DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determination in these decisions of prevailing rates and fringe benefits have been made in accordance with 29

CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by

writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3014, Washington, DC 20210.

Modification to General Wage Determination Decisions

The number of the decisions listed to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by volume and State. LIBRARY OF CONGRESS**Copyright Office**

[Docket No. 2005-1]

Registration of Claims to Copyright: New Format for Certain Copyright Registration Certificates

AGENCY: Copyright Office, Library of Congress.

ACTION: Policy decision.

SUMMARY: The Copyright Office of the Library of Congress is changing the format of certain copyright registration certificates issued under the Copyright Act. Certificates in the new format will be issued only for motion pictures and other audiovisual works registered in class PA, as part of a pilot project. For all other categories of registrations, the certificate format will not change. The substantive content of all certificates will remain the same.

DATES: *Effective Date:* February 14, 2005.

FOR FURTHER INFORMATION CONTACT: Jeff Cole, Acting Reengineering Program Manager, or Kent Dunlap, Principal Legal Advisor to the General Counsel. Telephone: (202) 707-8350. Telefax: (202) 707-8366.

SUPPLEMENTARY INFORMATION:**1. Background**

Section 410(a) of the copyright law provides that after the Register of Copyrights examines a submitted

copyright claim and determines that it can be registered, "the Register shall register the claim and issue to the applicant a certificate of registration under the seal of the Copyright Office. The certificate shall contain the information given in the application, together with the number and effective date of registration." Under practices in place since 1978, registration certificates are reproductions of the paper application form.

The Copyright Office is reengineering its business processes to improve the efficiency and timeliness of its public services. The Office is seeking to provide more copyright services online, ensure the prompt availability of copyright records, provide better tracking of items in the workflow, and reduce paper handling. Reengineering is a multi-year effort that began in 2000, and full implementation is scheduled for the fall of 2006.

Under the reengineered process, copyright registration certificates will be generated from the registration data stored in an electronic information system. The data will be entered into the system either directly from an online electronic application, or by the scanning of a revised paper application form. Unlike the current certificate, the new certificate will not be a reproduction of the paper application form.

2. Pilot for Registration of Motion Pictures and Other Audiovisual Works

To test the new processes, a pilot will begin on February 14, 2005, involving registrations for motion pictures and other audiovisual works registered in class PA. During the pilot, applicants will continue to file claims using the current Form PA paper application. Online electronic applications will be the subject of a later pilot.

In the pilot, the certificate will be generated from the registration data scanned into the system from the Form PA paper application. While the substantive content of the new certificate will be almost identical to that of the current one, the format and general appearance will be significantly different. A sample of the new certificate may be viewed on the Copyright Office Web site at <http://www.copyright.gov/docs/mp-pilot-cert.html>.

All of the substantive registration information entered on the paper form by the applicant will appear on the certificate, organized by the same space numbers and headings. At the top of the certificate, the same elements will appear: the registration number, the effective date of registration, and the
