

# 1997 American Housing Survey

## Summary Statistics

Date: November 2, 1999

This document contains the listing of all variables and their summary statistics for the preliminary 1997 American Housing Survey (AHS) data file after it has been merged into a single file. This information is provided to allow users of the data to verify that they have read in and merged the data properly. This information is from the single data set created by the IN\_AHS97.SAS program which merged nine transport files from the Census Bureau together.

Please note that the data file will be changing as further corrections are made. New versions of this file will be produced at the same time as new data is released.

These statistics were generated by the ICF Consulting group as a part of their assistance to HUD and the Census Bureau for quality control and tabulations of the 1997 American Housing Survey.

Questions about the program used to create this data set should be directed to:
