

## NOTICE OF REVIEW PERIOD EXTENSION

The EPA is extending the period for review of draft part 70 operating permits regulation revisions.

On March 25, 1998 (63 FR 14392), EPA published a notice in the Federal Register which announced availability for public review of portions of the draft rulemaking which would make revisions to EPA's part 70 operating permits regulations. The notice indicated that the public may review the draft regulatory revisions and preamble and submit comments on the material that has changed from the two previous proposals for a 30-day period which would end on April 25, 1998. The EPA has been requested to extend this review period for an additional 30 days. As a result, EPA will extend the review period until May 26, 1998. A Federal Register notice to that effect will be published in the near future.
