GROUP**

# Possibilities

## ENDLESS

We all use different terminology to define our **meetings**. One person's **classroom** is another's **lecture** hall. While you are preparing for an intense project management **session**, someone else is already using the space for a **conference** with seventeen mid-level managers.

Thousands of combinations for a myriad of room options...

education, discovery, learning, conferencing, forum,  
debate, teaming, assembly, huddle...

# Combinations

## INFINITE

With nine table shapes, in hundreds of sizes and three edge styles, the possibilities are endless. Five base styles including elliptical t-base, round t-base, elliptical x-base, round x-base and column. A full palette of laminates, trim and base finish colors are at your disposal.

### GANGING, MOBILE AND POWERFUL

The 11-gauge, self-storing steel **ganger** draws tables together and levels tops.

**Casters** can be added to tables to provide greater mobility within common spaces.

**PowerUp**® modules can be added to any table, providing worksurface height power and data access. PowerUp can also be added in the field.

Selecting the type of chair that works for you is easy at UNICOR. High-Density **Matrix**® seating is built like a tank and stacks up to 40 high.

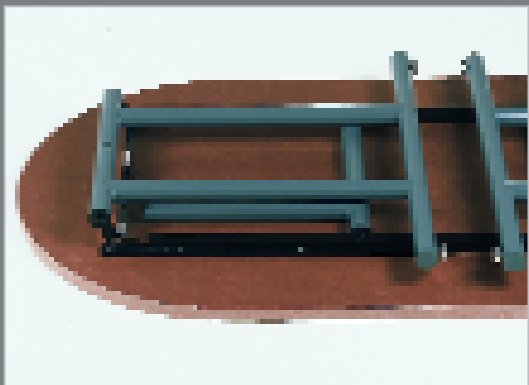

**Rapture**® and **Silhouette**® provide stylish ergonomic features most static stack chairs do not offer.

You want unique? **Torsion-On-The -Go!**® offers horizontal “nesting” and active ergonomic back support. A truly mobile concept!

T and TT bases can be ordered with a folding leg for more storage options.

Legs fold flush against the tabletop for quick and easy stacking capabilities.
