**Re: GE-Pittsfield/Housatonic River Site
Monthly Status Report Pursuant to Consent Decree for November 2005 (GECD900)**

Dear Mr. Tagliaferro and Ms. Steenstrup:

Enclosed are copies of General Electric's (GE's) monthly progress report for November 2005 activities conducted by GE at the GE-Pittsfield/Housatonic River Site. This monthly report is submitted pursuant to Paragraph 67 of the Consent Decree (CD) for this Site, which was entered by the U.S. District Court on October 27, 2000.

The enclosed monthly report includes not only the activities conducted by GE under the CD, but also other activities conducted by GE at the GE-Pittsfield/Housatonic River Site (as defined in the CD). The report is formatted to apply to the various areas of the Site as defined in the CD, and to provide for each area, the information specified in Paragraph 67 of the CD. The activities conducted specifically pursuant to or in connection with the CD are marked with an asterisk. GE is submitting a separate monthly report to the Massachusetts Department of Environmental Protection (MDEP), with a copy to the United States Environmental Protection Agency (EPA), describing the activities conducted by GE at properties outside the CD Site pursuant to GE's November 2000 Administrative Consent Order from MDEP.

The enclosed monthly report includes, where applicable, tables that list the samples collected during the subject month, summarize the analytical results received during that month from sampling or other testing activities, and summarize other groundwater monitoring and oil recovery information obtained during that month. Also, enclosed for each of you (and for Weston) is a CD-ROM that contains these same tables of the analytical data and monitoring information in electronic form.

Please call Andrew Silfer or me if you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "John F. Novotny, P.E." followed by a vertical line and the letters "V.M.E." below it.

John F. Novotny, P.E.

NOVEMBER 2005

**MONTHLY STATUS REPORT
PURSUANT TO CONSENT DECREE
FOR
GE-PITTSFIELD/HOUSATONIC RIVER
SITE**

GENERAL ELECTRIC COMPANY

PITTSFIELD, MASSACHUSETTS

Background

The General Electric Company (GE), the United States Environmental Protection Agency (EPA), the Massachusetts Department of Environmental Protection (MDEP), and other governmental entities have entered into a Consent Decree (CD) for the GE-Pittsfield/Housatonic River Site, which was entered by the U.S. Court on October 27, 2000. In accordance with Paragraph 67 of the CD, GE is submitting this monthly report, prepared on GE's behalf by Blasland, Bouck & Lee, Inc. (BBL), which summarizes the status of activities conducted by GE at the GE-Pittsfield/Housatonic River Site ("Site") (as defined in the CD).

This report covers activities in the areas listed below (as defined in the CD and/or the accompanying Statement of Work for Removal Actions Outside the River [SOW]). Only those areas that have had work activities for the month subject to reporting are included. The specific activities conducted pursuant to or in connection with the CD are noted with an asterisk.

General Activities (GECD900)

GE Plant Area (non-groundwater)

1. 20s, 30s, 40s Complexes (GECD120)
2. East Street Area 2 – South (GECD150)
3. East Street Area 2 – North (GECD140)
4. East Street Area 1 – North (GECD130)
5. Hill 78 and Building 71 Consolidation Areas (GECD210/220)
6. Hill 78 Area – Remainder (GECD160)
7. Unkamet Brook Area (GECD170)

Former Oxbow Areas (non-groundwater)

8. Former Oxbow Areas A & C (GECD410)
9. Lyman Street Area (GECD430)
10. Newell Street Area I (GECD440)
11. Newell Street Area II (GECD450)
12. Former Oxbow Areas J & K (GECD420)

Housatonic River

13. Upper ½-Mile Reach (GECD800)
14. 1½-Mile Reach (only for activities, if any, conducted by GE) (GECD820)
15. Rest of the River (GECD850)

Housatonic River Floodplain

16. Current Residential Properties Adjacent to 1½-Mile Reach (Actual/Potential Lawns) (GECD710)
17. Non-Residential Properties Adjacent to 1½-Mile Reach (excluding banks) (GECD720)
18. Current Residential Properties Downstream of Confluence (Actual/Potential Lawns) (GECD730)

Other Areas

19. Allendale School Property (GECD500)
20. Silver Lake Area (GECD600)

Groundwater Management Areas (GMAs)

21. Plant Site 1 (GECD310)
22. Former Oxbows J & K (GECD320)
23. Plant Site 2 (GECD330)
24. Plant Site 3 (GECD340)
25. Former Oxbows A&C (GECD350)

**GENERAL ACTIVITIES
GE-PITTSFIELD/HOUSATONIC RIVER SITE
(GECD900)
NOVEMBER 2005**

a. Activities Undertaken/Completed

Continued GE-EPA electronic data exchanges for the Housatonic River Watershed and Areas Outside the River.*

b. Sampling/Test Results Received

- Sample results were received for routine sampling conducted pursuant to GE's NPDES Permit for the GE facility. Sampling records and results are provided in Attachment A to this report.
- NPDES Discharge Monitoring Reports (DMRs) for the period of October 1 through October 31, 2005, are provided in Attachment B to this report.
- GE received a report from Columbia Analytical Services, Inc. titled *NPDES Biomonitoring Report for November 2005*, which included analytical results for samples collected for NPDES-related whole effluent toxicity testing, as well as an attached report from Aquatec Biological Sciences providing the results of the whole effluent toxicity testing performed in November 2005. A copy of this document is provided in Attachment C.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue NPDES sampling and monitoring activities.
- Attend public and Citizens Coordinating Council (CCC) meetings, as appropriate.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

**ITEM 1
PLANT AREA
20s, 30s, 40s COMPLEXES
(GECD120)
NOVEMBER 2005**

a. Activities Undertaken/Completed

- Continued demolition activities at Building 42.
- Conducted air monitoring for particulates and PCBs in connection with demolition activities in 40s Complex, as identified in Table 1-1.
- During the course of demolition of a portion of concrete floor slab in Building 42, fourth floor, observed that a small area (approximately 2 feet wide by 3 feet long) contained elemental mercury. The area was cleaned by ONYX Environmental Services on Friday, November 11, 2005, and the observations reported to EPA. The waste material will be disposed of off-site in accordance with applicable regulations. The concrete slab is part of a TSCA carve-out, and is subject to disposal at the Building 71 On-Plant Consolidation Area (OPCA).
- Conducted the annual ERE inspections of the 20s and 30s Complexes (November 18, 2005).*

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue demolition activities at Building 42.
- Submit ERE inspection reports for 20s and 30s Complexes.*

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

Notification Level		0.120			

Notes:

* Measured with DR-2000 or DR-4000. All others measured with pDR-1000.

Background monitoring station is located east of Building 9B, between 9B and New York Avenue.

Predominant wind direction determined using hourly wind direction data from the Pittsfield Municipal Airport Weather Station.

¹ Monitoring was performed only on days when site activities occurred and there were no precipitation events or threat of significant precipitation.

² The particulate monitors obtain real-time data. The sampling data were obtained by BEC on the sampling date.

³ Sampling period was shortened due to equipment malfunction.

⁴ Reading reflects average concentration manually recorded from the monitor at the end of the day. Unable to download data due to equipment failure.

⁵ Estimated time of operation. Unable to download data due to equipment failure.

⁶ Sampling period was shortened due to precipitation/threat of precipitation.

⁷ Sampling period was shortened due to completion of site activities for the day.

EAST STREET AREA 2-SOUTH
(GECD150)
NOVEMBER 2005**

a. Activities Undertaken/Completed

- Conducted Liquid-Phase Carbon Absorption (LPCA) sampling at Building 64G, as identified in Table 2-1.
- Conducted inspection of the City Recreational Area (November 18, 2005).*
- Continued development of Final Completion Report for City Recreational Area.*
- Submitted Second Interim Letter Report regarding additional data needs (November 21, 2005).*
- Initiated development of Conceptual Removal Design/Removal Action (RD/RA) Work Plan.*

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue routine process sampling at Buildings 64G and/or 64T.
- Submit Final Completion Report for City Recreational Area.*
- Submit inspection report on fall 2005 inspection of City Recreational Area.*
- If comments are received from EPA and MDEP on the draft ERE for City Recreational Area, discuss those comments with EPA and MDEP.*
- Continue development of Conceptual RD/RA Work Plan (due to EPA by January 20, 2006).*

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

Notes:

1. Samples were collected by General Electric Company and submitted to Columbia Analytical Services, Inc. and SGS Environmental Services, Inc. for analysis of volatiles, PCBs, semivolatiles, and oil & grease.
2. NA - Not Analyzed.
3. ND - Analyte was not detected. The number in parentheses is the associated detection limit.
4. With the exception of conventional parameters only those constituents detected in one or more samples are summarized.

**ITEM 3
PLANT AREA
EAST STREET AREA 2-NORTH
(GECD140)
NOVEMBER 2005**

a. Activities Undertaken/Completed

- Initiated demolition activities at Buildings 15, 15A, 15B, and 15W.
- Conducted air monitoring for particulate matter in connection with above-mentioned demolition activities, as identified in Table 3-1.
- Conducted sampling of oil from equipment in Building 15 and acetone/hexane from drums in Building 78, as identified in Table 3-1.
- Conducted sampling of microfilm from Building 16, as identified in Table 3-1.
- Conducted equipment draining and dismantling activities at Building 100 Annex.
- Collected and tankered approximately 52,500 gallons of groundwater from Building 9 to Building 64G for treatment.
- Collected and tankered approximately 1,250 gallons of groundwater from Building 15 to Building 64G for treatment.

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Initiate demolition of Buildings 1, 2, 3, and 3B and associated annexes (Buildings 1A and 100 Annex) per EPA's November 21, 2005 approval of GE's plans for demolition of those buildings and consolidation of certain building demolition debris at the OPCAs, as those plans related to the above-grade portions of these buildings.
- Following receipt of EPA approval of GE's October 7, 2005 *Supplement to Conceptual RD/RA Work Plan and Proposal for Additional Investigations* (Conceptual Work Plan Supplement) conduct the additional investigations and evaluations described therein and begin development of an Addendum to the Conceptual RD/RA Work Plan to present the results.*

**ITEM 3
(cont'd)
PLANT AREA
EAST STREET AREA 2-NORTH
(GECD140)
NOVEMBER 2005**

e. General Progress/Unresolved Issues/Potential Schedule Impacts

- GE has proposed to EPA that additional technical discussions be conducted regarding the below-grade portions of Buildings 1, 2, 3 and 3B.
- The Final RD/RA Work Plan for this area was previously due on January 13, 2006. However, given the need for additional investigations as described in the Conceptual Work Plan Supplement, GE will propose a revised schedule for submission of the Final RD/RA Work Plan in the above-mentioned Addendum to the Conceptual RD/RA Work Plan.*

f. Proposed/Approved Work Plan Modifications

Received EPA verbal approval of GE's September 22, 2005 letter to EPA (which provided notice of GE's demolition plans for Buildings 1, 2, 3, 3B, 15, 15A, 15B, and 15W and its proposed plans for consolidation of certain debris from those demolition activities at the OPCAs) as that letter pertained to the above-grade portions of Buildings 1, 2, 3, and 3B and associated annexes (Buildings 1A and 100 Annex) (November 21, 2005). (That letter had previously been approved as it related to Buildings 15, 15A, 15B, and 15W.)

C1262-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1263-OIL-1	10/31/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1265-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1266-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1268-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1270-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1272-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1275-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	ND(1.0)
C1276-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	ND(1.0)	0.76 J
C1277-OIL-1	11/2/2005	ND(1.0)	ND(1.0)	1.2	1.2

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc., and submitted to SGS Environmental Services, Inc. for analysis of PCBs.
2. ND - Analyte was not detected. The number in parentheses is the associated detection limit.

Data Qualifiers:

J - Indicates an estimated value less than the practical quantitation limit (PQL).

TABLE 3-3
AMBIENT AIR PARTICULATE MATTER DATA RECEIVED DURING NOVEMBER 2005¹

**PARTICULATE AMBIENT AIR CONCENTRATIONS
 15s COMPLEX DEMOLITION ACTIVITIES
 GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS**

Sampling Date ²	Sampler Location	Average Site Concentration (mg/m ³)	Background Site Concentration (mg/m ³)	Average Period (Hours:Min)	Predominant Wind Direction

Notification Level		0.120			

Notes:

* Measured with DR-2000 or DR-4000. All others measured with pDR-1000.

Background monitoring station is located east of Building 9B, between 9B and New York Avenue.

Predominant wind direction determined using hourly wind direction data from the Pittsfield Municipal Airport Weather Station.

¹ Monitoring was performed only on days when site activities occurred and there were no precipitation events or threat of significant precipitation.

² The particulate monitors obtain real-time data. The sampling data were obtained by BEC on the sampling date.

³ Sampling period was shortened due to mid-day notification of project start-up.

⁴ Sampling period was shortened due to instrument malfunction (dead battery).

⁵ Sampling period was shortened due to precipitation/threat of precipitation.

ITEM 5
PLANT AREA
HILL 78 & BUILDING 71 CONSOLIDATION AREAS
(GECD210/220)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

- Substantially completed construction of the Building 71 OPCA final cover system for Cell 1 and a portion of Cell 2.
- Conducted ambient air monitoring for particulates and PCBs, as identified in Table 5-1.
- Continued transfer of leachate from Building 71 OPCA to Building 64G for treatment. The total amount transferred in November 2005 was 162,500 gallons (see Table 5-5).
- Transferred to the OPCAs soils and sediments from EPA's removal activities in the 1½ Mile Reach; excavated soils and materials from removal activities at Newell Street Area I, Newell Street Area II, and the 1½ Mile Floodplain Properties; demolition debris from Buildings 15 and 42; and various facility-related materials.
- Agreed to a number of enhancements related to the monitoring and dust control measures for the OPCAs (in addition to the enhancements listed in the monthly status report for October). Those additional enhancements included:
 - Re-locating one air monitoring station (with a monitor and co-located monitor) to be more directly between the OPCAs and Allendale School, effective November 22, 2005 (see Tables 5-3 and 5-4);
 - Upgrading a particulate matter monitor;
 - Modifying the OPCA trucking route (with EPA approval) so that the Tyler Street Extension is used as a "one way" road.

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

**ITEM 5
(cont'd)
PLANT AREA
HILL 78 & BUILDING 71 CONSOLIDATION AREAS
(GECD210/220)
NOVEMBER 2005**

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue transfer to the OPCAs of building demolition debris from various ongoing demolition projects, soils and sediments from EPA's removal activities in the 1½ Mile Reach, and excavated soils and materials from Newell Street Areas I and II and the 1½ Mile Floodplain Properties.
- If appropriate, implement additional enhancements relating to OPCA operations, based on discussions with EPA and MDEP.
- Submit a proposed revised footprint for the Hill 78 OPCA, proposing a modification of the boundaries of that OPCA.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

GE is continuing to discuss with EPA and MDEP additional enhancements relating to OPCA operations.

f. Proposed/Approved Work Plan Modifications

None

Notes:

NA - Not Available

* Measured with DR-2000 or DR-4000. All others measured with pDR-1000.

Background monitoring station is located east of Building 9B, between Building 9B and New York Avenue.

Predominant wind direction determined using hourly wind direction data from the Pittsfield Municipal Airport Weather Station.

¹ Monitoring was performed only on days when site activities occurred and there were no precipitation events or threat of significant precipitation.

² The particulate monitors obtain real-time data. The sampling data were obtained by BEC on the sampling date.

³ Sampling period was shortened due to precipitation/threat of precipitation.

⁴ Sampling data are not available due to instrument malfunction.

⁵ Sampling period was shortened due to equipment re-calibration.

⁶ Sampling period was shortened due to instrument malfunction.

⁷ On November 22, the southwest monitoring station was eliminated. A new monitoring station was located to the Northwest of the OPCAs.

⁸ Reading reflects average concentration manually recorded from the monitor at the end of the day. Unable to download data due to equipment failure.

⁹ Estimated time of operation. Unable to download data due to equipment failure.

TABLE 5-5
BUILDING 71 CONSOLIDATION AREA LEACHATE TRANSFER SUMMARY
PLANT AREA - HILL 78 & BUILDING 71 CONSOLIDATION AREAS
CONSENT DECREE MONTHLY STATUS REPORT
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS
November 2005

Month / Year	Total Volume of Leachate Transferred (Gallons)
November 2004	138,000
December 2004	146,000
January 2005	136,000
February 2005	116,500
March 2005	174,500
April 2005	192,000
May 2005	89,500
June 2005	130,000
July 2005	127,500
August 2005	55,000
September 2005	55,000
October 2005	378,000
November 2005	162,500

Leachate is transferred from the Building 71 On-Plant Consolidation Area to Building 64G for treatment.

Notes:

1. Sample was collected by Blasland, Bouck & Lee, Inc., and submitted to SGS Environmental Services, Inc. for analysis of volatiles, PCBs, semivolatiles, and metals.
2. Only detected constituents are summarized.
3. -- Indicates that all constituents for the parameter group were not detected.

Data Qualifiers:

Inorganics

B - Indicates an estimated value between the instrument detection limit (IDL) and practical quantitation limit (PQL).

ITEM 8
FORMER OXBOW AREAS A & C
(GECD410)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

None

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

Submitted Supplemental Sampling Proposal for Parcels I8-23-4, I8-23-5, and I8-23-9 (November 2, 2005).

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Initiate sampling activities (weather-dependent) upon EPA's approval of the Supplemental Sampling Proposal (see Item 8.c above).

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

ITEM 9
LYMAN STREET AREA
(GECD430)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

At a technical meeting, GE provided EPA with two tables and a figure summarizing the results of a preliminary flood storage volume assessment for the 100-year floodplain of the Housatonic River between the Newell Street and Lyman Street bridges. This assessment demonstrated, among other things, that the loss of flood storage capacity resulting from installation of an engineered barrier at the GE-Lyman Street parking lot would be more than offset by gains in flood storage capacity due to building demolition activities in the same floodplain reach, thus resulting in no net loss in flood storage capacity. EPA verbally approved that conclusion at the meeting.

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

None

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

ITEM 10
NEWELL STREET AREA I
(GECD440)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

- Continued remediation of Parcels J9-23-19, -20, and -21.
- During the remediation of the above-referenced parcels, encountered two intact drums containing liquid, as well as three empty drum carcasses, in subsurface soil. In response, GE: (1) properly removed the drums; (2) sent the drum carcasses to GE's OPCAs for disposition there; and (3) overpacked the intact drums that contained liquids and sent them to GE's on-plant TSCA storage area for subsequent characterization of their contents to facilitate the appropriate off-site disposition of these drums.
- Conducted air monitoring for particulates and PCBs, as identified in Table 10-1.

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Potentially complete remediation of Parcels J9-23-19, -20, and -21, depending on weather. (The remaining activity involves installation of a concrete slab over a dirt floor in a building.)
- Conduct inspection of installed engineered barriers, other backfilled/restored areas, and re-vegetated areas at Newell Street Area I and submit inspection report.
- Record ERE and Notice of Completion for Parcel J9-23-24 following receipt of EPA approval and MDEP acceptance of same.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

TABLE 10-3
AMBIENT AIR PARTICULATE MATTER DATA RECEIVED DURING NOVEMBER 2005⁴

**PARTICULATE AMBIENT AIR CONCENTRATIONS
NEWELL STREET AREA I
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS**

Notes:

NA - Not Available

* Measured with DR-2000 or DR-4000. All others measured with pDR-1000.

Newell Street Area I - Phase III remediation completed November 17, 2005.

Background monitoring station is located east of Building 9B, between Building 9B and New York Avenue.

Predominant wind direction determined using hourly wind direction data from the Pittsfield Municipal Airport Weather Station.

¹ Monitoring was performed only on days when site activities occurred and there were no precipitation events or threat of significant precipitation.

² The particulate monitors obtain real-time data. The sampling data were obtained by BEC on the sampling date.

³ Reading reflects average concentration manually recorded from the monitor at the end of the day. The instrument was stolen from the site on 11/09/05 before the datalog file was downloaded.

⁴ Estimated time of operation. The instrument was stolen from the site on 11/09/05 before the datalog file was downloaded.

⁵ Sampling period was shortened due to precipitation/threat of precipitation.

⁶ Data not available. The instrument was stolen from the site on 11/09/05.

ITEM 11
NEWELL STREET AREA II
(GECD450)
NOVEMBER 2005

a. Activities Undertaken/Completed

- Continued soil remediation.*
- Completed test trenching activities at Parcel J9-23-8 in accordance with a letter from GE to EPA titled Proposal for Test Trenching Activities, dated October 31, 2005, as conditionally approved by EPA in a letter dated November 9, 2005.* Excavated soils from test trenches were temporarily held in a pile adjacent to the test trench area on top of and covered by polyethylene sheeting.
- Encountered drums in test trenches at Parcel J9-23-8, most of which were crushed or in pieces and one of which was intact and contained liquid material. Consistent with previously reported response activities, GE: (1) properly removed the drums; (2) sent the crushed drums and drum fragments to GE's OPCAs for disposition there; and (3) overpacked the intact drum that contained liquid and sent it to GE's on-plant TSCA storage area for subsequent characterization of the contents to facilitate the appropriate off-site disposition of this drum.
- During soil removal/test trenching activities, encountered capacitors in subsurface soil at Parcel J9-23-8. In response, GE placed these capacitors into drums and sent those drums to GE's on-plant TSCA storage area for subsequent appropriate off-site disposal.
- Collected composite sample of soil from test trench soil pile and submitted it for analysis of volatile and semi-volatile organic compounds and for testing by Toxicity Characteristic Leaching Procedure (TCLP), as identified in Table 11-1.
- Continued air monitoring for particulates and PCBs, as identified in Table 11-1.*
- Collected and tankered approximately 75,000 gallons of groundwater from Newell Street Area II to Building 64G for treatment.
- At a technical meeting, GE provided EPA with two tables and a figure summarizing the results of a preliminary flood storage volume assessment for the 100-year floodplain of the Housatonic River between the Newell Street and Lyman Street bridges. This assessment demonstrated, among other things, that the loss of flood storage capacity resulting from installation of an engineered barrier at the GE-Newell Street parking lot would be more than offset by gains in flood storage capacity due to building demolition activities in the same floodplain reach, thus resulting in no net loss in flood storage capacity. EPA verbally approved that conclusion at the meeting.*

b. Sampling/Test Results Received

See attached tables.

ITEM 11
(cont'd)
NEWELL STREET AREA II
(GECD450)
NOVEMBER 2005

c. Work Plans/Reports/Documents Submitted

Submitted analytical data for proposed topsoil source to EPA on November 22, 2005.*

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Complete planned soil remediation.*
- Based on sampling results for liquid contents of drums from Parcel J9-23-8, arrange for appropriate off-site disposal of those drums.
- Arrange for appropriate off-site disposal of drummed capacitors removed from Parcel J9-23-8.
- Review sampling data from test trench soil pile and arrange for appropriate disposition of that soil.
- Provide proposal to EPA regarding future excavation work at Parcel J9-23-8 and consider disposition of excavated soil.*
- Submit Subsurface Investigation Summary Report (due by December 22, 2005).*

e. General Progress/Unresolved Issues/Potential Schedule Impacts

Issues relating to future activities at Parcel J9-23-8 are under discussion with EPA.

f. Proposed/Approved Work Plan Modifications

Received EPA conditional approval for Proposal for Test Trenching Activities on November 9, 2005.*

Notes:

* Measured with DR-2000 or DR-4000. All others measured with pDR-1000.

Background monitoring station is located east of Building 9B, between Building 9B and New York Avenue.

Predominant wind direction determined using hourly wind direction data from the Pittsfield Municipal Airport Weather Station.

¹ Monitoring was performed only on days when site activities occurred and there were no precipitation events or threat of significant precipitation.

² The particulate monitors obtain real-time data. The sampling data were obtained by BEC on the sampling date.

³ Sampling period was shortened due to instrument malfunction.

⁴ Sampling period was shortened due to technician error.

⁵ Sampling period was shortened due to equipment recalibration.

⁶ Sampling period was shortened due to instrument malfunction (dead battery).

⁷ Sampling period was shortened due to precipitation/threat of precipitation.

⁸ Reading reflects average concentration manually recorded from the monitor at the end of the day. Unable to download data due to equipment failure.

⁹ Estimated time of operation. Unable to download data due to equipment failure.

ITEM 12
FORMER OXBOW AREAS J & K
(GECD420)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

None

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

Submitted Supplemental Sampling Proposal for Parcels K10-13-1, K10-12-1, K10-11-5, K10-10-3, K10-10-4, and K10-10-33 (November 2, 2005).

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Initiate sampling activities (weather-dependent) upon EPA's approval of the Supplemental Sampling Proposal (see Item 12.c above).

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

ITEM 13
HOUSATONIC RIVER AREA
UPPER ½ MILE REACH
(GECD800)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

Performed remedial planting of understory and canopy species as described in October 10, 2005 Trip Report (November 9, 2005).

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Begin development of annual monitoring summary report for 2005.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

- Seepage meter monitoring has not occurred due to increased water levels. EPA and GE have agreed to postpone installation of seepage meters until after the completion of EPA activities in the 1½ Mile Reach.
- Issues relating to total organic carbon (TOC) content in isolation layer remain unresolved. EPA and GE have agreed that GE's report on those issues will be deferred until after the seepage meter data are available. The Final Completion Report for Upper ½ Mile Reach Removal Action will be submitted following resolution of those issues.

f. Proposed/Approved Work Plan Modifications

None

ITEM 14
HOUSATONIC RIVER AREA
1½ MILE REACH
(GECD820)
NOVEMBER 2005

(Note: This item is limited to activities conducted by GE and does not include EPA's work on the 1½ Mile Reach Removal Action)

a. Activities Undertaken/Completed

On November 22, 2005, BBL (on GE's behalf) performed a round of water column monitoring at eight locations along the Housatonic River between Coltsville, MA and Great Barrington, MA. One of these locations is situated in the 1½ Mile Reach: Lyman Street Bridge (Location 4). (Pomeroy Avenue Bridge [Location 6A] was not sampled during this month due to remedial construction activities at Pomeroy Avenue.) A composite grab sample was collected at Location 4 and submitted to Northeast Analytical for analysis of PCBs (total), TSS, POC, and chlorophyll-a, as identified in Table 14-1. (The other seven locations are discussed under Item 15 below.)

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Continue Housatonic River monthly water column monitoring.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

None

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc. and submitted to Northeast Analytical, Inc. for analysis of unfiltered PCBs, total suspended solids (TSS), particulate organic carbon (POC), and chlorophyll (a).
2. Sampling methods involved the collection of composite grab samples at each location, representative of three stations (25, 50, and 75 percent of the total river width at each location) at 50 percent of the total river depth at each station.
3. ND - Analyte was not detected. The number in parenthesis is the associated detection limit.

Data Qualifiers:

AF - Aroclor 1254 is being reported as the best Aroclor match.
 AG - Aroclor 1260 is being reported as the best Aroclor match.

The sample exhibits an altered PCB pattern.

The sample exhibits an altered PCB pattern.

ITEM 15
HOUSATONIC RIVER AREA
REST OF THE RIVER
(GECD850)
NOVEMBER 2005

a. Activities Undertaken/Completed

- On November 22, 2005, BBL (on GE's behalf) performed a round of water column monitoring at eight locations along the Housatonic River between Coltsville and Great Barrington, MA. One location is situated in the 1½ Mile Reach of the Housatonic River and was discussed in Item 14. Of the remaining seven locations, two are located upstream of the 1½ Mile Reach: Hubbard Avenue Bridge (Location 1) and Newell Street Bridge (Location 2). The five remaining locations are situated in the Rest of the River: Holmes Road Bridge (Location 7); New Lenox Road Bridge (Location 9); Woods Pond Headwaters (Location 10); Schweitzer Bridge (Location 12); and Division Street Bridge (Location 13). Sampling activities were performed at all these locations on November 22, 2005 from downstream to upstream. Composite grab samples were collected at each location sampled and submitted to Northeast Analytical for analysis of PCBs (total), TSS, POC, and chlorophyll-a, as identified in Table 15-1.
- Conducted structural integrity inspection of Woods Pond Dam (November 29, 2005).*
- Continued work on repairs to gate stem at Rising Pond Dam.*

b. Sampling/Test Results

See attached tables.

c. Work Plans/Reports/Documents Submitted

Submitted report on additional floodplain soil sampling conducted at Parcels K4-6-27, K4-6-28, and J3-2-1 (November 8, 2005).

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue Housatonic River monthly water column monitoring.
- Submit report on structural integrity inspection of Woods Pond Dam.*
- Observe structural integrity inspection of Rising Pond Dam, conducted by consultants to dam owner.*
- Continue work on repairs to gate stem at Rising Pond Dam.*
- Receive EPA's comments on GE's IMPG Proposal.*

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc. and submitted to Northeast Analytical, Inc. for analysis of unfiltered PCBs, total suspended solids (TSS), particulate organic carbon (POC), and chlorophyll (a).
2. Sampling methods involved the collection of composite grab samples at each location, representative of three stations (25, 50, and 75 percent of the total river width at each location) at 50 percent of the total river depth at each station.
3. NA - Not Analyzed. PCB bottle for Location-2 was broken during shipment.
4. ND - Analyte was not detected. The number in parenthesis is the associated detection limit.
5. Field duplicate sample results are presented in brackets.

Data Qualifiers:

AF - Aroclor 1254 is being reported as the best Aroclor match.

The sample exhibits an altered PCB pattern.

AG - Aroclor 1260 is being reported as the best Aroclor match.

The sample exhibits an altered PCB pattern.

PE - Aroclor 1248 is being used to report an altered PCB pattern exhibited by the sample.

Actual Aroclor 1248 is not present in the sample, but is reported to more accurately quantify PCBs present in a sample that has undergone environmental alteration.

ITEMS 16 & 17
HOUSATONIC RIVER FLOODPLAIN
RESIDENTIAL AND NON-RESIDENTIAL
PROPERTIES ADJACENT TO 1½-MILE REACH
(GECD710 AND GECD720)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

Continued restoration activities at certain Phase 3 floodplain properties.

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Conduct inspection of backfilled/restored areas at Phase 3 properties and submit inspection report.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

GE will discuss with EPA a schedule for pre-certification inspection and submittal of a Final Completion Report for Phase 1 and Phase 2 properties and ERE for City property in Phase 2.

f. Proposed/Approved Work Plan Modifications

None

ITEM 18
HOUSATONIC RIVER FLOODPLAIN
CURRENT RESIDENTIAL PROPERTIES
DOWNSTREAM OF CONFLUENCE
(ACTUAL/POTENTIAL LAWNS)
(GECD730)
NOVEMBER 2005

a. Activities Undertaken/Completed

None

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

None

e. General Progress/Unresolved Issues/Potential Schedule Impacts

Awaiting EPA approval of GE's Pre-Design Investigation Work Plan (submitted on February 26, 2002). (Based on discussions with EPA, it appears that this pre-design sampling will be deferred for some period of time.)*

f. Proposed/Approved Work Plan Modifications

None

ITEM 19
ALLENDALE SCHOOL PROPERTY
(GECD500)
NOVEMBER 2005

a. Activities Undertaken/Completed

Collected split soil samples with EPA at Allendale School property (November 30, 2005) (see Table 19-1). These samples were submitted to the laboratory to be held for possible future PCB analysis depending on the results from the soil samples collected by EPA.

b. Sampling/Test Results Received

None

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Review results of EPA soil and ambient air sampling at Allendale School property; data being collected by the Massachusetts Department of Public Health on indoor air, solid surfaces, and dust from air filters within the school; and soil sampling data to be collected by MDEP on soil in a crawl space beneath the school.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

See Item 19.d.

f. Proposed/Approved Work Plan Modifications

None

(GECD600)
NOVEMBER 2005**

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

- Performed water level monitoring at Silver Lake staff gauge and monitoring wells surrounding the lake (see Item 21.a).
- Processed Core D16 of the Bench-Scale Study for analysis as prescribed in the Bench-Scale Work Plan. Remaining cores will continue in study for approximately 6 more weeks.
- Continued performance of Stage 3 of the Bench-Scale Study for sediments in accordance with the Bench-Scale Study Work Plan.
- Collected monthly overburden water sample in accordance with the Bench-Scale Study Work Plan, as identified in Table 20-1.

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled Activities (next six weeks)

- Submit Third Interim Pre-Design Investigation Report for Soils Adjacent to Silver Lake (due by December 30, 2005).
- Continue water level monitoring at well pairs surrounding the lake.
- Continue Bench-Scale Study for sediments in accordance with the Bench-Scale Study Work Plan.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

An extension of time will be necessary for submission of the Bench-Scale Study Report (currently due on December 26, 2005). GE will discuss this with EPA and request an appropriate extension of time.

TABLE 20-3
DATA RECEIVED DURING NOVEMBER 2005

**ADDITIONAL PRE-DESIGN INVESTIGATION SOIL SAMPLING
SILVER LAKE AREA
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS
(Results are presented in dry weight parts per million, ppm)**

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc., and submitted to SGS Environmental Services, Inc. for analysis of Appendix IX+3 constituents.
2. NA - Not Analyzed.
3. ND - Analyte was not detected. The number in parentheses is the associated detection limit.
4. Total 2,3,7,8-TCDD toxicity equivalents (TEQs) were calculated using Toxicity Equivalency Factors (TEFs) derived by the World Health Organization (WHO) and published by Van den Berg et al. in Environmental Health Perspectives 106(2), December 1998.
5. With the exception of dioxin/furans, only those constituents detected in one or more samples are summarized.
6. Field duplicate sample results are presented in brackets.

Data Qualifiers:

Organics (volatiles, semivolatiles, dioxin/furans)

- J - Indicates an estimated value less than the practical quantitation limit (PQL).
I - Polychlorinated Diphenyl Ether (PCDPE) Interference.
Q - Indicates the presence of quantitative interferences.
X - Estimated maximum possible concentration.
Y - 2,3,7,8-TCDF results have been confirmed on a DB-225 column.

Inorganics

- B - Indicates an estimated value between the instrument detection limit (IDL) and PQL.

TABLE 20-4
PCB DATA RECEIVED DURING NOVEMBER 2005

SILVER LAKE BENCH SCALE STUDY
SILVER LAKE AREA
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS
(Results are presented in parts per million, ppm)

Sample ID	Date Collected	Aroclor-1016	Aroclor-1221	Aroclor-1232	Aroclor-1242	Aroclor-1248	Aroclor-1254	Aroclor-1260	Total PCBs
SL-D10-WATER-1	11/2/2005	ND(0.000042)							
SL-D11-WATER-1	11/2/2005	ND(0.000043)							
SL-D12-WATER-1	11/2/2005	ND(0.000040)							
SL-D14-WATER-1	11/2/2005	ND(0.000042)	ND(0.000042)	ND(0.000042)	ND(0.000042)	0.000067 PE	0.000043 AF	0.000044 AG	0.000154

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc., and submitted to Northeast Analytical, Inc. for analysis of PCBs.
2. ND - Analyte was not detected. The number in parentheses is the associated detection limit.

Data Qualifiers:

- | | |
|---|---|
| AF - Aroclor 1254 is being reported as the best Aroclor match. | The sample exhibits an altered PCB pattern. |
| AG - Aroclor 1260 is being reported as the best Aroclor match. | The sample exhibits an altered PCB pattern. |
| PE - Aroclor 1248 is being used to report an altered PCB pattern exhibited by the sample. | Actual Aroclor 1248 is not present in the sample, but is reported to more accurately quantify PCBs present in a sample that has undergone environmental alteration. |

ITEM 21
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 1 (GMA 1)
(GECD310)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

General:

- Conducted routine groundwater elevation and NAPL monitoring at certain locations that were inaccessible or not located during the October 2005 groundwater and NAPL monitoring round.
- Conducted an inspection of riverbank areas adjacent to GMA 1. This inspection was performed to satisfy semi-annual inspection requirements, as well as to assess conditions following a high-flow event recorded in October 2005.

East Street Area 1-North and South:

- Continued automated groundwater and NAPL pumping at North Side and South Side Caissons. Approximately 4.0 gallons of LNAPL were recovered from the North Side Caisson, and approximately 2.0 gallons of LNAPL were recovered from the South Side Caisson in November.
- Continued routine well monitoring and manual NAPL removal activities. Approximately 0.025 liter (0.007 gallon) of LNAPL was removed from this area during November.

East Street Area 2-South:

- Continued automated groundwater and LNAPL removal activities. A total of approximately 5,864,169 gallons of groundwater was recovered from pumping systems 64R, 64S, 64V, 64X, RW-1(S), RW-1(X), and RW-2(X). In addition, approximately 1,006 gallons of LNAPL were removed from pumping systems 64R, 64V, RW-1(S), RW-1(X), 64X, and 64S Caisson.
- Continued automated DNAPL removal activities. Removed approximately 51 gallons of DNAPL from pumping system RW-3(X).
- Continued routine well monitoring and manual NAPL removal activities. Approximately 7.77 liters (2.05 gallons) of LNAPL was removed from wells in this area during November.
- Treated/discharged 5,385,131 gallons of water through 64G Groundwater Treatment Facility.

ITEM 21
(cont'd)
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 1 (GMA 1)
(GECD310)
NOVEMBER 2005

a. Activities Undertaken/Completed (cont'd)

East Street Area 2-North:

- Continued routine well monitoring and NAPL removal activities. No NAPL was recovered from this area during November.

20s, 30s, and 40s Complexes:

- Continued routine well monitoring and NAPL removal activities. No NAPL was recovered from this area during November.

Lyman Street Area:

- Continued automated groundwater and NAPL removal activities. A total of approximately 412,936 gallons of groundwater was recovered from pumping systems RW-1R, RW-2, and RW-3. No LNAPL was removed from the automated recovery systems during November.
- Continued routine well monitoring and NAPL removal activities. Approximately 2.83 liters (0.75 gallon) of DNAPL was removed from wells in this area during November.

Newell Street Area II:

- Continued routine well monitoring and NAPL removal activities. Approximately 0.03 liter (0.008 gallon) of DNAPL was recovered from this area during November. Monitoring wells N2SC-01I, N2SC-01I(R), N2SC-03I, N2SC-03I(R), N2SC-08, N2SC-14, NS-15, NS-30, and NS-32 could not be accessed for monitoring due to ongoing excavation activities in this area.

Silver Lake Area:

- Continued routine monitoring of monitoring well pairs around lake and staff gauge in lake.

b. Sampling/Test Results Received

See attached tables.

c. Work Plans/Reports/Documents Submitted

None

ITEM 21
(cont'd)
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 1 (GMA 1)
(GECD310)
NOVEMBER 2005

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue routine monitoring activities.
- Evaluate NAPL thickness and groundwater elevation data.
- Validate groundwater analytical data and begin preparation of the Fall 2005 Groundwater Quality Monitoring Interim Report.
- Following EPA approval of proposed activities contained in GE's Spring 2005 NAPL Monitoring Report (submitted on August 30, 2005), GE will:
 - Install LNAPL monitoring wells GMA1-22, GMA1-23, and GMA1-24 in East Street Area 2-South.
 - Remove oil skimmer from well 40R and place it in well GMA1-17W.
 - Decommission 31 wells at the Lyman Street Area.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

- The automated DNAPL recovery systems for Newell Street Area II were shut down on July 25, 2005 pursuant to EPA approval of GE's June 7 and 23, 2005 proposals. Each system has been disconnected from the associated recovery wells and the System 1 control shed has been removed. Pipelines scheduled for replacement have been drained and removed. Two replacement recovery wells (N2SC-1I(R) and N2SC-3I(R)) have been installed and developed. The upgraded recovery system will be completed and activated approximately 2 to 3 months after completion of the EPA-approved soil remediation activities in this area.
- As discussed with EPA, GE plans to monitor all remaining wells associated with the Newell Street Area II DNAPL recovery systems on a weekly basis and remove DNAPL accumulations greater than 0.5 feet on a monthly basis until the upgraded recovery system is activated. However, those wells could not be monitored during November because of access issues related to ongoing soil remediation activities.

f. Proposed/Approved Work Plan Modifications

Several program modifications were proposed in the Spring 2005 NAPL Monitoring Report (see Item 21.d above).

After treatment, the majority of the water processed at GE's Building 64G groundwater treatment facility is discharged to the Housatonic River through NPDES permitted Outfall 005. However, as part of GE's overall efforts to contain NAPL within the site and to optimize NAPL recovery operations, a portion of the treated water discharged from the 64G facility is routed to GE's on-site recharge pond located in East Street Area 2-South.

CONSENT DECREE MONTHLY STATUS REPORT
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS
November 2005

Notes:

1. ft BMP - feet Below Measuring Point.
2. --- indicates LNAPL or DNAPL was not present in a measurable quantity.
3. NA indicates information not available.
4. NM indicates information not measured.
5. P indicates that LNAPL is present at a thickness that is < 0.01 feet, the corresponding thickness is recorded as such.
6. Well HR-G2-RW-1 is constructed at an angle of 41.67 degrees from vertical. Depth to water data reflect measurements collected along the angled well casing. Groundwater elevations are corrected to account for the angle of the well casing.
7. A survey reference point (SG-HR-1) was established on the Newell Street Bridge. The "Depth to Water" value(s) provided in the above table refer to the vertical distance from the surveyed reference point to the water surface.
8. A weighted bailer has been installed at this location to remove accumulations of DNAPL. The DNAPL thickness reported is that measured within the bailer upon the initial retrieval.

October 2005	314,247	--	--	--
November 2005	412,936	--	--	--

Notes:

1. Volume of water pumped is total from Wells RW-1R, RW-2, and RW-3.
2. -- indicates LNAPL or DNAPL was not recovered by the system.
3. There was no downtime during November 2005.

BM-2A	986.32	11/29/2005	14.51	See Note 5 regarding depth to water					971.81

Notes:

1. ft BMP - feet Below Measuring Point.
2. --- indicates LNAPL or DNAPL was not present in a measurable quantity.
3. NA indicates information not available.
4. P indicates that LNAPL is present at a thickness that is < 0.01 feet, the corresponding thickness is recorded as such.
5. A survey reference point (BM-2A) was established on the Lyman Street Bridge. The "Depth to Water" value(s) provided in the above table refer to the vertical distance from the surveyed reference point to the water surface.

	October 2005	-- ⁽⁴⁾
Total Automated DNAPL Removal for November 2005:		0.0 Gallons

Notes:

1. System 1 wells are NS-15, NS-30, and NS-32.
2. System 2 wells are N2SC-01I, N2SC-03I, and N2SC-14.
3. In January 2005, System 2 malfunctioned during weeks 2 and 3, pumping mostly water.
The volume reported for those two weeks is an estimated quantity that was included in the total volume removed.
4. The DNAPL recovery systems for the Newell Street Area II were shut down on July 25, 2005. The upgraded systems will be completed and activated approximately 2 to 3 months after completion of the EPA-approved soil remediation activities in this area.

Notes:

1. ft BMP - feet Below Measuring Point.
2. --- indicates LNAPL or DNAPL was not present in a measurable quantity.
3. NA indicates information not available.
4. A new Silver Lake Gauge has been installed and will be surveyed to obtain a new horizontal datum. "Depth to Water" values provided refer to feet above the datum, rather than feet below the measuring point.
5. Additional groundwater elevation data was collected from wells near Silver Lake that are located in the 30s Complex and at the Lyman Street Area. Those results are presented in the monitoring tables for those Removal Action Areas.

ITEM 22
GROUNDWATER MANAGEMENT AREAS
FORMER OXBOWS J & K (GMA 2)
(GECD320)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

Conducted annual interim groundwater quality monitoring and monthly river elevation monitoring.

b. Sampling/Test Results Received

- See attached tables.
- Preliminary analytical results received in November 2005 from the fall 2004 GMA 2 interim groundwater quality monitoring activities are shown in Table 22-2. These results consisted of data from filtered samples from three monitoring wells (GMA2-1, GMA2-4, and GMA2-9 [including duplicate]) that were analyzed for PCBs and cyanide. These preliminary results have been compared to the current Method 1 GW-3 groundwater standards and UCLs for groundwater set forth in the MCP. (There are no current GW-2 standards for these constituents.) These comparisons indicate the following:
 - Cyanide was not detected.
 - There were no exceedances of UCL for PCBs in any of these groundwater sample results.
 - The MCP GW-3 standard for PCBs (0.0003 ppm) was slightly exceeded in the filtered samples collected from the three monitoring wells sampled. An exceedance of this standard was previously observed in each of these wells. (Note that the PCB concentrations in the November 2005 filtered samples from all three of these wells are below the MDEP's proposed "Wave 2" GW-3 standard for PCBs of 0.01 ppm.)

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

Commence preparation of annual Groundwater Quality Monitoring Interim Report.

Notes:

1. ft BMP - feet Below Measuring Point.
2. --- indicates LNAPL or DNAPL was not present in a measurable quantity.
3. A survey reference point was established on the Oxbow J & K foot bridge. The "Depth to Water" value(s) provided in the above table refer to the vertical distance from the surveyed reference point to the water surface.

ITEM 23
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 2 (GMA 3)
(GECD330)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

Conducted routine groundwater elevation and NAPL monitoring, including at certain locations that were inaccessible or not located during the October 2005 semi-annual groundwater and NAPL monitoring round. Approximately 7.96 liters (2.10 gallons) of LNAPL were removed by the automatic skimmer located in well 51-21 and an additional 3.64 liters (0.96 gallon) of LNAPL were manually removed from the wells in this area (see Table 23-3).

b. Sampling/Test Results Received

- See attached tables.
- Preliminary analytical results received in November 2005 from the fall 2004 GMA 3 baseline groundwater quality monitoring activities are shown in Table 23-2. These preliminary results have been compared to the current Method 1 GW-2 and GW-3 groundwater standards and UCLs for groundwater set forth in the MCP. (As previously approved by EPA, the comparisons of the results for PCBs and inorganics to the GW-3 standards were based on the results from the filtered samples.) These comparisons indicate the following:
 - There were no exceedances of UCLs in any of the groundwater sample results received in November 2005.
 - No exceedances of MCP GW-2 standards were observed in any of the GW-2 groundwater sample results received in November 2005.
 - The MCP GW-3 standard for chlorobenzene (0.5 ppm) was exceeded in the samples from monitoring wells 6B-R and 78B-R. Similar exceedances have previously been observed in these wells. (Note that the chlorobenzene concentrations detected in the samples from both of these wells in November 2005 are also above the MDEP's proposed "Wave 2" GW-3 standard for chlorobenzene of 1 ppm.)
 - The PCB concentration in the filtered sample from well 82B-R was equal to the current MCP GW-3 standard for PCBs (0.0003 ppm). The same concentration was previously observed at this location in spring 2005. (Note that this PCB concentration is below the MDEP's proposed "Wave 2" GW-3 standard for PCBs of 0.01 ppm.)

ITEM 23
(cont'd)
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 2 (GMA 3)
(GECD330)
NOVEMBER 2005

b. Sampling/Test Results Received (cont'd)

- The MCP GW-3 standard for dioxin/furan Total TEQs in groundwater (0.0000001 ppm) was exceeded in a sample collected from well 89B. However, the standard was not exceeded in a duplicate sample collected from this location. The laboratory performed a re-extraction of this sample to confirm this potential exceedance. The results of this re-analysis showed a dioxin/furan Total TEQ concentration below the applicable GW-3 standard.
- No other exceedances of MCP GW-3 standards were observed in any of the groundwater sample results received in November 2005.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue ongoing groundwater and NAPL monitoring and recovery activities.
- Complete fall 2005 groundwater sampling event, including sampling of the last baseline well (114B-R), along with well 114A (proposed for supplemental sampling in the Spring 2005 Baseline Groundwater Monitoring Report) (see Item 23.e).
- Redevelop well 16C-R.
- Replace piezometer UB-PZ-2 with a new well (to be designated as GMA3-15).
- Evaluate NAPL thickness and groundwater elevation data.
- Validate groundwater analytical data.

ITEM 23
(cont'd)
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 2 (GMA 3)
(GECD330)
NOVEMBER 2005

d. Upcoming Scheduled and Anticipated Activities (next six weeks) (cont'd)

- Following EPA approval of proposed activities contained in GE's Spring 2005 Baseline Groundwater Quality and NAPL Monitoring Interim Report (submitted on August 30, 2005): (a) collect a groundwater sample from well 51-8 and, if necessary, a NAPL-saturated soil sample; and (b) perform desktop modeling of the potential volatilization of constituents observed at well 51-8. In addition, natural attenuation wells 39B-R and 114A were proposed for supplemental VOC sampling. Well 39B-R was sampled by GE in November 2005 and well 114A will be sampled in conjunction with baseline well 114B-R in December 2005.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

- Portions of this GMA were flooded during storm events in October 2005 and were not accessible at the start of the groundwater quality sampling event. GE has now conducted the baseline sampling activities at most of the scheduled locations and will sample the remaining wells (i.e., wells 114A and 114B-R) in December.
- Natural attenuation well 39D was found to be destroyed during recent inspections. GE plans to examine the prior data from this location and will discuss with EPA whether a replacement for this well is necessary.

f. Proposed/Approved Work Plan Modifications

Several program modifications were proposed in the Spring 2005 Baseline Groundwater Quality and NAPL Monitoring Interim Report (see Item 23.d above).

TABLE 23-2
DATA RECEIVED DURING NOVEMBER 2005

**BASELINE SEMI-ANNUAL GROUNDWATER SAMPLING
GROUNDWATER MANAGEMENT AREA 3
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS
(Results are presented in parts per million, ppm)**

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc., and submitted to CT&E Environmental Services, Inc. for analysis of PCBs and Appendix IX+3 constituents.
2. NA - Not Analyzed.
3. ND - Analyte was not detected. The number in parentheses is the associated detection limit.
4. Total 2,3,7,8-TCDD toxicity equivalents (TEQs) were calculated using Toxicity Equivalency Factors (TEFs) derived by the World Health Organization (WHO) and published by Van den Berg et al. in Environmental Health Perspectives 106(2), December 1998.
5. With the exception of dioxin/furans, only those constituents detected in one or more samples are summarized.
6. Field duplicate sample results are presented in brackets.
7. -- Indicates that all constituents for the parameter group were not detected.
8. Re-extraction was performed on Sample 89B due to confirm concentration of original analysis. Both results for this sample are reported.

Data Qualifiers:

Organics (PCBs, volatiles, semivolatiles, pesticides, herbicides, dioxin/furans)

J - Indicates an estimated value less than the practical quantitation limit (PQL).
X - Estimated maximum possible concentration.
Y - 2,3,7,8-TCDF results have been confirmed on a DB-225 column.

Inorganics

B - Indicates an estimated value between the instrument detection limit (IDL) and PQL.

	11/9/2005	11.20	10.43	0.77	0.475	
	11/16/2005	11.08	10.55	0.53	0.327	
	11/23/2005	11.00	10.56	0.44	0.840	
	11/28/2005	10.62	10.46	0.16	0.099	

**Total Automated LNAPL Removal at well 51-21 for November 2005: 7.959 liters
2.10 Gallons**

**Total Manual LNAPL Removal at all other wells for November 2005: 3.635 liters
0.96 Gallons**

**Total LNAPL Removed for November 2005: 11.594 liters
3.06 Gallons**

Notes:

1. ft BMP - feet Below Measuring Point.
2. P indicates that LNAPL or DNAPL is present at a thickness that is < 0.01 feet.
The corresponding thickness is recorded as such.

UB-PZ-3	998.15	11/28/2005	11.71	11.51	0.20	---	13.41	0.00	0.00

Notes:

1. ft BMP - feet Below Measuring Point.
2. --- indicates LNAPL or DNAPL was not present in a measurable quantity.
3. NA indicates information not available.
4. NM indicates information not measured.
5. P indicates that LNAPL is present at a thickness that is < 0.01 feet, the corresponding thickness is recorded as such.

ITEM 24
GROUNDWATER MANAGEMENT AREAS
PLANT SITE 3 (GMA 4)
(GECD340)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

- Completed fall 2005 groundwater quality sampling event.
- Conducted routine groundwater elevation monitoring at well GMA4-3.

b. Sampling/Test Results Received

- See attached tables.
- Preliminary analytical results received in November 2005 from the fall 2005 GMA 4 interim groundwater quality monitoring activities are shown in Table 24-2. These preliminary results have been compared to the current Method 1 GW-2 and GW-3 groundwater standards and UCLs for groundwater set forth in the MCP. These comparisons indicate no exceedances of those standards and UCLs.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

- Continue routine monitoring at well GMA4-3.
- Evaluate groundwater elevation and analytical data.

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

In the Spring 2005 Groundwater Quality Monitoring Interim Report (submitted on August 30, 2005), GE proposed that wells GMA4-5 and H78B-13R no longer be sampled under the interim groundwater monitoring program.

TABLE 24-2
DATA RECEIVED DURING NOVEMBER 2005

**BASELINE SEMI-ANNUAL GROUNDWATER SAMPLING
GROUNDWATER MANAGEMENT AREA 4
GENERAL ELECTRIC COMPANY - PITTSFIELD, MASSACHUSETTS
(Results are presented in parts per million, ppm)**

Notes:

1. Samples were collected by Blasland, Bouck & Lee, Inc., and submitted to CT&E Environmental Services, Inc. for analysis of PCBs and Appendix IX+3 constituents.
2. NA - Not Analyzed.
3. ND - Analyte was not detected. The number in parentheses is the associated detection limit.
4. DR - Data received and reported in Table 24-2 of the October 2005 CD Monthly Report.
5. Total 2,3,7,8-TCDD toxicity equivalents (TEQs) were calculated using Toxicity Equivalency Factors (TEFs) derived by the World Health Organization (WHO) and published by Van den Berg et al. in Environmental Health Perspectives 106(2), December 1998.
6. With the exception of dioxin/furans, only those constituents detected in one or more samples are summarized.
7. Field duplicate sample results are presented in brackets.
8. -- Indicates that all constituents for the parameter group were not detected.

Data Qualifiers:

Organics (PCBs, volatiles, semivolatiles, dioxin/furans)

J - Indicates an estimated value less than the practical quantitation limit (PQL).
X - Estimated maximum possible concentration.

Inorganics

B - Indicates an estimated value between the instrument detection limit (IDL) and PQL.

UB-MW-5	1,006.06	11/1/2005	14.50	---	0.00	---	15.45	0.00	991.56

Notes:

1. ft BMP - feet Below Measuring Point.
2. --- indicates LNAPL or DNAPL was not present in a measurable quantity.
3. NA indicates information not available.

ITEM 25
GROUNDWATER MANAGEMENT AREAS
FORMER OXBOWS A & C (GMA 5)
(GECD350)
NOVEMBER 2005

* All activities described below for this item were conducted pursuant to the Consent Decree.

a. Activities Undertaken/Completed

Conducted semi-annual groundwater elevation monitoring.

b. Sampling/Test Results Received

See attached table.

c. Work Plans/Reports/Documents Submitted

None

d. Upcoming Scheduled and Anticipated Activities (next six weeks)

None

e. General Progress/Unresolved Issues/Potential Schedule Impacts

No issues

f. Proposed/Approved Work Plan Modifications

EPA's November 10, 2004 letter to GE stated that interim groundwater quality sampling activities are to be postponed until groundwater elevation monitoring data demonstrate that groundwater flow is not being artificially influenced by the temporary dam that is being maintained as part of the remediation along the 1½ Mile Reach of the Housatonic River. Since those remediation activities are ongoing and the temporary dam is still in place, no groundwater sampling was conducted at GMA 5 in fall 2005. The annual interim groundwater sampling will resume in spring 2006 provided that the temporary dam has been removed and groundwater flow is no longer influenced by the dam.

Total Suspended Solids		NA	NA	NA	NA	NA	NA

Notes:

1. Samples were collected by General Electric Company, and submitted to Columbia Analytical Services, Inc. and SGS Environmental Services, Inc. for analysis of PCBs, cyanide, TSS, BOD, oil & grease, and metals (filtered and unfiltered).
2. NA - Not Analyzed.
3. ND - Analyte was not detected. The number in parentheses is the associated detection limit.
4. With the exception of inorganics and conventional parameters only those constituents detected in one or more samples are summarized.

Data Qualifiers:

Organics

J - Indicates an estimated value less than the practical quantitation limit (PQL).

BBL-GE – Pittsfield Monthly NPDES/Toxicity - November 2005

December 9, 2005

Mr. Jeffrey Nicholson
GE Corporate Environmental Programs
159 Plastics Avenue
Pittsfield, MA 01201

Re: NPDES Biomonitoring Report for November 2005
Submission #: R2528006

Dear Mr. Nicholson:

Enclosed is our report on the Whole Effluent Toxicity testing conducted in November 2005. The Outfall Composite samples were collected on 11/7/05 at 11:00 am. The Housatonic River samples were collected on 11/7/05 at 8:30 am. The Outfall Composite and Housatonic River samples were analyzed at Columbia Analytical Services for total cyanide, ammonia, total organic carbon, total phosphorus, chloride, total solids, total suspended solids, and total metals. Dissolved metals were analyzed for only on the Outfall Composite samples. Results are presented in Appendix 2. The Outfall Composite and Housatonic River samples were sent directly by General Electric to Aquatec Biological Services for the acute aquatic toxicity testing including the analysis of alkalinity, hardness, specific conductance, pH, total residual chlorine. Results are presented in Appendix 1.

Should you have any questions please contact me at (585)288-5380 x130.

Thank you for allowing us to provide this service.

Sincerely,

COLUMBIA ANALYTICAL SERVICES

Amy Hentschke
Project Manager

I. Summary

On November 6-7, 2005 sampling of wastewater discharges from the General Electric Company facility in Pittsfield MA was conducted in accordance with the dry weather toxicity testing requirement of the GE NPDES Permit MA0003891. Composite samples were collected from GE outfalls 001, 005-64G, and 005-64T over a 24-hour period. These composite samples were combined in a flow-proportioned manner to generate a single wastewater sample that was shipped to Aquatec Biological Sciences in Williston, Vermont. A grab sample of Housatonic River water, to be used as dilution water in the toxicity test, was collected upstream of the GE discharges on November 7, 2005 and shipped to AquaTec along with the wastewater composite. AquaTec dechlorinated the composite sample prior to the acute toxicity test following the toxicity reduction procedures summarized in a letter dated November 11, 1993 to EPA Region I from JG Ruebesam of General Electric Company. The composite wastewater sample and the dilution water sample were tested for chemical constituents by Aquatec Biological Sciences and Columbia Analytical Services. The analytical results are summarized in Table I and the detailed laboratory test data are include as Appendices to this report. As a result of land transfer documents executed on April 27, 2005 and recorded in the Berkshire County Registry of Deeds on May 2, 2005, Outfalls 001 and 004 were transferred to the Pittsfield Economic Development Authority (PEDA). Outfalls 001 and 004 DMRs will no longer be submitted under the GE NPDES Permit No. MA0003891. However, GE's NPDES Permit requires that the metal and toxicity composites to be made by compositing samples from the following outfalls: 001, 004, 005, 007, and 009. These two composites will continue to include an aliquot of water from outfall 001 and outfall 004, and will be reported on GE's DMR until further actions by the Agencies.

The result from Aquatec Biological Sciences for the acute toxicity test on the wastewater discharge sample indicated a No Observed Acute Effect Level (NOAEL) of 100%.

II. Review of Toxicity Test Results

The wastewater discharge sample collected on November 6 -7, 2005 was tested for 48-hour acute toxicity using Daphnia pulex organisms. The sample did not require dechlorination with sodium thiosulfate ($\text{Na}_2\text{S}_2\text{O}_3$) prior to toxicity testing. Aquatec Biological Sciences reported the results of this toxicity testing as follows:

Effluent toxicity as NOAEL =	100%
Effluent toxicity as LC_{50} =	>100%

This result is in compliance with the toxicity limit of 35% minimum for dry weather NOAEL established in the GE NPDES permit.

The following table summarizes the results of the control sample analyses performed by SGS during the acute toxicity bioassay:

<u>Control Analysis</u>	<u>Result</u>
Survival in 100% dilution water	100%
Survival in laboratory water	100%
Survival in laboratory water with 100 mg/L sodium thiosulfate	100%
LC_{50} for Daphnia pulex in sodium chloride reference toxicant solution	2527 mg NaCl/L November 8

The Daphnia survival rates in control solutions of upstream dilution water, laboratory water and reference toxicant solution were within acceptable limits, indicating that the results of the toxicity test are valid. The survival rate of greater than 90% for the Daphnia in laboratory control water sample indicates that the Daphnia were not stressed prior to the toxicity test.

III. Review of Wastewater Sampling Procedures

Composite samples of the individual NPDES wastewater discharges were collected over a 24-hour period. These samples were composited in a flow-weighted manner to generate a single combined discharge sample for toxicity testing and chemical analysis.

The 24-hour composite samples from the individual discharges were collected as follows:

Each automatic sampler (at outfall 001, 64T, 64G, and 09B) was programmed to collect approximately 7 liters of wastewater into a 10-liter glass container in a time-proportioned manner over a 24-hour period. Outfalls 004, 007, and 09A have been plugged and no longer flow.

All sample containers were packed in ice or refrigerated to keep the wastewater samples cold during the 24-hour collection period.

Flow meter readings were taken at the beginning and end of the 24-hour collection period to determine the total 24-hour flow for each wastewater discharge.

At the end of the 24-hour collection period, the discharge samples were taken to Building 64G where OB&G personnel composited these samples, in a flow weighted manner, to generate a single combined sample for the acute toxicity test and the chemical analyses, as follows:

The proportions of each individual discharge sample needed to produce a single combined sample were calculated from the flow measurements. The calculated sample volumes were then transferred from their original collection containers to a 2.5 or 5 gallon mixing container. The combined discharge sample was then split into various containers for toxicity testing and chemical analyses. These containers were shipped by vendor courier to AquaTec for toxicity testing and by FedEx (overnight) to Columbia Analytical Services for chemical analyses. All samples were chilled with ice packs during shipment.

A grab sample of Housatonic River water was collected on the second day of sampling at the Lyman Road Bridge in Hinsdale, MA, upstream of the GE site. This sample was split for chemical analysis and toxicity testing in a similar manner as the combined effluent sample (see above).

Details of the times and dates of sample collection as well as the names of the individuals collecting and transporting the samples are provided on the chain of custody forms in Appendix 3 of this report.

IV. Review of Individual NPDES Discharges

The following is a brief description of each of the seven outfalls that are monitored for acute and chronic toxicity in accordance with NPDES Permit MA0003891 issued to the General Electric Company, Pittsfield, MA.

1. Outfall 001 is permitted to discharge storm water runoff from the oil/water separator in Building 31W to Silver Lake.
2. Outfall 004 is permitted to discharge storm water runoff to Silver Lake. (**Outfall plugged**)
3. Outfall 005 is permitted to discharge contact cooling water, non-contact cooling water, treated process water and storm water runoff from the Wastewater Treatment Plant in Building 64T, and treated groundwater from the Groundwater Treatment Plant in Building 64G to the Housatonic River. Monitoring samples are collected separately from the effluents of 64G and 64T. Both samples are included in the flow composite sample used for toxicity testing.
4. Outfall 007 is permitted to discharge stormwater runoff to the Housatonic River. (**Outfall plugged**)
5. Outfall 09A is permitted to discharge non-contact cooling water and stormwater runoff to Unkamet Brook. (**Outfall plugged**)
6. Outfall 09B is permitted to discharge non-contact cooling water, treated process water and stormwater runoff from the oil/water separator in Building 119W to Unkamet Brook.

December 5, 2005 (revised)

Ms. Amy Hentschke
Columbia Analytical Services,
1 Mustard Street – Suite 250
Rochester, NY 14609

Dear Ms. Hentschke:

Enclosed please find one bound and one unbound copies of our report of the results for whole effluent toxicity testing of samples received from GE Pittsfield, Massachusetts on November 7, 2005 (previously sent).

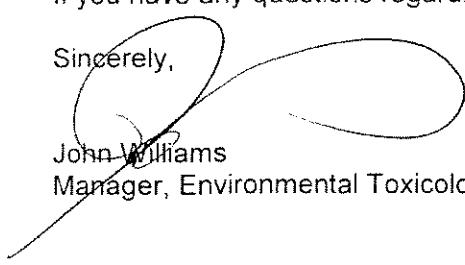

According to the Chain-of-Custody documentation the samples for Whole Effluent Toxicity (WET) Testing were collected on November 7, 2005. The samples were delivered to Aquatec Biological Sciences, Inc. by courier service and delivered on the same day. The effluent sample (Sample 31005) was logged in for the acute 48-hour static toxicity test with *Daphnia pulex*. The receiving water sample (Sample 31006) was logged in for dilution water. A subsample of each sample was checked for residual chlorine (not detected) and for alkalinity and hardness measurements at Aquatec Biological Sciences, Inc. The toxicity test was started on November 8, 2005, within the specified holding time.

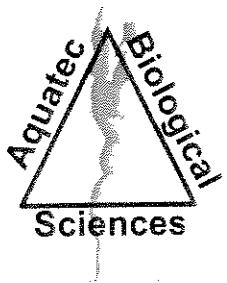

Since total residual chlorine is a time-critical analysis, we recommend that this analysis be done at the time of collection and reported to Aquatec Biological Sciences, Inc. on the Chain-of-Custody documentation accompanying the samples.

At the conclusion of the toxicity test on November 10, 2005, a final count of surviving organisms was completed. The average survival ranged from 96 percent to 100 percent in all test concentrations. Acute toxicity (*Daphnia pulex*) was not detected, and the 48-hour LC50 reported as >100% effluent.

If you have any questions regarding the report, please call Dr. Philip C. Downey or me.

Sincerely,

John Williams
Manager, Environmental Toxicology

NOTES TO SAMPLER(S): (1): Complete the labels (Date, time, initials) and cover the labels with clear tape. Tape the caps of the sample bottles to ensure that they do not become dislodged during shipment. Nest the samples in sufficient ice to maintain 0°C – 6°C. Results for samples received at temperatures exceeding 6°C will be qualified in the report.

Notes to Lab: Ambient cooler temperature: – 0, 8 °C. Dechlorinate the effluent sample if chlorine is detected. Subsample for TRC analysis to STL.

Toxicity Test Methods

General Electric Company

Client: GENERAL ELECTRIC, PITTSFIELD, MA, MA0003891

SDG: 9181

Test Description: Daphnid, *Daphnia pulex*, acute toxicity test

ASSOCIATED PROTOCOL: EPA 2002, 5th ed. (EPA-821-R-02-012) Methods for Measuring the Acute Toxicity of Effluents and Receiving Waters to Freshwater and Marine Organisms, Method 2002.0

1. Test type:	Static, non-renewal
2. Test temperature:	20 ± 1°C
3. Light quality:	Ambient laboratory illumination
4. Photoperiod:	16 hr. light, 8 hr. dark
5. Test chamber size:	30 ml
6. Test solution volume:	15-20 ml / replicate
7. Renewal of test concentrations:	None
8. Age of test organisms:	Less than 24 h
9. No. organisms / test chamber:	5
10. No. of replicate chambers / concentration:	5
11. No. of organisms / concentration:	20
12. Feeding regime:	Feed 0.1 ml of YTC and algal suspension prior to testing. Not fed during test.
13. Cleaning:	None
14. Aeration:	None
15. Dilution water:	Receiving Water (Housatonic River)
16. Test concentrations:	5, 15, 35, 50, 75, 100%
17. Laboratory control:	1:1 mix of reconstituted moderately hard water and Lamoille River water. Dechlorination control.
18. Test duration:	48 h
19. Monitoring:	Day 0: temperature, DO, pH, and conductivity. Day 1: temperature, DO, pH, and conductivity. Day 2: temperature, DO, pH Hardness, alkalinity, salinity, TRC Biological monitoring daily (survival)
19. End points:	Survival
20. Reference toxicant test:	Sodium chloride 48-h LC50
21. Test acceptability	90% or greater
22. Data interpretation:	Acute: 48 h LC50 (Point estimate by EPA statistical flowchart using TOXIS 2) and A-NOEC by hypothesis test statistics compared to the receiving water control (EPA statistical flowchart using TOXIS 2)

Daphnid, *Daphnia pulex*, 48 H Static Acute Test

Test Date: 11/08/05
 Sample Date: 11/07/05
 Species: Daphnia pulex
 Test Type: Acute - 48 hours

Test Number: 46223
 Test Material: Effluent - Industrial %

Note: Residual chlorine was not detected in the effluent sample, therefore sodium thiosulfate was not added to the effluent before toxicity testing. Although chlorine was not detected, an additional dechlorination control (0.1 mL of 0.25 N sodium thiosulfate per liter of moderately hard water) was included in the test array.

Cooler Receipt And Preservation Check Form

Project/Client GE Pittsfield Submission Number _____

Cooler received on 11/8/05 by: CMK COURIER: CAS UPS FEDEX VELOCITY CLIENT

1. Were custody seals on outside of cooler? YES NO
2. Were custody papers properly filled out (ink, signed, etc.)? YES NO
3. Did all bottles arrive in good condition (unbroken)? YES NO
4. Did any VOA vials have significant air bubbles? YES NO
5. Were ~~ice~~ or Ice packs present? YES NO
6. Where did the bottles originate? CAS/ROC CLIENT
7. Temperature of cooler(s) upon receipt:

0.2° 1.1°
Is the temperature within 0° - 6° C?: Yes Yes

If No, Explain Below

Yes No Yes No Yes

Date/Time Temperatures Taken: 11/8/05 0940

Thermometer ID: 161 or IR GUN Reading From: Temp Blank or Sample Bottle

If out of Temperature, Client Approval to Run Samples _____

PC Secondary Review: MJA

Cooler Breakdown: Date: 11/8/05 by: CMK

1. Were all bottle labels complete (i.e. analysis, preservation, etc.)? YES NO
2. Did all bottle labels and tags agree with custody papers? YES NO
3. Were correct containers used for the tests indicated? YES NO
4. Air Samples: Cassettes / Tubes Intact Canisters Pressurized Tedlar® Bags Inflated N/A

Explain any discrepancies: _____

		YES	NO	Sample I.D.	Reagent	Vol. Added
pH	Reagent					
12	NaOH	✓				
2	HNO ₃	✓				
2	H ₂ SO ₄	✓				
Residual Chlorine (+/-)	for TCN & Phenol					
5.9**	P/PCBs (608 only)					

YES = All samples OK

NO = Samples were preserved at lab as listed

PC OK to adjust pH

**If pH adjustment is required, use NaOH and/or H₂SO₄

VOC Vial pH Verification (Tested after Analysis) Following Samples Exhibited pH > 2		

Other Comments:

PC Secondary Review: MJA

Cooler Receipt And Preservation Check Form

Project/Client GE Pittsfield Submission Number _____

Cooler received on 11/8/05 by: CMK COURIER: CAS UPS FEDEX VELOCITY CLIENT

1. Were custody seals on outside of cooler? YES NO
2. Were custody papers properly filled out (ink, signed, etc.)? YES NO
3. Did all bottles arrive in good condition (unbroken)? YES NO
4. Did any VOA vials have significant air bubbles? YES NO
5. Were Ice or ice packs present? YES NO
6. Where did the bottles originate? CAS/ROC CLIENT
7. Temperature of cooler(s) upon receipt:

0.2° 1.1°

Yes Yes

No No

Yes Yes Yes

No No No

If No, Explain Below

Date/Time Temperatures Taken:

11/8/05 0940

Thermometer ID: 161 or IR GUN Reading From: Temp Blank or Sample Bottle

If out of Temperature, Client Approval to Run Samples

PC Secondary Review: MJL

Cooler Breakdown: Date: 11/8/05 by: CMK

1. Were all bottle labels complete (i.e. analysis, preservation, etc.)? YES NO
2. Did all bottle labels and tags agree with custody papers? YES NO
3. Were correct containers used for the tests indicated? YES NO
4. Air Samples: Cassettes / Tubes Intact Canisters Pressurized Tedlar® Bags Inflated N/A

Explain any discrepancies:

		YES	NO	Sample I.D.	Reagent	Vol. Added
pH	Reagent					
12	NaOH	✓				
2	HNO ₃	✓				
2	H ₂ SO ₄	✓				
Residual Chlorine (+/-)	for TCN & Phenol					
5-9**	P/PCBs (608 only)					

YES = All samples OK

NO = Samples were preserved at lab as listed

PC OK to adjust pH

**If pH adjustment is required, use NaOH and/or H₂SO₄

VOC Vial pH Verification (Tested after Analysis) Following Samples Exhibited pH > 2
