Total USG Humanitarian Assistance Committed²	\$122,746,667

CURRENT SITUATION

Regional Update

- On February 9, President George W. Bush announced that he is seeking \$950 million as part of the supplemental appropriations request to support the rehabilitation and reconstruction of areas devastated by the Indian Ocean tsunami and to cover the costs of relief efforts to date. This amount includes an additional \$600 million above the President's initial commitment of \$350 million. The \$950 million tsunami supplemental will include estimated allocations for the following activities: \$339 million for reconstruction of infrastructure; \$168 million to help victims transition back to their communities; \$35 million for early warning and disaster mitigation efforts; \$62 million for good governance and technical assistance for planning reconstruction activities and the costs of USG operations in the region; and \$346 million to replenish costs incurred by USAID and the Department of Defense for provision of immediate relief.
- The World Bank has announced plans to provide an initial \$672 million to help Indonesia, Sri Lanka, and Maldives transition from disaster relief to reconstruction. The World Bank will determine potential support for India after a damage and needs assessment, scheduled for completion next week. According to the World Bank, the most urgent priority in the transition from relief to reconstruction is to provide funds to survivors through activities such as cash-for-work programs. Other immediate goals are repairing or rebuilding damaged schools and health facilities and providing textbooks to children and medicines to clinics.
- On February 8, the U.N. released findings of rapid environmental assessments (REA) of tsunami-affected areas of Sri Lanka and Indonesia. According to the U.N., the REAs found no major life-threatening environmental emergencies resulting from the tsunami. However, the assessment team found that urgent environmental concerns related to the management of the tsunami debris and sewage and sanitation issues in locations where displaced people are receiving emergency shelter in Sri Lanka. In Indonesia, the team noted acute issues requiring urgent attention, chiefly the management and disposal of large amounts of debris and waste. USAID/OFDA provided some of the funding to develop the REA methodology.

Indonesia Update

- The USAID/Disaster Assistance Response Team (DART) reports that site visits to psychological and social support programs have highlighted a number of issues: importance of coordination, need to strengthen government ministry capacity, shelter/relocation concerns, high numbers of children in boarding schools, and stress on national staff.

¹ President Bush's supplemental budget request to Congress was for \$950 million.

² The value of assistance provided by the U.S. Department of Defense is not included in this figure.

- According to the U.N. World Health Organization (WHO), the Indonesian Midwives Association reports that 30 percent of its 5,500 staff in Aceh are missing or dead. Many surviving midwives are affected by stress and trauma and are reportedly unable to work. During the week of February 11, USAID/DART members met with midwives currently working at the general hospital in Banda Aceh and IDP camps, and confirmed the current staff shortages.
- WHO and the U.N. Population Fund (UNFPA) estimate more than 7,300 births per month in Aceh Province, with approximately 820 births in Banda Aceh IDP camps. WHO reports that pregnancy-related complications could increase from baseline levels of 15 to 25 percent. The Government of Indonesia (GOI), with support from WHO and UNFPA, is re-establishing reproductive health services for women and girls in internally displaced person (IDP) camps and instituting programs for the prevention and management of sexual violence. WHO, in collaboration with non-governmental organizations (NGOs) working in the area, has put systems in place to monitor pregnancies and deliveries in camps and to provide other reproductive health services. Since the tsunami, USAID/OFDA has provided \$254,023 to the Johns Hopkins Program for International Education and Gynecology and Obstetrics (JHPIEGO) to increase the capacity of midwives and facilitate their work in IDP camps.
- The GOI Ministry of Health (MOH) is leading a multi-agency Nutrition Intervention Task Force with representatives from the U.N. World Food Program (WFP), WHO, U.N. Children's Fund (UNICEF), and several NGOs to determine nutrition interventions in affected areas in Banda Aceh. According to WHO, a rapid nutrition assessment covering five sites, including IDP and host communities, will begin in Aceh on February 13, to assess the nutrition situation and to improve interventions targeting vulnerable groups.
- WFP reports that its beneficiary coverage has increased by 20 percent since the end of January (from 339,000 to 425,000). With this latest figure, WFP has reached approximately 54 percent of its estimated 790,000 caseload.
- The U.N. Joint Logistics Center (UNJLC) reports that as foreign military support for the humanitarian effort is reduced, the transition to and concurrent up-scaling of civil relief operations is proceeding smoothly. In addition, UNJLC reports that the increased availability of passenger seats on commercial flights has eased the humanitarian community's need for military support and U.N. Humanitarian Air Service (UNHAS) passenger transport.

Sri Lanka Update

- On February 4, the Government of Sri Lanka (GOSL) closed the Center for National Operations (CNO) citing the end of emergency relief operations. The GOSL had operated the CNO since December 29. The recently established Task Force for Relief, in partnership with the various government ministries, will now take over the relief operation and related functions of the CNO. On February 11, Sri Lanka's parliament extended a state of emergency in tsunami-hit areas for one month to give broad powers to security forces to carry out relief operations. GOSL forces have been deployed to clear the rubble and deal with relief distribution in remote areas.
- On February 10, the UNJLC reported that international NGOs must again show passes at GOSL/Liberation Tigers of Tamil Eelam (LTTE) cross-territory check points. The UNJLC reports there is no shortage of transport or storage facilities for private companies, NGOs, and U.N. agencies. However, infrastructure is in serious need of rehabilitation.

Maldives Update

- On February 11, the U.N. Office for the Coordination of Humanitarian Affairs (OCHA) reported that although massive recovery and reconstruction work needs to be undertaken, the humanitarian situation in Maldives has stabilized with immediate humanitarian needs generally being met in all major sectors. The Government of the Republic of Maldives (GORM) has established a longer term framework to address the reconstruction and recovery period. The Disaster Relief Coordination Unit (DRCU) will be responsible for the construction of temporary shelters, repair of damaged homes, maintenance of new housing, repair of damaged social infrastructure and the provision of relief aid. The DRCU will also be responsible for the registration of displaced persons and their needs. The GORM is also planning economic and reconstruction activities within the National Development Framework.

Thailand Update

- According to WHO, the Government of Thailand Health Department officials have identified 10,000 tsunami victims with symptoms of mental-health disorders in the six southern provinces of Phuket, Phang Nga, Satun, Ranong, Trang, and Krabi. WHO reports that victims report symptoms of stress, difficulty eating and falling asleep, and depression.

USG ASSISTANCE

USAID Regional Response

- The USAID/DART and the U.S. military continue to conduct needs assessments and provide supplies and essential logistic support for the relief efforts in affected countries.

Indonesia

- To date, the USG has provided more than \$42.1 million in emergency food assistance, relief supplies, shelter, water and sanitation, health, livelihoods recovery, psychological and social support, logistics and coordination, and rehabilitation activities for affected communities in Indonesia.
- On February 9, USAID/OFDA committed \$488,435 for Catholic Relief Services to revitalize rural public markets in Aceh Province through cash-for-work market reconstruction activities and support for market associations and vendors.

Sri Lanka

- To date, the USG has provided nearly \$62.0 million in emergency food assistance, relief supplies, shelter, water and sanitation, health, livelihoods recovery, psychological and social support, protection and anti-trafficking, logistics and coordination, and cleanup and rehabilitation activities for affected communities in Sri Lanka. USAID/OFDA-funded cash-for-work and micro-finance programs are fully operational. The USAID/DART in Sri Lanka is now focusing on program monitoring and evaluation and ongoing situational assessments.

India

- On January 31, the USAID/DART in India closed out more than four weeks of operations, after providing approximately \$4.1 million for shelter, water and sanitation, cleanup and rehabilitation, education, and cash for work activities for tsunami-affected residents. During the transition to the recovery phase, USAID/India will oversee USAID/OFDA-funded programs, and USAID/OFDA and USAID/India will share responsibility for monitoring.

Maldives

- On January 28, the USAID/DART Field Officer posted to Male' closed out operations in Maldives. USAID staff and military personnel were stationed on the ground in Maldives since January 10, conducting assessments and coordinating and consulting with government officials. During that time, USAID/OFDA provided more than \$1.3 million for health, nutrition, water and sanitation, and emergency relief supplies.

Department of Defense (DOD) Humanitarian Assistance

- As of February 11, 1,070 U.S. military personnel are involved in delivering more than 24.5 million pounds of relief supplies and equipment to the affected region. All 639 military personnel currently on the ground are in Thailand. With 8 ships and 25 aircraft, the U.S. military has delivered a total of 9,487,681 pounds of relief supplies to the governments of Indonesia, Sri Lanka, Thailand, and other affected nations.

BACKGROUND

- A magnitude 9.0 earthquake on December 26, off the west coast of Northern Sumatra, Indonesia, triggered massive tsunamis that affected several countries throughout South and Southeast Asia, as well as Somalia, Tanzania, Kenya, and the Seychelles in East Africa. Aftershocks from the December 26 earthquake continue to occur in the region.
- Based on initial findings of USG assessment teams and on the recommendation of Secretary of State Powell and USAID Administrator Natsios, on December 31, President Bush committed \$350 million toward earthquake and tsunami relief and recovery efforts. Dollar amounts in this Fact Sheet are part of the total pledge of \$350 million and refer to specific funding actions that have been committed and programmed.

PUBLIC DONATION INFORMATION

Making a Donation to Relief Efforts

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations.
- For a list of humanitarian organizations accepting donations for South Asia relief operations, please see “Tsunami Relief” at www.usaid.gov or www.usafreedomcorps.gov. Or call the Center for International Disaster Information at (703) 276-1914.
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, warehouse space, etc); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietary, and environmentally appropriate assistance.

Additional Information

- Information on making effective donations can be found on the following websites:
 - USAID: www.usaid.gov, Keyword: Donations
 - The Center for International Disaster Information: www.cidi.org
 - InterAction: “Guide to Appropriate Giving” at www.interaction.org
- Information on choosing a charity to support can be found on the following websites:
 - Better Business Bureau: www.give.org
 - GuideStar (A National Database of Nonprofit Organizations): www.guidestar.org
 - The American Institute of Philanthropy: www.charitywatch.org
 - Charity Navigator: www.charitynavigator.org
- Information on relief activities of the humanitarian community can be found at www.reliefweb.int.
