IMPORTANT NOTICE

The Monthly Motor Fuel Reported by States report is only available on the FHWA Office of Highway Policy Information Website at the following address:

<http://www.fhwa.dot.gov/ohim/mmfr/mmfrpage.htm>

Data in the tables are subject to change because the States may revise and update their data. Effective with the May, 2005 report, the table MF-121T will no longer show tax rate changes during the year. The table only show the most current tax rate and the effective date.

Motor Fuel Trends

Created On: 06/13/2007

January 2007 Reporting Period

Gasoline Sales

Based on reports of 30 Entities, gasoline consumption for January 2007 changed by 2.0 percent compared to the same period in 2006. 1/

The gasoline volume shown in this report is a cumulative tabulation of gross volume reported by wholesale distributors to State motor fuel tax agencies. It includes highway use, nonhighway use and losses. There is a lag of up to 6 weeks between the wholesale transactions reported and retail sales to consumers. Travel trends are reported monthly in *Traffic Volume Trends* based on actual traffic counts at permanent traffic recorders operated by the State highway agencies and reflect highway use of fuel. The vehicle-miles reported include all vehicles, regardless of fuel type. While data in both reports reflect changes in trends, large monthly changes can be caused by exceptional weather conditions, variations in timing of holidays, or processing delays.

Motor Fuel Taxation

All States levy volume taxes on gasoline and diesel fuel. The rates in effect for 2007 are shown in Table MF-121T. The gasoline rates vary from a low of 7.5 cents per gallon to 34 cents with an average of 20.2 cents. Four States provide for full or partial exemptions for gasohol, a blend of 90 percent gasoline and 10 percent fuel alcohol. Diesel fuel rates vary from 7.5 cents to 38.1 cents per gallon.

Traditionally, State fuel tax rates could only be changed with legislation, but 10 States now have variable rate motor fuel taxes. These taxes are adjusted at specified intervals-annually, semiannually, or quarterly-usually on Table MF-121T. Adjustments to variable rate taxes are announced by State tax agencies shortly before the effective date of the change.

1/ This percentage change is a comparison for those States for which data are available for the report month. However, the percentage increase on the national map is a comparison of cumulative data for all States for which both 2006 and 2007 data are available.

1/ This table shows gross volume of special fuels (primarily diesel fuel with small amounts of liquefied petroleum gas) reported by the State motor fuel tax agencies. To the extent possible, fuel consumed by Federal, State, and local government agencies and all nonhighway use has been excluded from this table. Further adjustments may be made during the year end analysis. In many cases, the data reflect retail sales, but a number of States tax special fuels

at the wholesale level. In some cases, corrections for interstate motor carrier use have not been made. When interstate motor carrier fuel volume is reported quarterly to FHWA, the volume is shown in the third month of the quarter. Highway use of special fuels is reported in table MF-21 in the annual report, Highway Statistics.

2/ Total includes only those States for which data are shown.

1/ This table shows gross volume of special fuels (primarily diesel fuel with small amounts of liquefied petroleum gas) reported by the State motor fuel tax agencies. To the extent possible, fuel consumed by Federal, State, and local government agencies and all nonhighway use has been excluded from this table. Further adjustments may be made during the year end analysis. In many cases, the data reflect retail sales, but a number of States tax special fuels

at the wholesale level. In some cases, corrections for interstate motor carrier use have not been made. When interstate motor carrier fuel volume is reported quarterly to FHWA, the volume is shown in the third month of the quarter. Highway use of special fuels is reported in table MF-21 in the annual report, Highway Statistics.

2/ Total includes only those States for which data are shown.

Note to Users of Monthly Motor-Fuel "Retail Price" Data:

Beginning with the January 1997 issue, the Federal Highway Administration (FHWA) reinstated motor fuel price data using data collected by the U.S. Department of Energy, Energy Information Administration (EIA) as the source for Table MF-5, "Retail Prices of Motor Fuel". The EIA Table 31 - "Motor Gasoline Prices by Grade, Sales Type, PAD District (Cents per Gallon Excluding Taxes)" will be used as the base information for the FHWA Table MF-5. The EIA data, which is based on the EIA-782 survey, was implemented in 1983 to fulfill EIA legislative requirements and community data needs. The FHWA will follow EIA protocols and requirements in making the data available to "Monthly Motor Fuel" customers.

Because the "Sales to End Users - Through Retail Outlets" data does not include Federal, State, and local taxes, FHWA will add Federal motor fuel and State motor fuel taxes to the EIA data. Federal Highway User Taxes (Table FE-21B) and State Tax Rates on Motor Fuel (Table MF-121T) are the FHWA sources for this data. Excluded from the total are other taxes such as local taxes and sales taxes applied to motor fuel, etc.

Users of Table MF-5 should consult the "Explanatory Notes" of the EIA Publication "Petroleum Marketing Monthly" (DOE/EIA-0380) before making use of the retail price information. The "Explanatory Notes" contain important information on the design of the sample, the continuity of the data, collection methods, processing, non-disclosure, and revisions.

Pre-January 1997 retail price data was furnished by a source other than EIA. Because the sample design, collection methods, processing, and other data considerations differ between the two sources, users are particularly cautioned not to make direct comparisons of the data using previous MF-5 retail price data for any trend line comparisons.
