Subject: Housatonic Clean-up

Dear Ms. Svirsky:

Like many people who love the Housatonic, we urge EPA not to accept GE's current report and proposed protection goals. We support the positions of HRI and HEAL for a real clean-up, one that protects people who live and enjoy leisure pursuits along the Housatonic and also protects the wildlife, which make for so much of the pleasure associated with our use of the river.

Once again, GE is trying to minimize its responsibility -- both ethical and financial -- for the contamination of a public resource. Please hold firm for full GE disclosure and for scientifically based criteria to determine remediation needs.

Thank you.

Sincerely yours,

Eleanor Saunders and James Murray
