Cardinal flower

Swamp milkweed

Milkweed

Soloman's seal

Prickly pear cactus in flower

A single stalk of Goldenrod is shown against a dark, blurred background. The stalk is green and has several large, lanceolate leaves. At the top of the stalk is a long, arching spike of numerous small, bright yellow flowers. The flowers are densely packed and have a characteristic four-petaled structure. The overall appearance is that of a healthy, mature plant.

Goldenrod

Daisy fleabane

White aster

Sunflower, common

Blackeyed Susan

Coreopsis
