

Rain...

*it's crucial for Greensboro's
water supply, but...*

*too much too fast can cause
dangerous flooding.*

Much of our urban surface is paved or covered, so rain that cannot be absorbed into the ground creates added runoff. By removing trash and debris blocking storm drains and culverts, the City's Stormwater Program reduces stormwater backups and road hazards.

To help, you can Adopt-a-Stream or call us to report pipe and stream blockages or other drainage problems.

**Call Greensboro's Environmental Helpline
at 373-2812 for more information.**
