Dear Susan,

Please do the right thing with G.E.s IMPGs proposal. I support the EPAs HHRA and ERA studies and the opinions of your peer review panels.

G.E. had lots of time to argue with you and the panels of peer reviewers and they should accept your science not the "alternative assumptions" of their "scientists". G.E. should just start putting aside funds for continued remediation of the Housatonic River.

You will receive a more comprehensive statement from the Housatonic River Commission.

All my best, Lynn Fowler
