GE and public can file appeal with the US First District Court of Appeals	?	After resolution of petitions to EPA EAB

- 1 EPA can approve, conditionally approve, or reject GE's submittal. While for the purposes of generating this schedule, it was assumed that the letter would be a conditional approval, this decision has not yet been made.
- 2 It was assumed for the purpose of generating this schedule that with a conditional approval, the CMS would require revisions.
- 3 The potentially responsible party (GE), States, and the TAG recipient can submit written comments for consideration by the EPA Remedy Review Board. Comments are strictly limited to 10 pages.
- 4 For the purpose of generating this schedule, this assumes GE does not invoke dispute resolution. Under the Consent Decree, following the close of the public comment period, EPA will notify GE of its intended final decision on the RCRA Permit Modification. GE can then seek administrative dispute resolution with respect to such notification.
