-2	12.5.2	Priorities for access to extreme environments	12-17
12.2	Key players in trail design	12-3	12.5.2.1	Single extreme condition limits access	12-18
12.3	Types of trails	12-3	12.5.2.2	Cumulative conditions limit access	12-20
12.4	Long-range planning	12-4	12.6	Trail components	12-21
12.4.1	Trails versus the built environment	12-4	12.6.1	Trail corridor	12-22
12.4.2	Developing accessibility standards for trails	12-5	12.6.2	Trail element access	12-22
12.4.3	New construction	12-6	12.6.3	Trailhead access	12-25
12.4.4	Alterations	12-7	12.6.3.1	Facilities and amenities at the trailhead	12-25
12.4.5	Routine maintenance	12-8			
12.4.6	Long-range planning for multiple trail systems	12-9			

12.6.3.2 Directing trailhead traffic	12-26
12.6.3.3 Information at the trailhead	12-29
Chapter 13: Universal Trail Assessment Process	
13.1 Overview	13-1
13.2 Benefits of assessment	13-3
13.3 Trail assessment coordinators	13-4
13.4 Data collection and processing	13-4
13.5 Presenting trail access information ...	13-5
Chapter 14: Shared-Use Path Design	
14.1 Background information	14-2
14.2 Access to shared-use paths	14-2
14.2.1 Rail trails	14-3
14.3 Conflicts between multiple user groups	14-4
14.4 Shared-use path surfaces	14-5
14.4.1 Surface material	14-6
14.4.2 Surface firmness, stability, and slip resistance	14-6
14.4.3 Changes in level	14-7
14.4.4 Openings	14-8
14.5 Shared-use path grade and cross slope	14-9
14.5.1 Grade	14-9
14.5.2 Rest areas	14-11
14.5.3 Cross slope and drainage	14-12
14.6 Shared-use path width	14-13
14.6.1 Passing space	14-13
14.6.2 Protruding objects	14-13
14.7 Railings	14-15
14.8 Signs	14-15
Chapter 15: Recreation Trail Design	
15.1 Background information	15-2
15.2 Outdoor recreation access routes	15-4
15.3 Trail conflicts between multiple user groups	15-6
15.4 Trail surfaces	15-7
15.4.1 Surface material	15-8
15.4.2 Surface firmness, stability, and slip resistance	15-8
15.4.3 Changes in level and tread obstacles	15-13
15.4.3.1 Changes in level	15-14
15.4.3.2 Tread obstacles	15-15
15.4.4 Openings	15-16
15.5 Trail grades and cross slopes	15-17
15.5.1 Grade	15-17
15.5.1.1 Recommended grade specifications	15-18

15.5.1.2	Grades that do not meet accessibility recommendations	15-18
15.5.1.3	Grade transitions and rest intervals	15-21
15.5.1.4	Trails through steep terrain	15-21
15.5.1.5	Change of grade	15-22
15.5.1.6	Curvilinear trails	15-25
15.5.1.7	Trails with steps	15-25
15.5.2	Cross slope and drainage	15-27
15.5.2.1	Recommended cross slope specifications ...	15-27
15.5.2.2	Cross slopes that do not meet accessibility recommendations	15-27
15.5.2.3	Change of cross slope	15-29
15.5.2.4	Minimizing erosion through natural drainage patterns	15-30
15.5.2.5	Waterbars	15-31
15.5.2.6	Trails in regions with heavy rain	15-33
15.5.3	Rest areas	15-33
15.5.3.1	Trail tread width	15-35
15.5.3.2	Trails with vegetation	15-35
15.5.3.3	Passing space	15-36
15.6.3	Protruding objects and vertical obstructions	15-37
15.7	Edge protection	15-38
15.8	Signs	15-39
Chapter 16: Trail Crossings		
16.1	Trail crossing another trail	16-2
16.2	Bridges	16-3
16.3	Trail intersecting a roadway	16-5
16.3.1	Use of curb ramps on trails at intersections	16-6
16.4	Grade separated crossings	16-6
16.5	Trail intersecting a railroad	16-8
Chapter 17: Specialized Trails		
17.1	Viewpoints	17-1
17.2	Beach trails	17-3
17.2.1	Beach access route specifications	17-3
17.2.2	Selecting surface materials	17-5
17.2.3	Considering temporary paths	17-6
17.2.4	Providing beach wheelchairs	17-7
17.3	Trails in extreme climates	17-7
17.4	Interpretive trails	17-8

Chapter 18: Trail Maintenance	
18.1 Facility maintenance	18-2
18.1.1 Assessment techniques	18-2
18.1.2 Shared-use paths maintenance	18-2
18.1.3 Recreation trail maintenance	18-3
18.2 Information maintenance	18-5
18.3 Citizen reporting	18-5
Chapter 19: Research Recommendations	19-1
APPENDICES	
Appendix A: Sidewalk Assessment Process Forms	A-1
Stroll Sheet	A-2
Intersection Checklist	A-3
Curb Ramp Element Analysis Form	A-4
Driveway Crossing Element Analysis Form	A-5
Cut-Through Median Element Analysis Form	A-6
Ramped Median Element Analysis Form	A-7
Appendix B: Sidewalk Accessibility Checklist	B-1
Appendix C: Contact Information	C-1
Appendix D: Detectable Warning Manufacturers	D-1
Appendix E: Slope Conversion Chart	E-1
Appendix F: Abbreviations and Acronyms	F-1
Appendix G: Glossary	G-1
Appendix H: Bibliography	H-1
Appendix I: Index	I-1
